ProCam merchant guide: what you do, in order

Only what the merchant needs: an online booking first (scan the customer's QR, hand over, take it back), then a walk-in booking (card, cash or QR), then a battery swap, then checking your income. Customer screens appear only where you scan something from them. Screens are from the app on a phone.

Online booking	12 screens
Walk-in booking	9 screens
Battery swap	6 screens
Check income	1 screens

Online booking

A customer who booked and paid on their phone in advance. They show you their booking QR, you scan it, hand over the drone, and take everything back when their time is up.

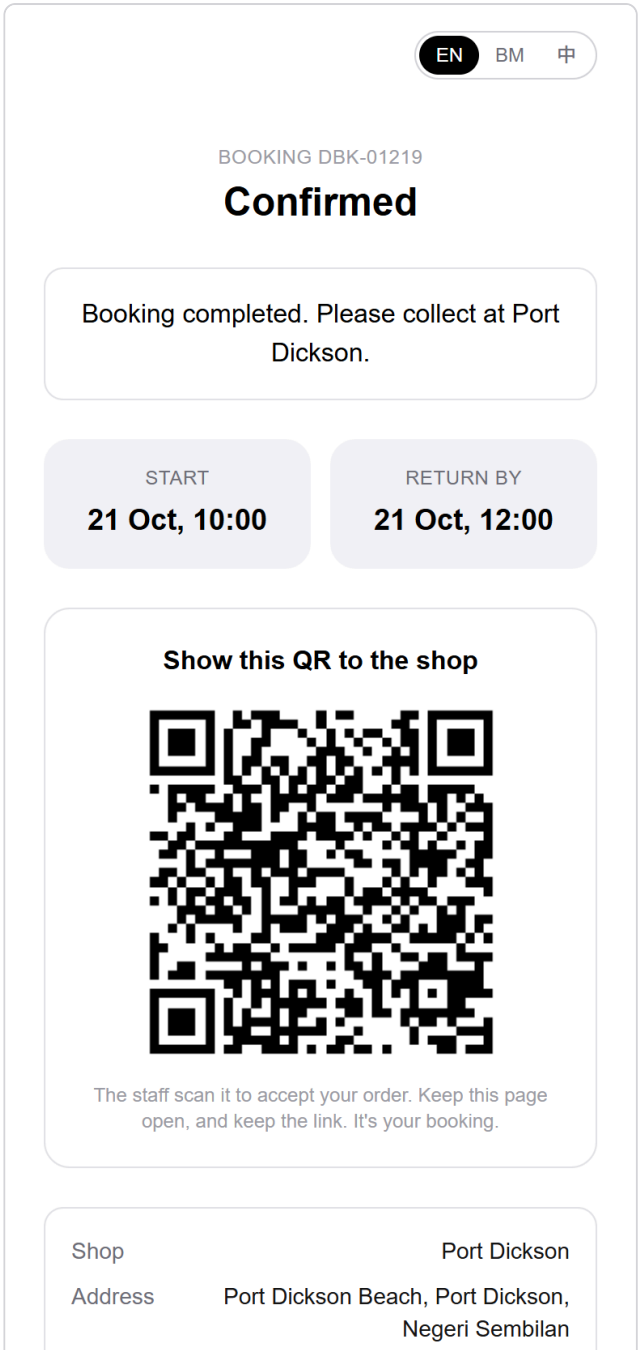

12 screens

1

ONLINE BOOKING · STEP 1 OF 12

Their booking QR: this is what you scan

The customer opens their booking link. It shows the start and return times and a QR code. They show you this screen. (They only have a booking once they have paid, so you never see an unpaid one.)

2

ONLINE BOOKING · STEP 2 OF 12

Tap Scan QR on your dashboard

On your dashboard tap Scan QR (next to Walk-in QR). Allow the camera the first time. Point it at the QR on the customer's booking page and it opens their order by itself, no need to use the phone's own camera app. A QR that is not a ProCam booking or battery swap QR is ignored with a message.

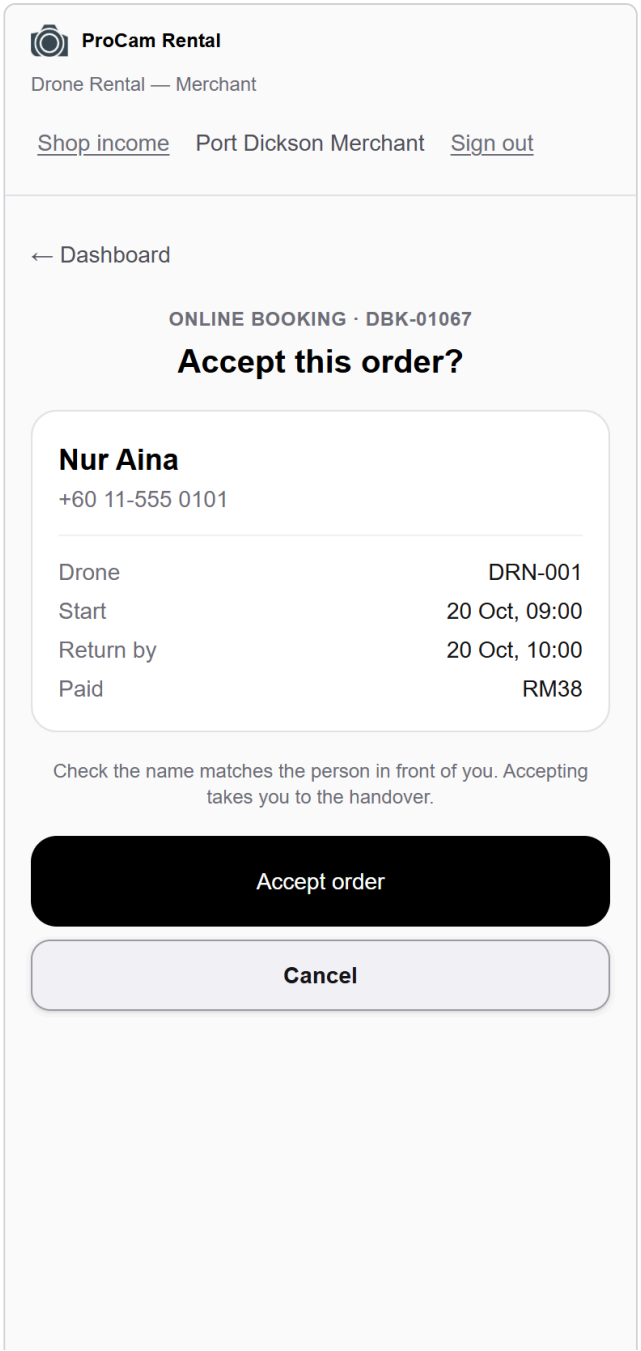

3

ONLINE BOOKING · STEP 3 OF 12

Scan their QR and accept

Scan their QR with Scan QR on your dashboard (the phone's own camera app works too). Check the name matches the person in front of you, then tap Accept order.

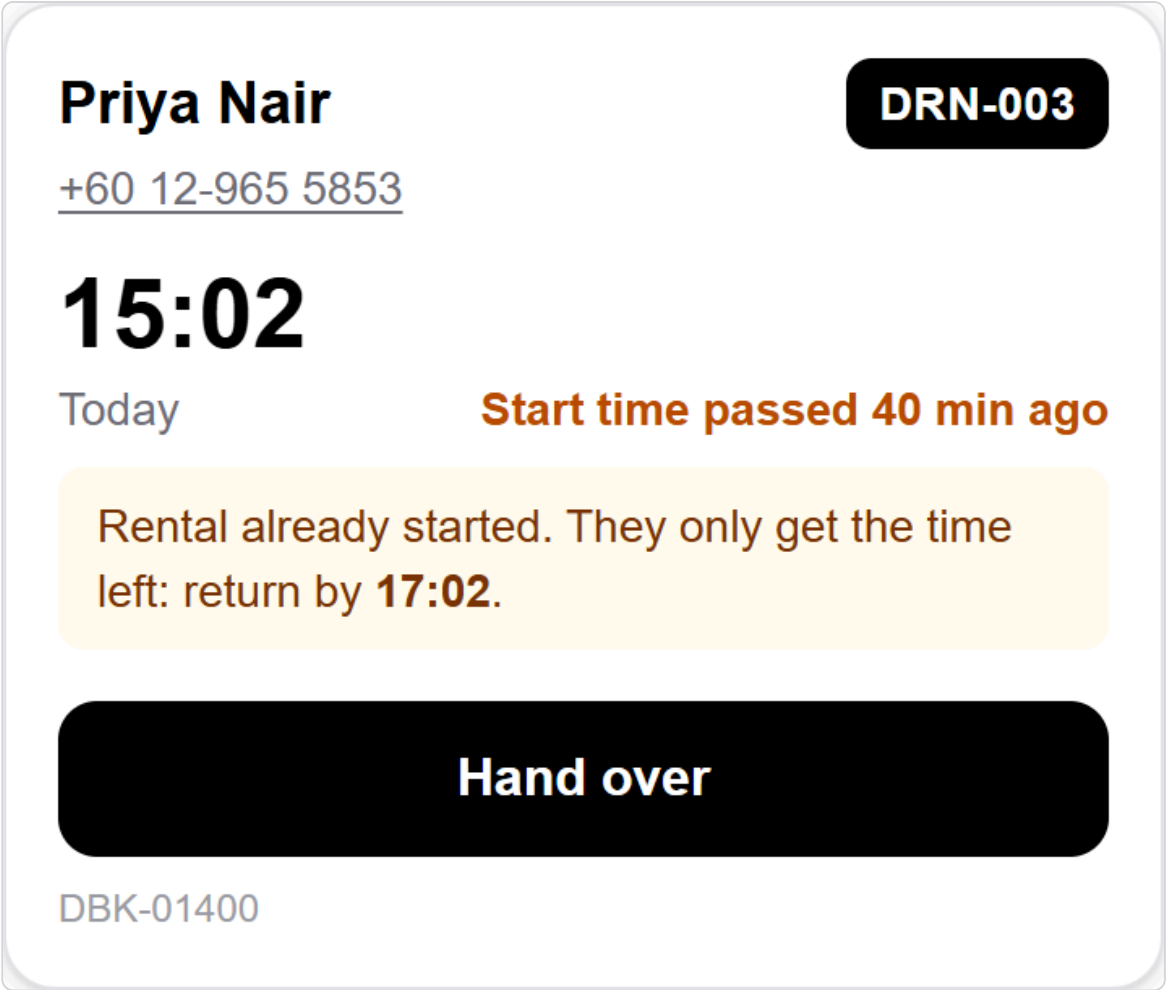

4

ONLINE BOOKING · STEP 4 OF 12

Customer comes late: the rental has already started

If a customer has not collected 20 minutes after their start time, the rental has already started. They still get their drone, and you do the handover as normal (photos, batteries, their name), but they only get the time that is left. The pickup card says so and shows the return time. If nobody ever collects before the rental ends, the booking closes by itself and the deposit hold is released.

