ProCam customer guide: how to rent a drone

How a customer checks the price, picks a location, books, pays, collects, flies, swaps a battery at any shop and returns a ProCam drone, in the order they do it, and how to walk in and pay by card, cash or QR. Screens are from the app on a phone.

Part 1 · Find out the price	4 screens
Part 2 · Book and pay	17 screens
Part 3 · Collect it, fly it, swap a battery	7 screens
Part 4 · No booking: walk in at a shop	7 screens
Part 5 · Other languages, and help	6 screens

Part 1 · Find out the price

You don't need an account for any of this. The home page shows the drones, what they cost and how it works.

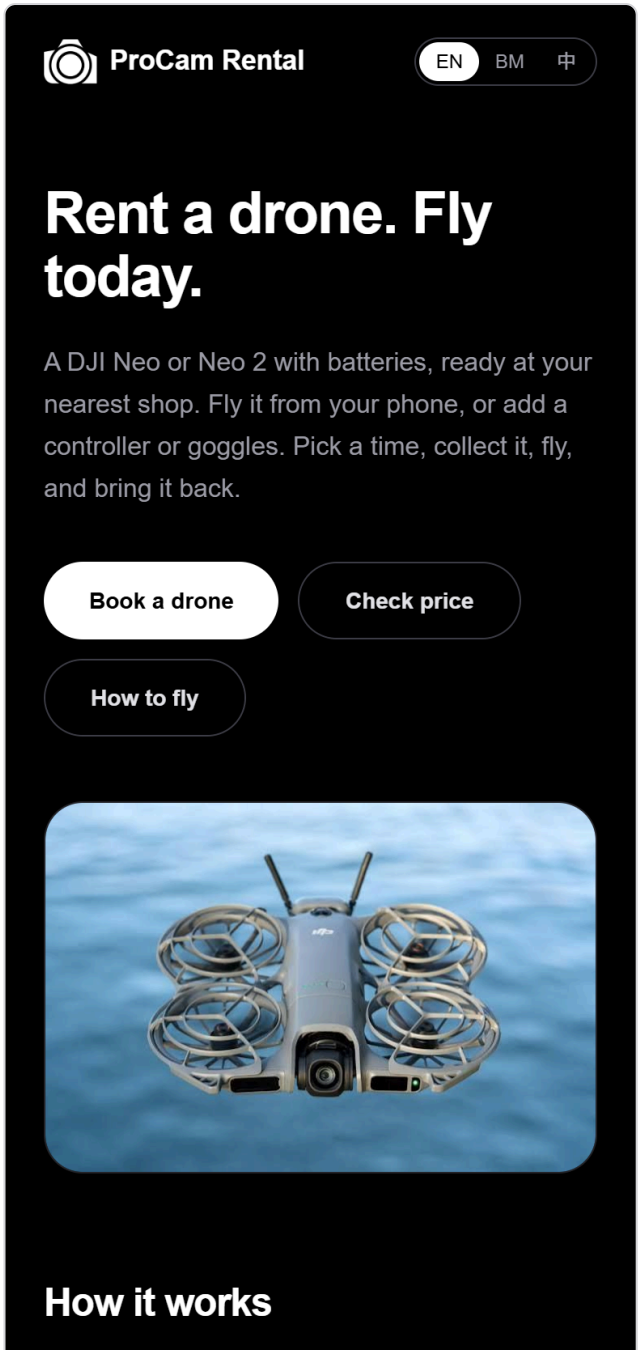

4 screens

1

PART 1 · STEP 1 OF 4

The home page

Book a drone or Check price at the top, then How it works (four steps, the last one for a flat battery), the Check the price section, the two comparison tables, and the three rules of the kit. The three-letter switch at the top of every page changes the language: EN, BM (Bahasa Melayu) or 中 (Chinese).