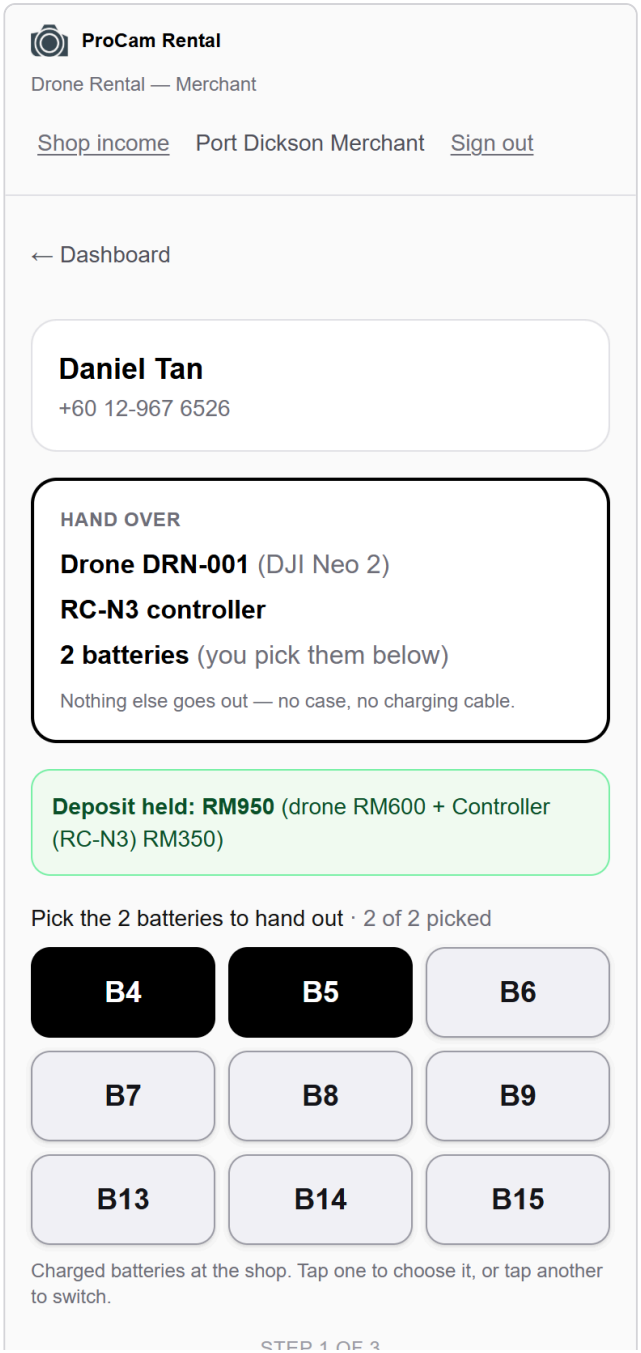

5

ONLINE BOOKING · STEP 5 OF 12

Check what goes out, take the first photo

The handover page says who it's for and what goes out: the drone, the controller if they rented one (an RC-N3 such as CTR-001, or the goggles set GOG-001) and the batteries to give, by name (B1, B2). Tap which charged batteries you are handing over. Every rental needs 2 photos, one per page. The first is on this page: the drone from above with its controller, both switched on (or the drone alone for a phone-only rental). If the customer came from a flyer, a green note at the top tells you that you earn 45% of the profit on it.

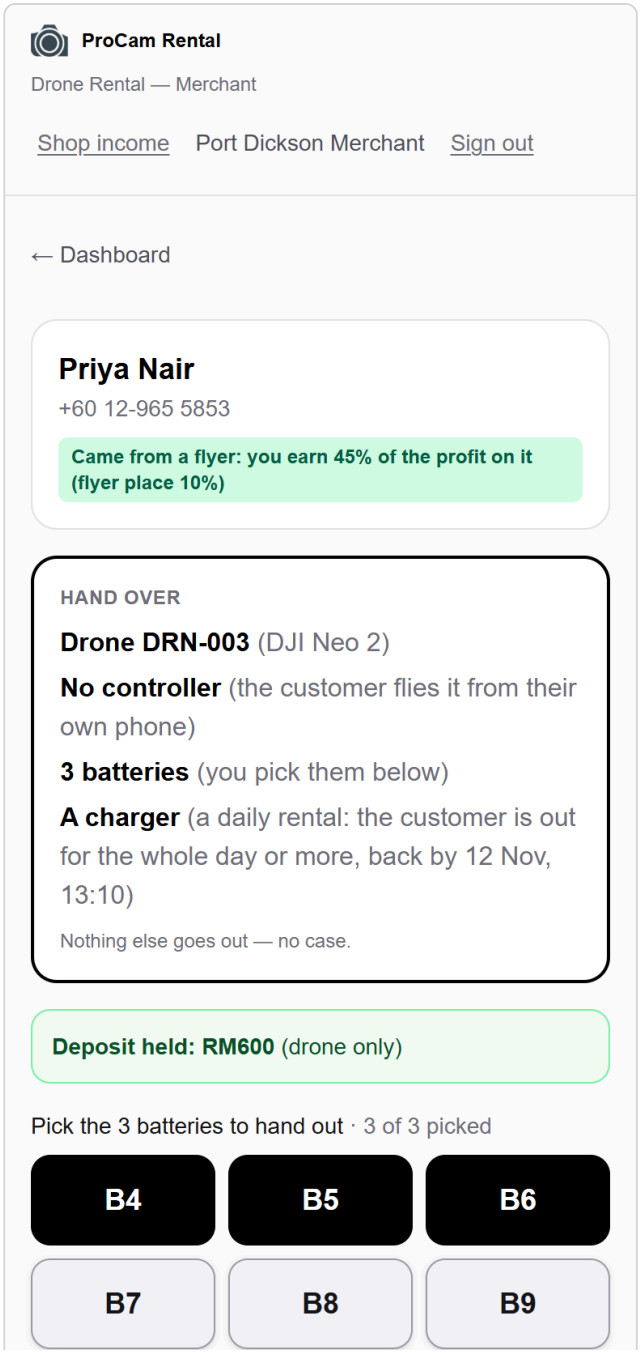

6

ONLINE BOOKING · STEP 6 OF 12

A booking by the day

A rental by the day goes out with 3 batteries and a charger, and the customer is out for the whole day or more: the page says when it is due back. Pick the 3 batteries you hand out. This one also shows the green flyer note: the customer scanned a flyer, so you earn 45% of the profit on it and the flyer place earns 10%.

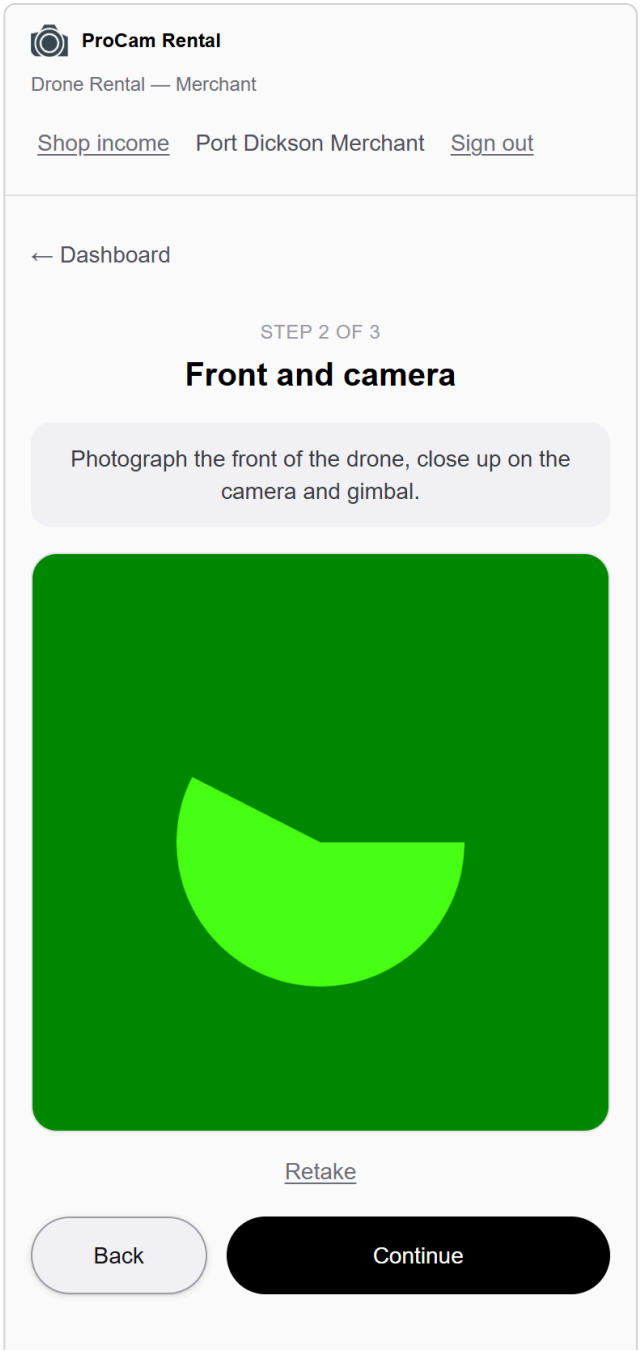

7

ONLINE BOOKING · STEP 7 OF 12

The second photo

Front and camera: the front of the drone, close up on the camera and gimbal. Take it, check it shows, then Continue. Back keeps the photo you already took.

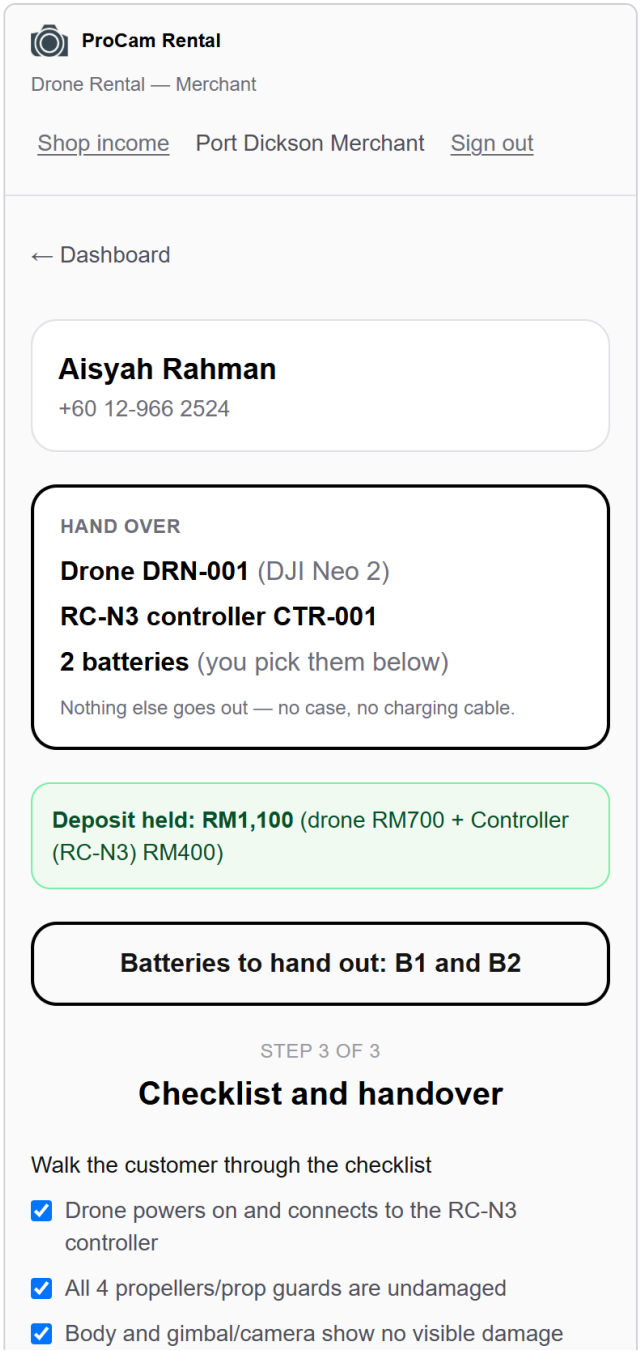

8

ONLINE BOOKING · STEP 8 OF 12

Checklist and the customer's name

After the 2nd photo: tick the checklist, have the customer type their name, then tap Confirm handover. The rental starts. For a rental by the day the checklist also has the charger.

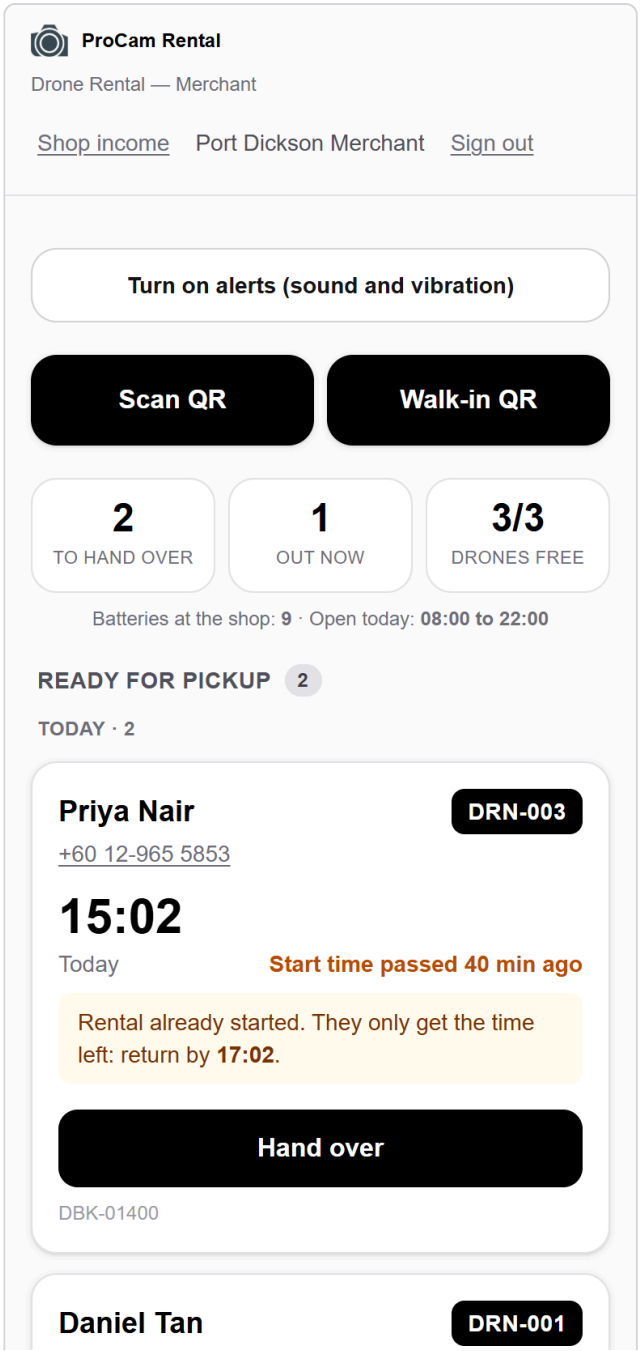

9

ONLINE BOOKING · STEP 9 OF 12

Keep an eye on rentals while the drone is out

Each rental on your dashboard shows the customer, the drone, its controller and the batteries they are holding. Due-back time is shown too.

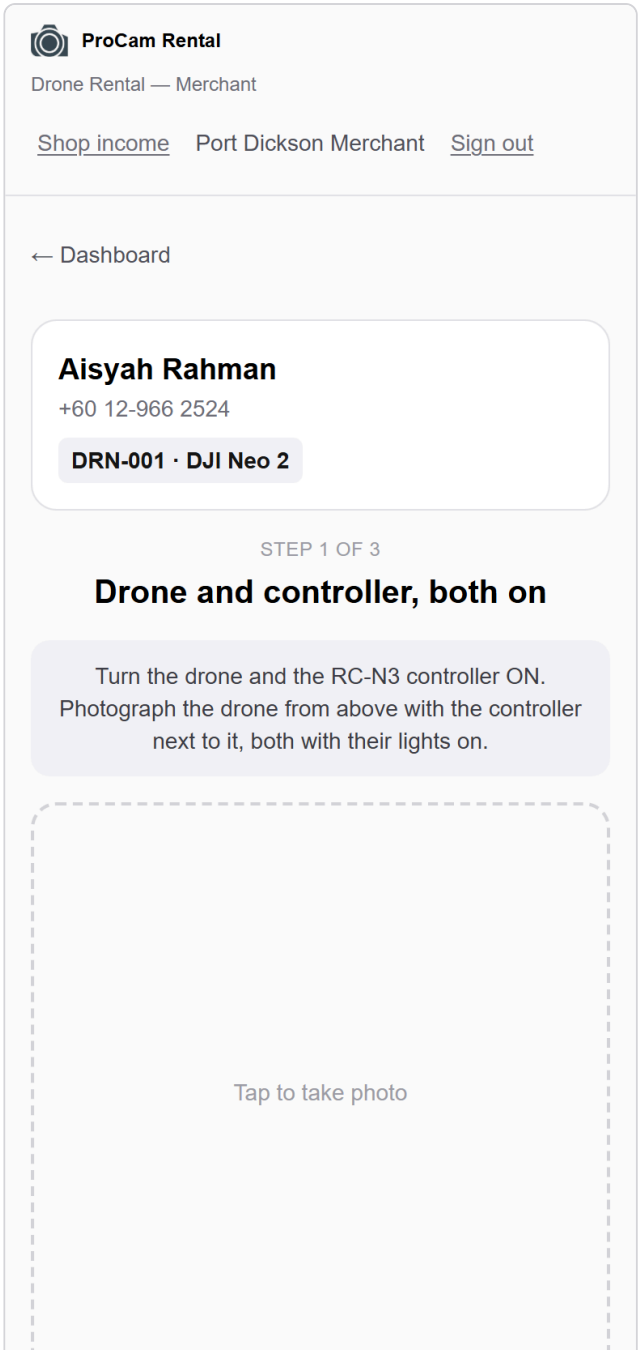

10

ONLINE BOOKING · STEP 10 OF 12

Take everything back

Tap Return. The top of the page lists what to take back: the controller (if they rented one) and the named batteries the customer is holding. The same 2 photos are taken again, one per page. A rental by the day also has the charger to take back.

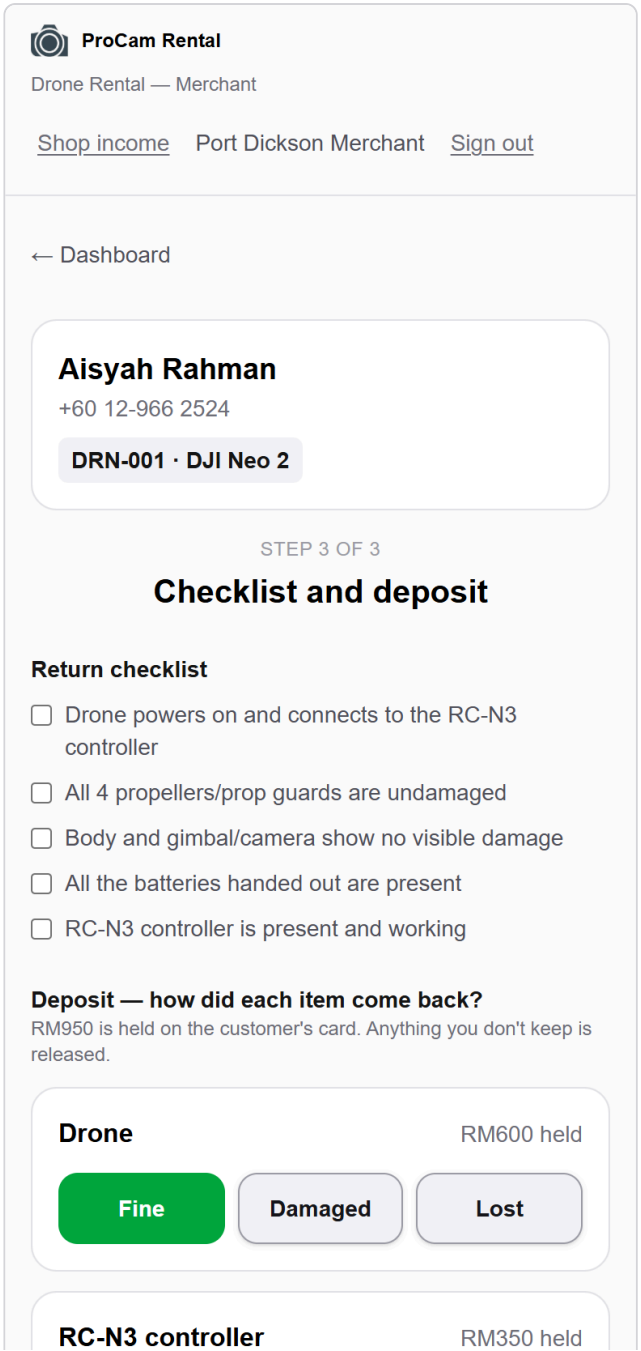

11

ONLINE BOOKING · STEP 11 OF 12

Checklist and deposit

After the photos: tick the checklist, then say how the drone and the controller (if any) came back: Fine, Damaged or Lost. A lost item is kept from the deposit in full. For Damaged you type no amount: write what is damaged and ProCam reviews it that night and decides what to keep; the whole deposit stays held until then. At the bottom, choose how a late fee is paid (saved card or cash). It only applies if the drone is back past the grace time. If the customer chose Verify identity, only 40% of the deposit was held, and the amounts on this page show that smaller deposit.

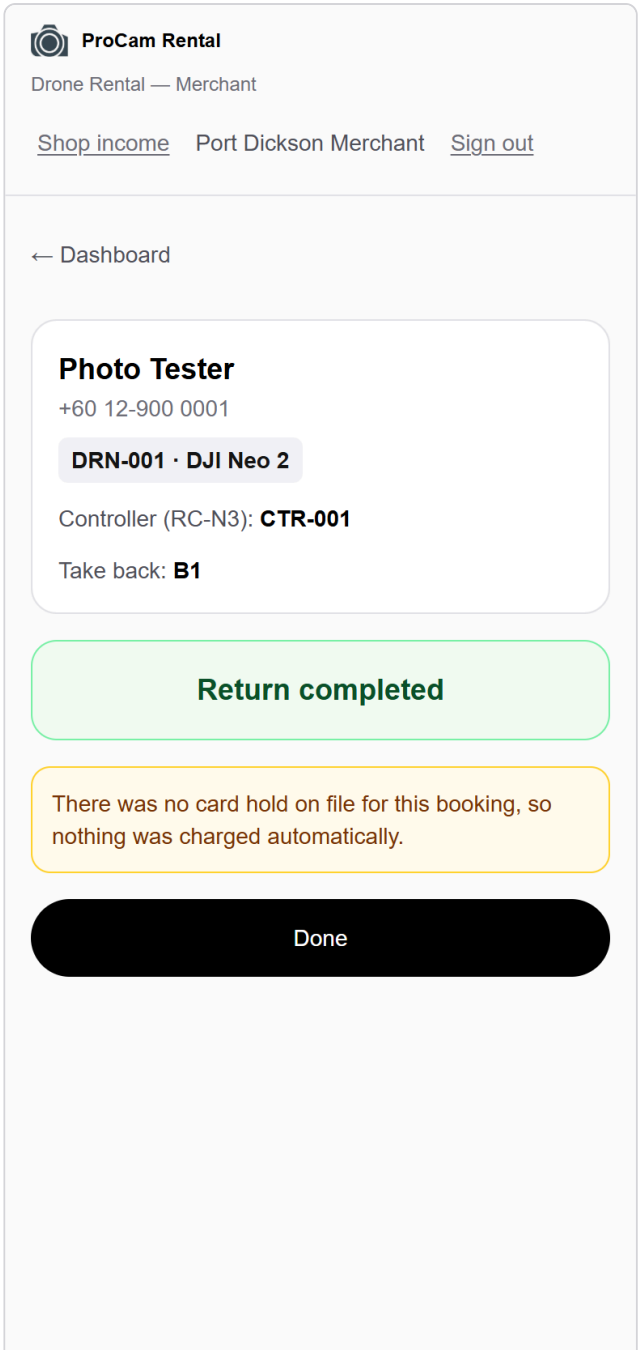

12

ONLINE BOOKING · STEP 12 OF 12

Return complete

It confirms the outcome. The drone and batteries go back to available.

Walk-in booking

A customer with no booking. They scan the shop's walk-in QR, which opens the booking page with Now chosen, and send their order from their own phone. You confirm it, take the payment (card, cash or QR), and then hand over the drone exactly as for an online booking. The same 20 minutes apply: the rental starts when you hand over the drone, if that is within 20 minutes of the order.

9 screens

13

WALK-IN BOOKING · STEP 1 OF 9

Show the shop's walk-in QR

Open Walk-in QR from your dashboard and show it on the counter, or tap Download QR to print it. The customer scans it, the booking page opens with Now chosen, and they fill in their own details. It never changes, so you can print it once.

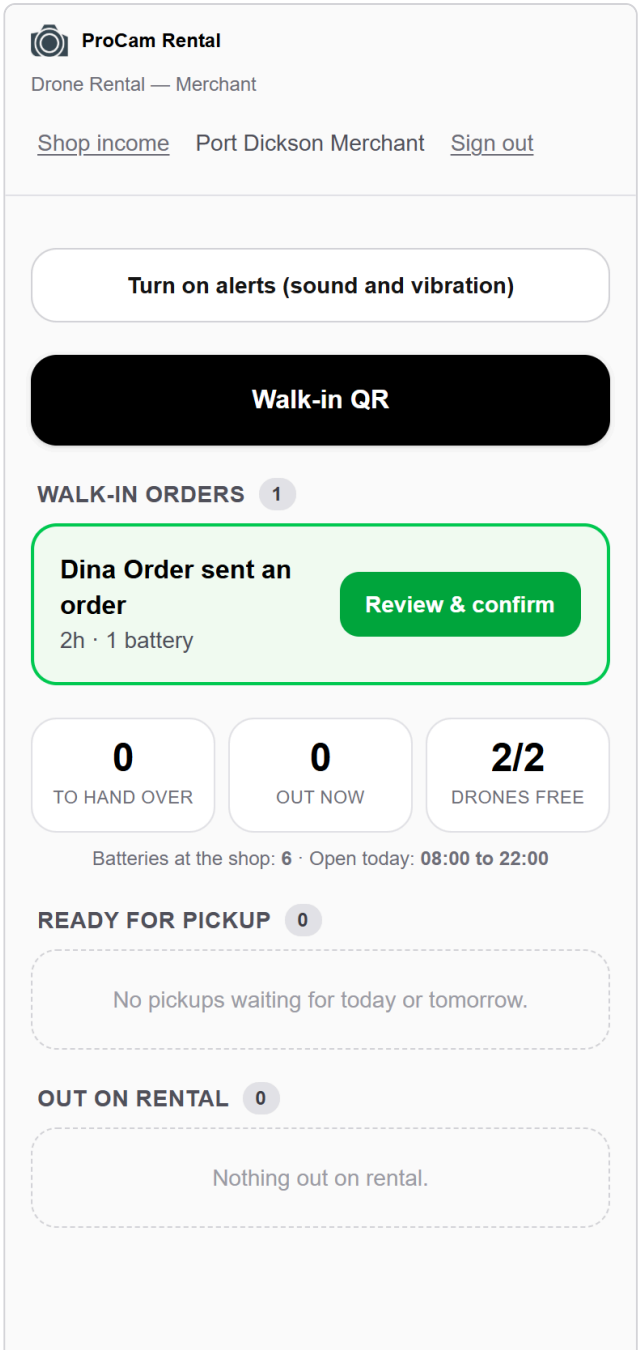

14

WALK-IN BOOKING · STEP 2 OF 9

Their order arrives

A green Walk-in orders box appears on your dashboard. Tap Review & confirm. Tap Turn on walk-in alerts once (at the top) and this phone beeps and vibrates when a customer sends an order, while the dashboard is open.

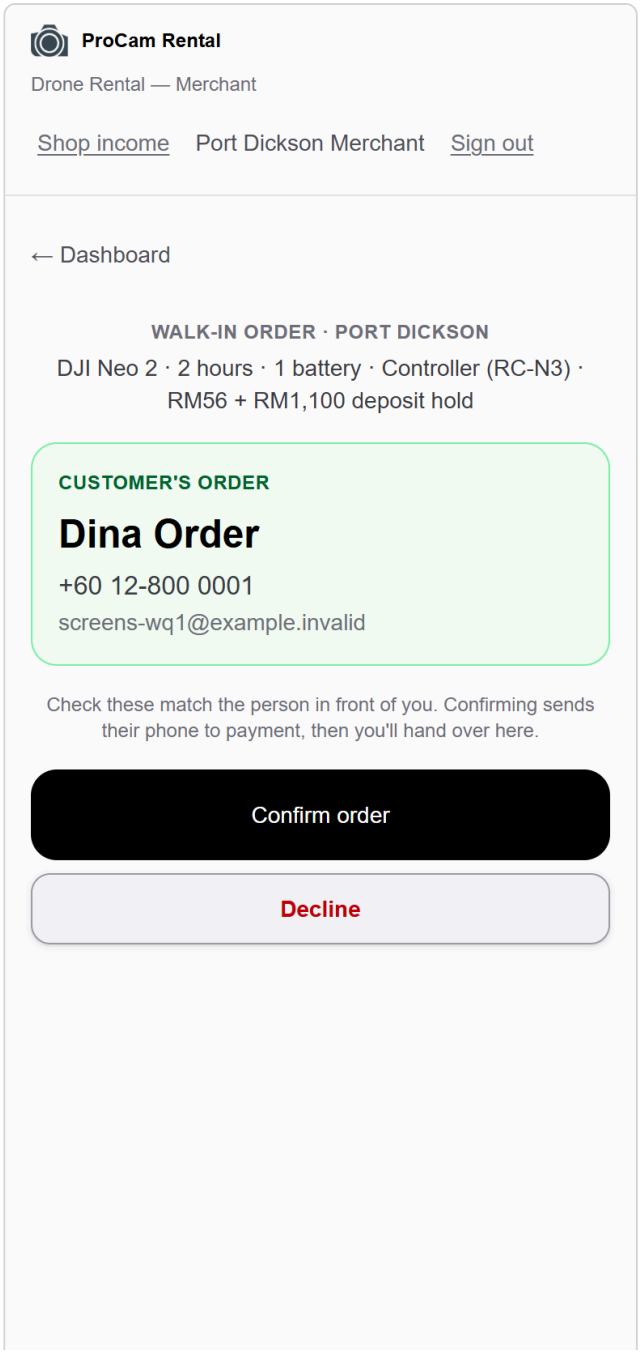

15

WALK-IN BOOKING · STEP 3 OF 9

Check the name and confirm

Check the name against the person in front of you, then tap Confirm order. A free drone is assigned for you (there's nothing to choose), and the customer's phone moves on to payment.

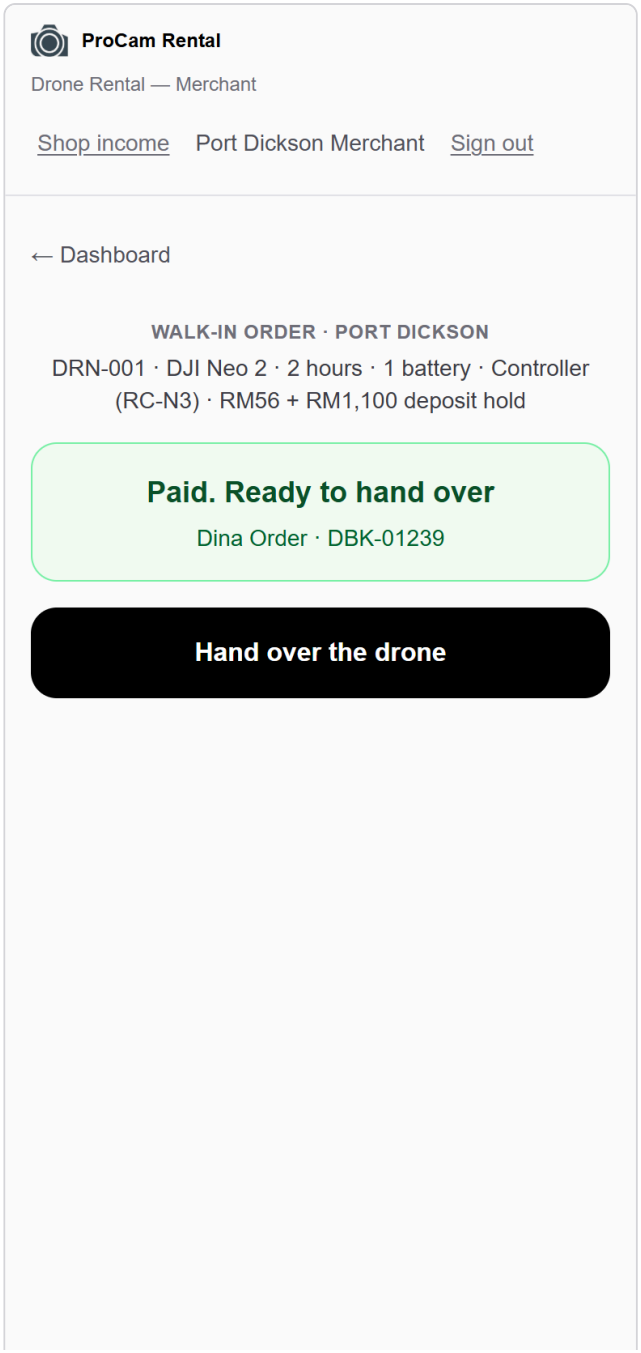

16

WALK-IN BOOKING · STEP 4 OF 9

Customer pays by card

Their phone does the payment. This screen turns to Paid when it goes through. Tap Hand over the drone.

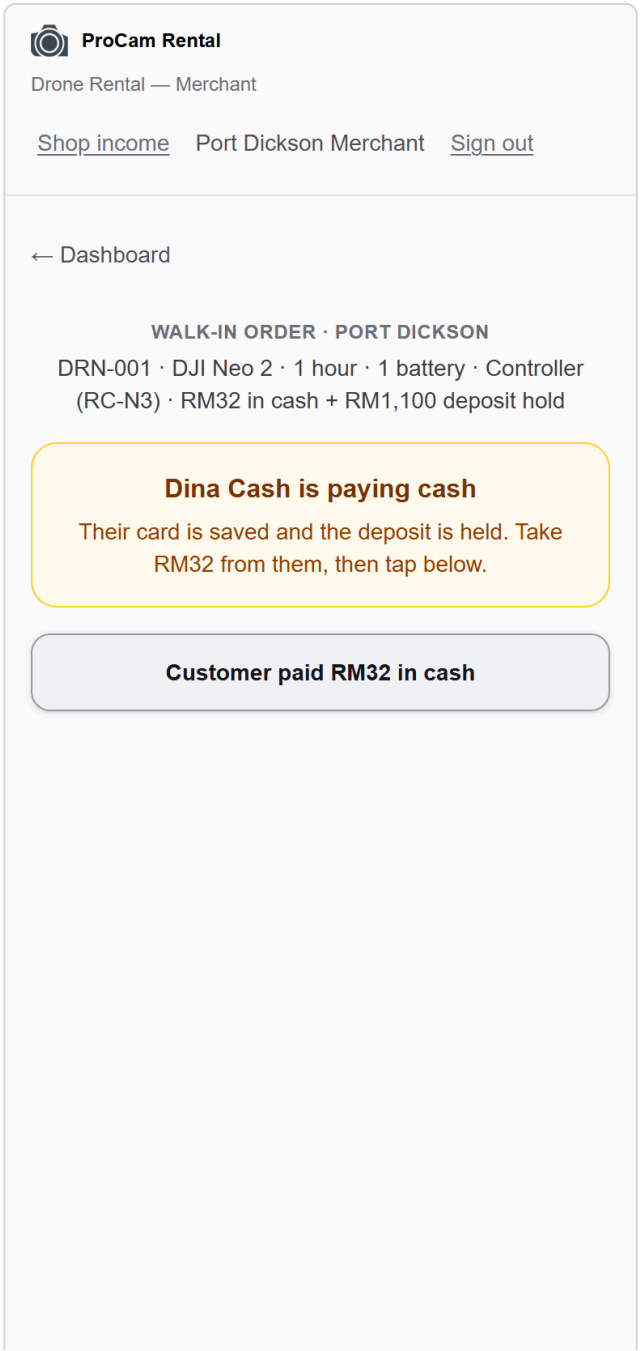

17

WALK-IN BOOKING · STEP 5 OF 9

Or the customer pays cash

If they choose cash on their phone, they still enter their card for the deposit. Take the cash, then tap Customer paid in cash.

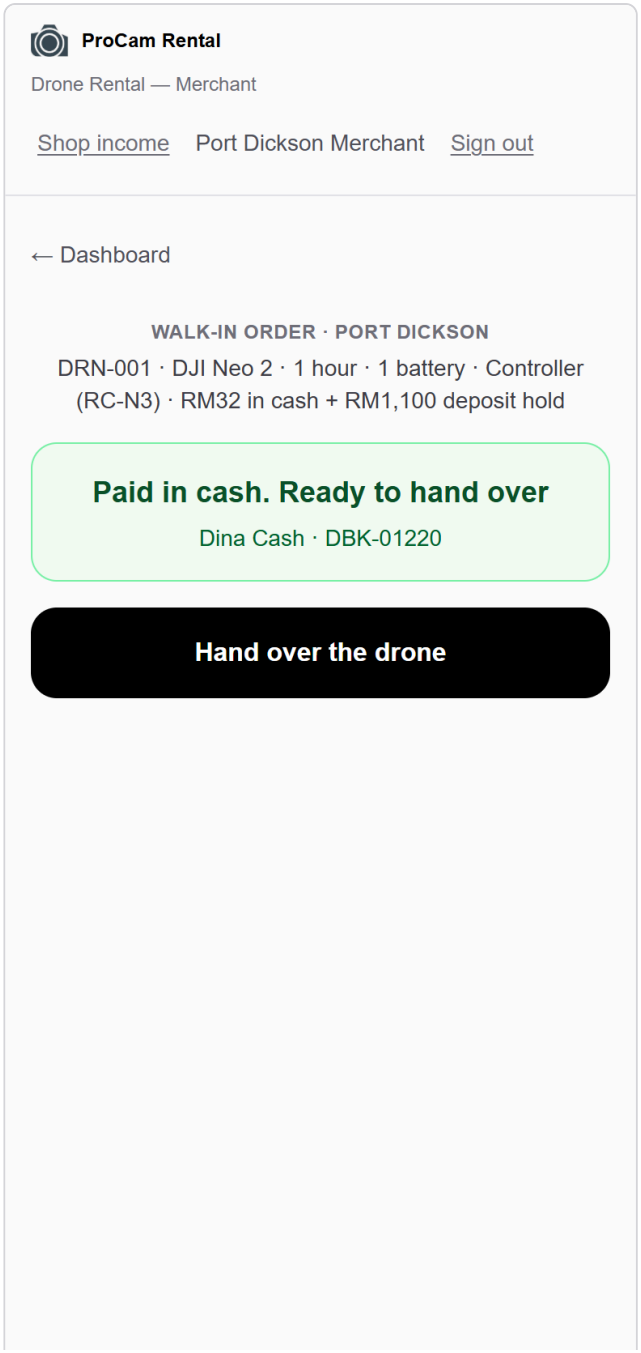

18

WALK-IN BOOKING · STEP 6 OF 9

Cash taken

It now says Paid in cash. Tap Hand over the drone, then do the handover steps of the online booking (what goes out, the photos, the checklist and the customer's name), exactly the same.

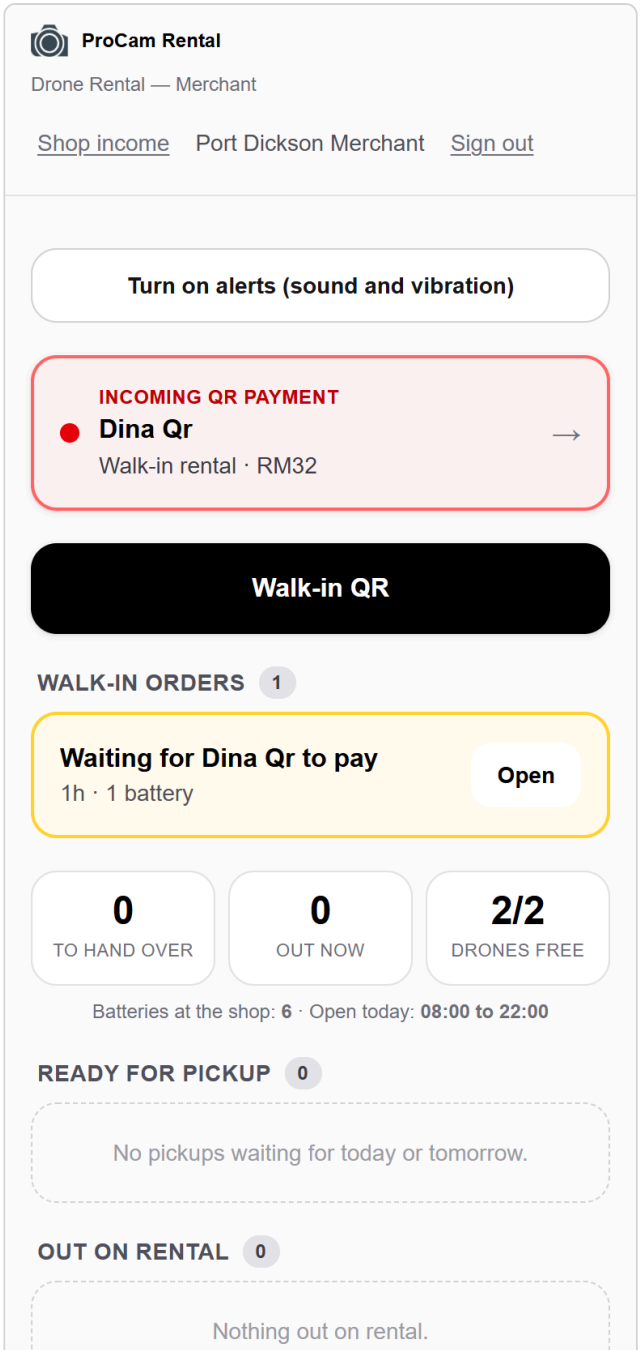

19

WALK-IN BOOKING · STEP 7 OF 9

Or the customer pays by QR: Incoming QR payment

When a customer chooses Pay by QR, they enter their card for the deposit, then scan the QR on their own phone and pay. A red Incoming QR payment appears at the top of your dashboard (with a beep if alerts are on). It stays there until you deal with it. Tap it.

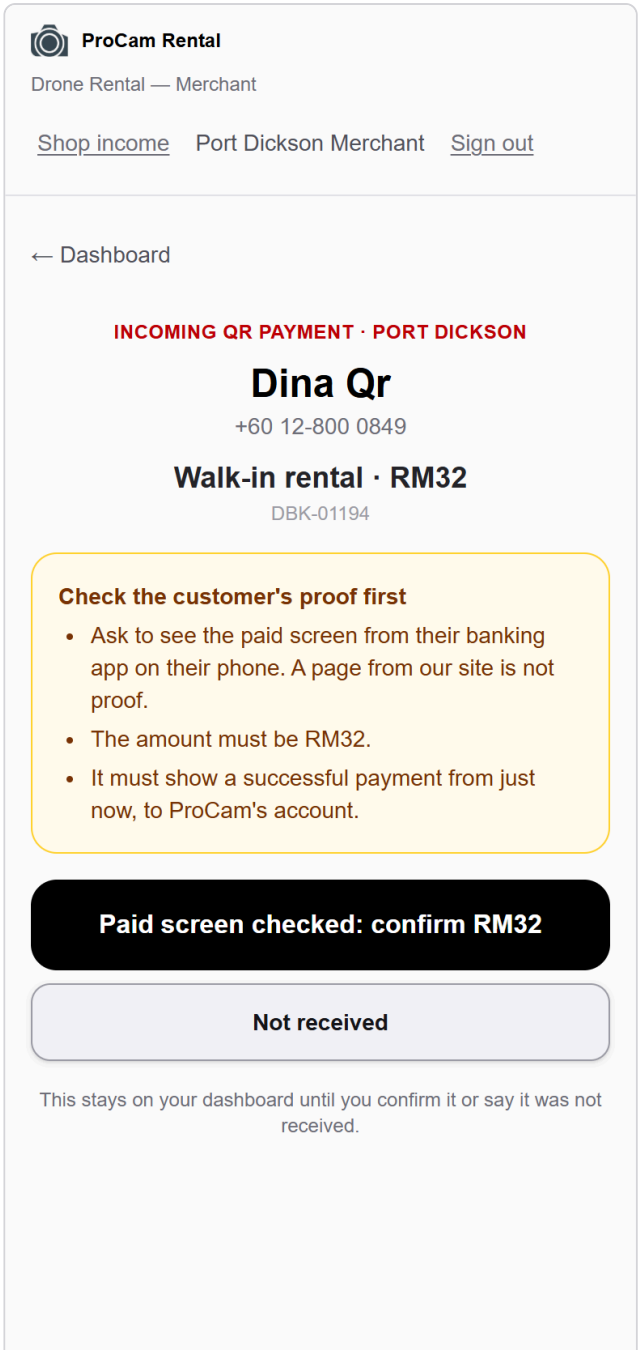

20

WALK-IN BOOKING · STEP 8 OF 9

Check their proof, then confirm

Ask the customer to show the paid screen from their banking app (not a page from our site). Check the amount, that it just went through, and that it is to ProCam. Only then tap Paid screen checked: confirm. If the money is not there, tap Not received: the order is cancelled and the deposit hold is released.

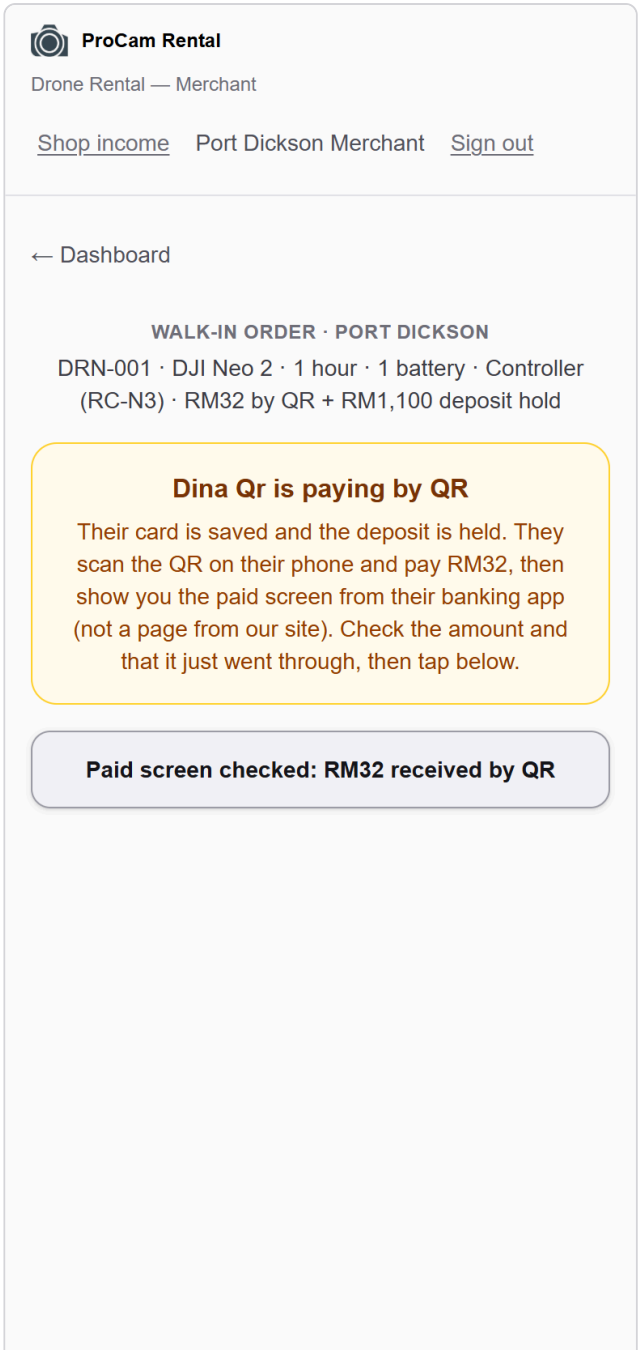

21

WALK-IN BOOKING · STEP 9 OF 9

QR payment confirmed

It now says Paid by QR. Tap Hand over the drone, then do the handover steps of the online booking, exactly the same.

Battery swap

A customer on a rental swaps their batteries at your shop. They show their swap QR, you scan it, hand over fresh batteries and take the swap fee.

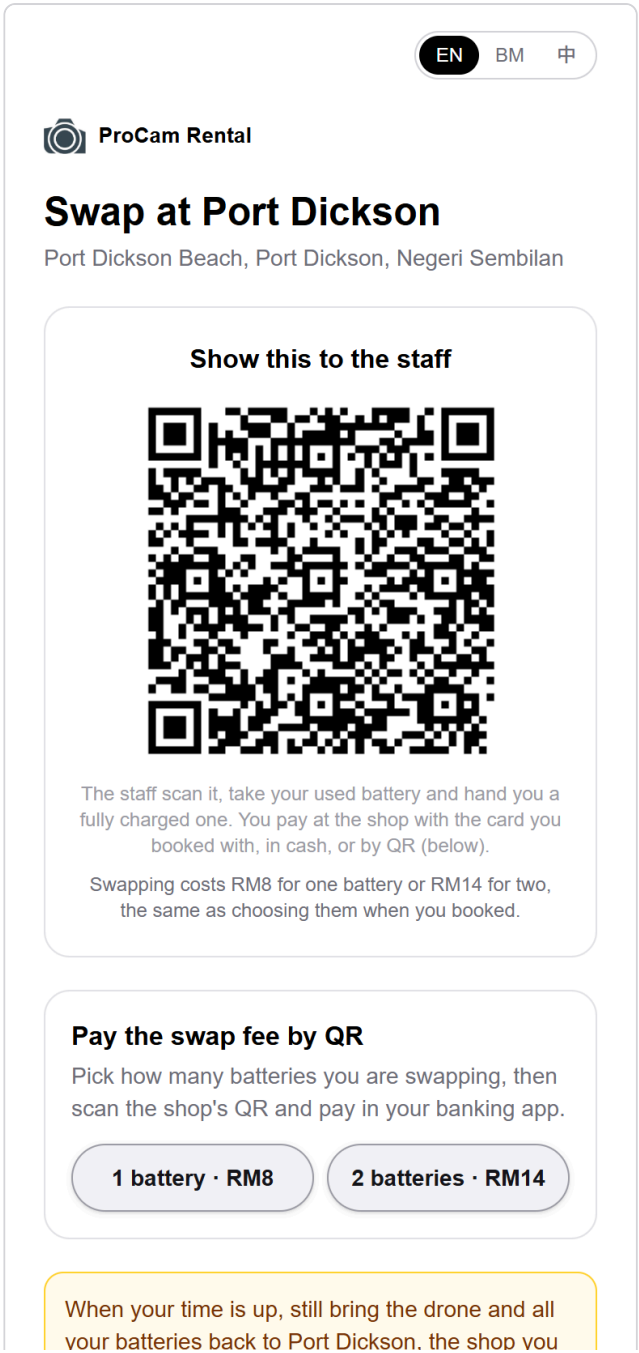

6 screens

22

BATTERY SWAP · STEP 1 OF 6

Their swap QR: this is what you scan

A customer whose battery is finished taps Battery finished? Swap it at any shop on their phone, picks your shop and shows you this QR. They still bring the drone and all the batteries back to the shop they rented from.

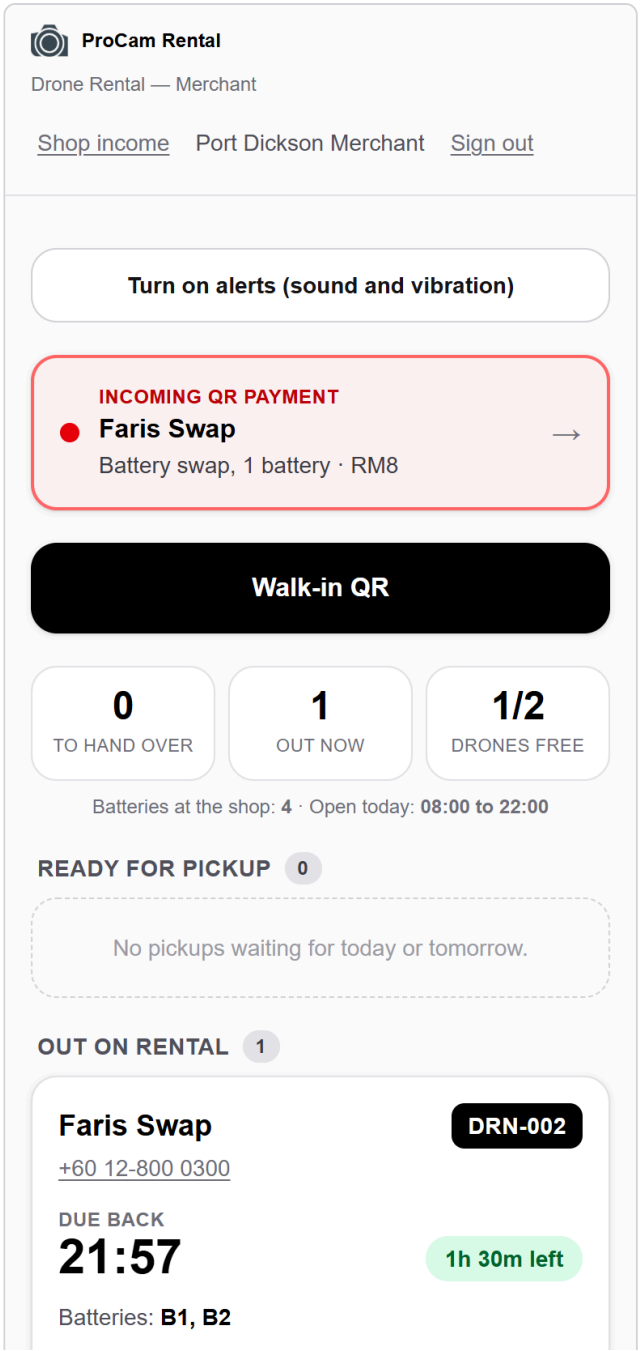

23

BATTERY SWAP · STEP 2 OF 6

A swap paid by QR: Incoming QR payment

A customer can pay the swap fee by QR on their phone. You get the same red Incoming QR payment, saying Battery swap and how many batteries. It stays until you resolve it. Tap it, check their paid screen, then confirm, exactly as for a walk-in.

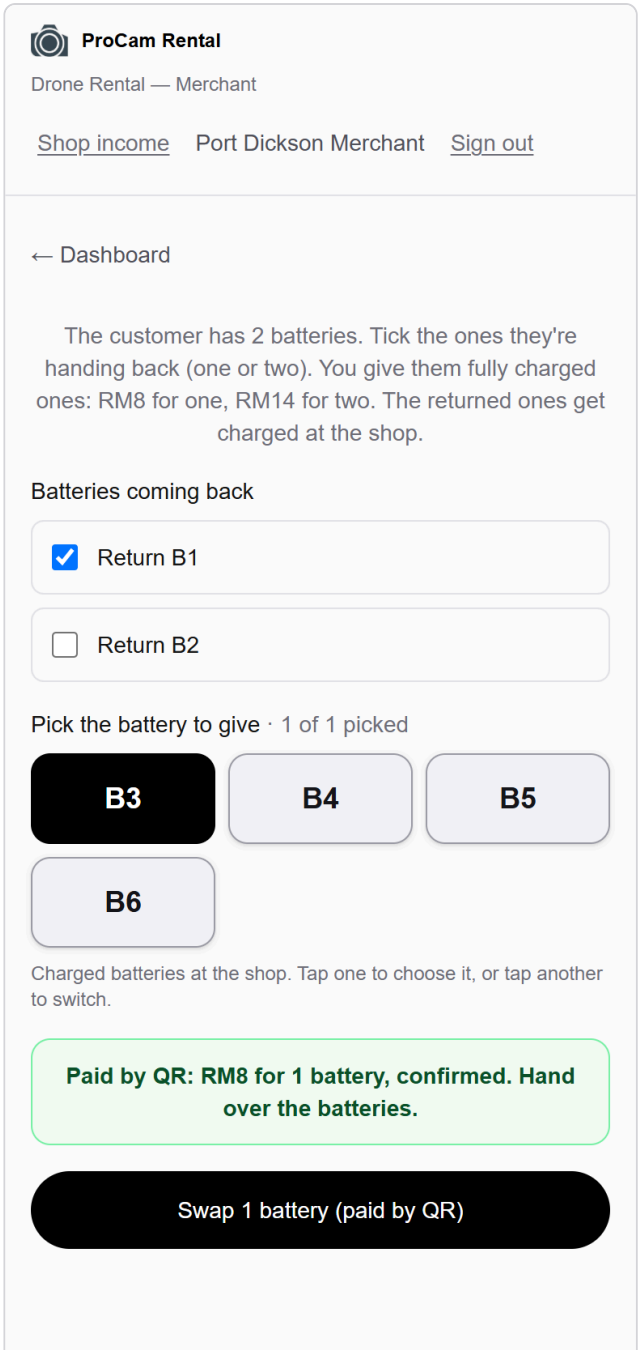

24

BATTERY SWAP · STEP 3 OF 6

Confirmed: hand over the batteries

After you confirm, the swap screen opens already marked Paid by QR, with the right number of batteries picked and no payment choice. Hand over the charged batteries and tap Swap. If you leave before that, a green notice stays on your dashboard until the batteries are handed over.

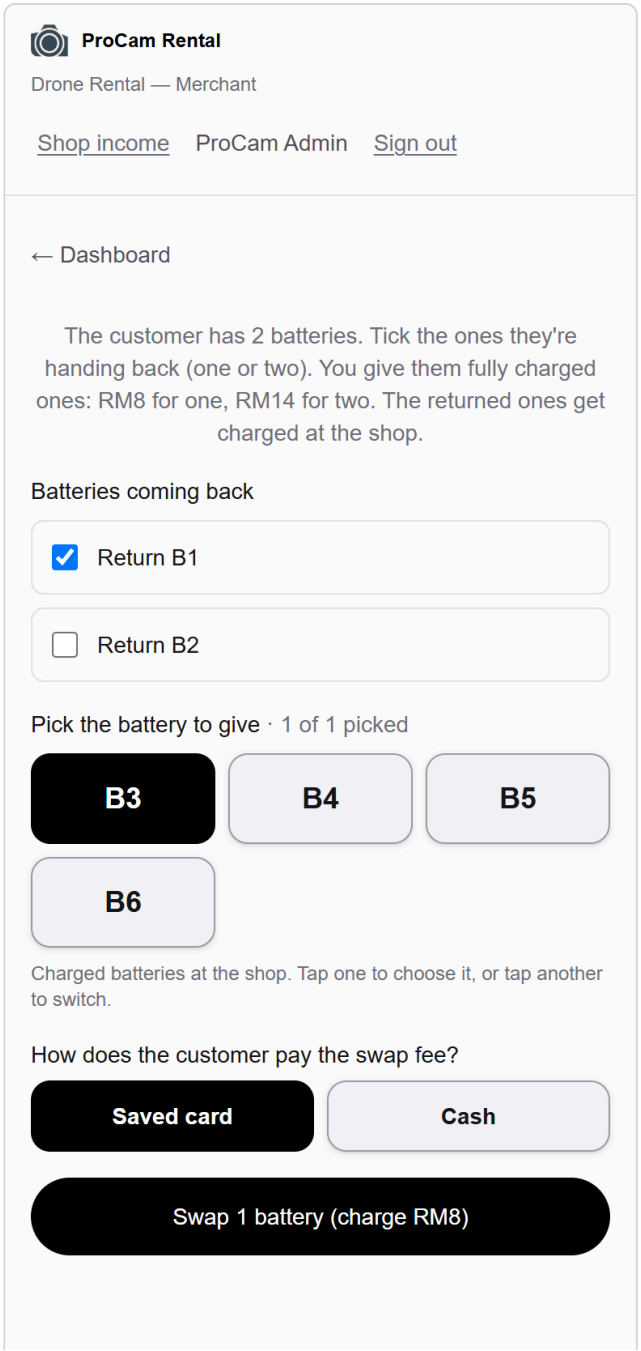

25

BATTERY SWAP · STEP 4 OF 6

Scan the QR to swap

Scanning that QR opens the swap screen for their rental. If they rented at another shop it says so. Tick the battery they hand back, give them a fully charged one from your shelf, and take the payment (card on file or cash). Their used battery simply stays with you: all the batteries are the same. The swap fee goes to your shop's income.

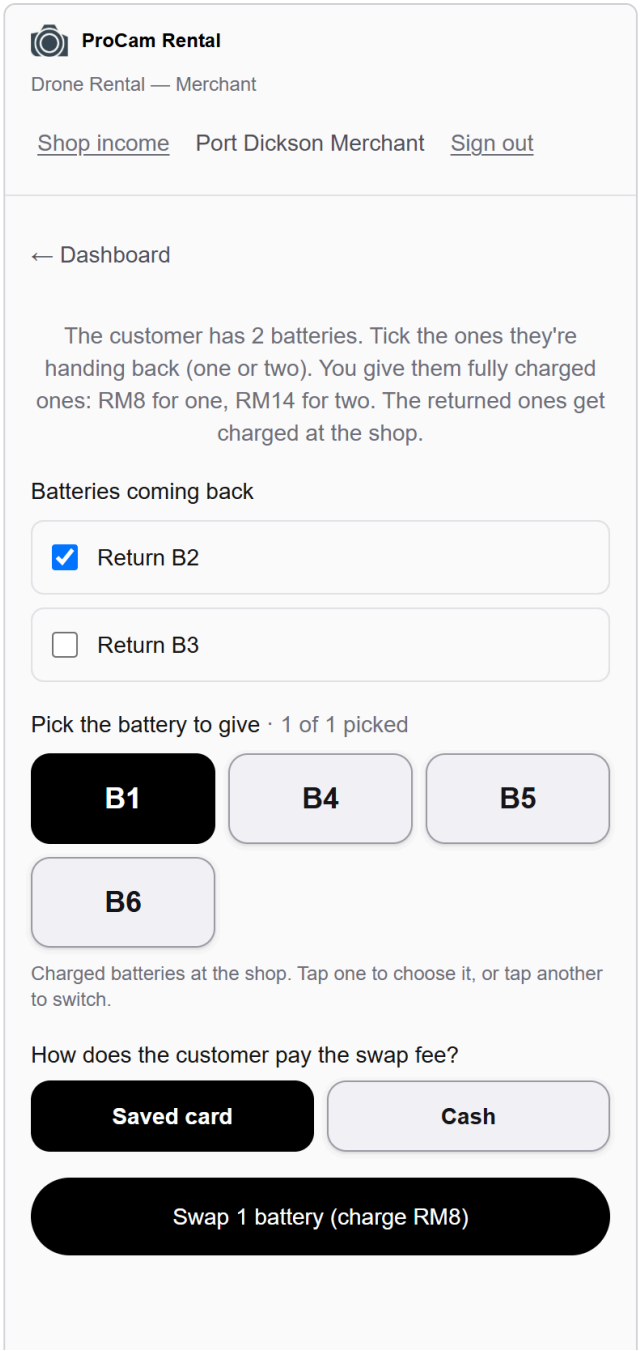

26

BATTERY SWAP · STEP 5 OF 6

Swapping for your own customer

Tap Battery swap. Tick the batteries they hand back, then tap the same number of charged batteries to give them. The fee is shown on the button (RM8 for one battery, RM14 for two).

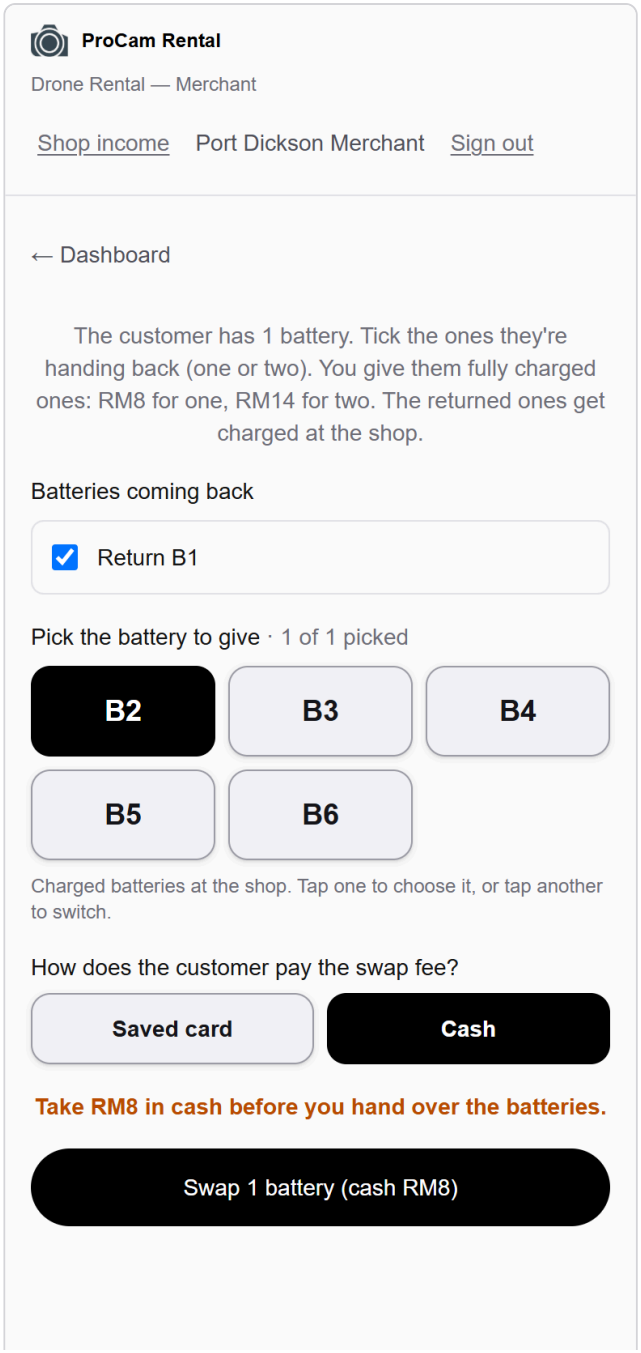

27

BATTERY SWAP · STEP 6 OF 6

How they pay for the swap

Choose Saved card (charged for you) or Cash. If it's cash, take the money before you hand over the batteries. This is separate from how they paid the rental.

Check income

What your shop has earned, and how it is worked out. Bookings that came from a flyer have a 45 / 45 / 10 split instead of 50 / 50.

1 screens

28

CHECK INCOME · STEP 1 OF 1

Check Shop income

Tap Shop income at the top of any page. Your earnings this month are at the top, with how they are worked out: costs come off what customers paid, and what is left is the Profit after costs, split 50% you and 50% ProCam. The Flyer place line is always there: on a booking that came from a flyer it is 45% you, 45% ProCam and 10% to the flyer place. Tap the i next to a line to see what it is. Below is the sales analysis. On that page the same link turns into Home.
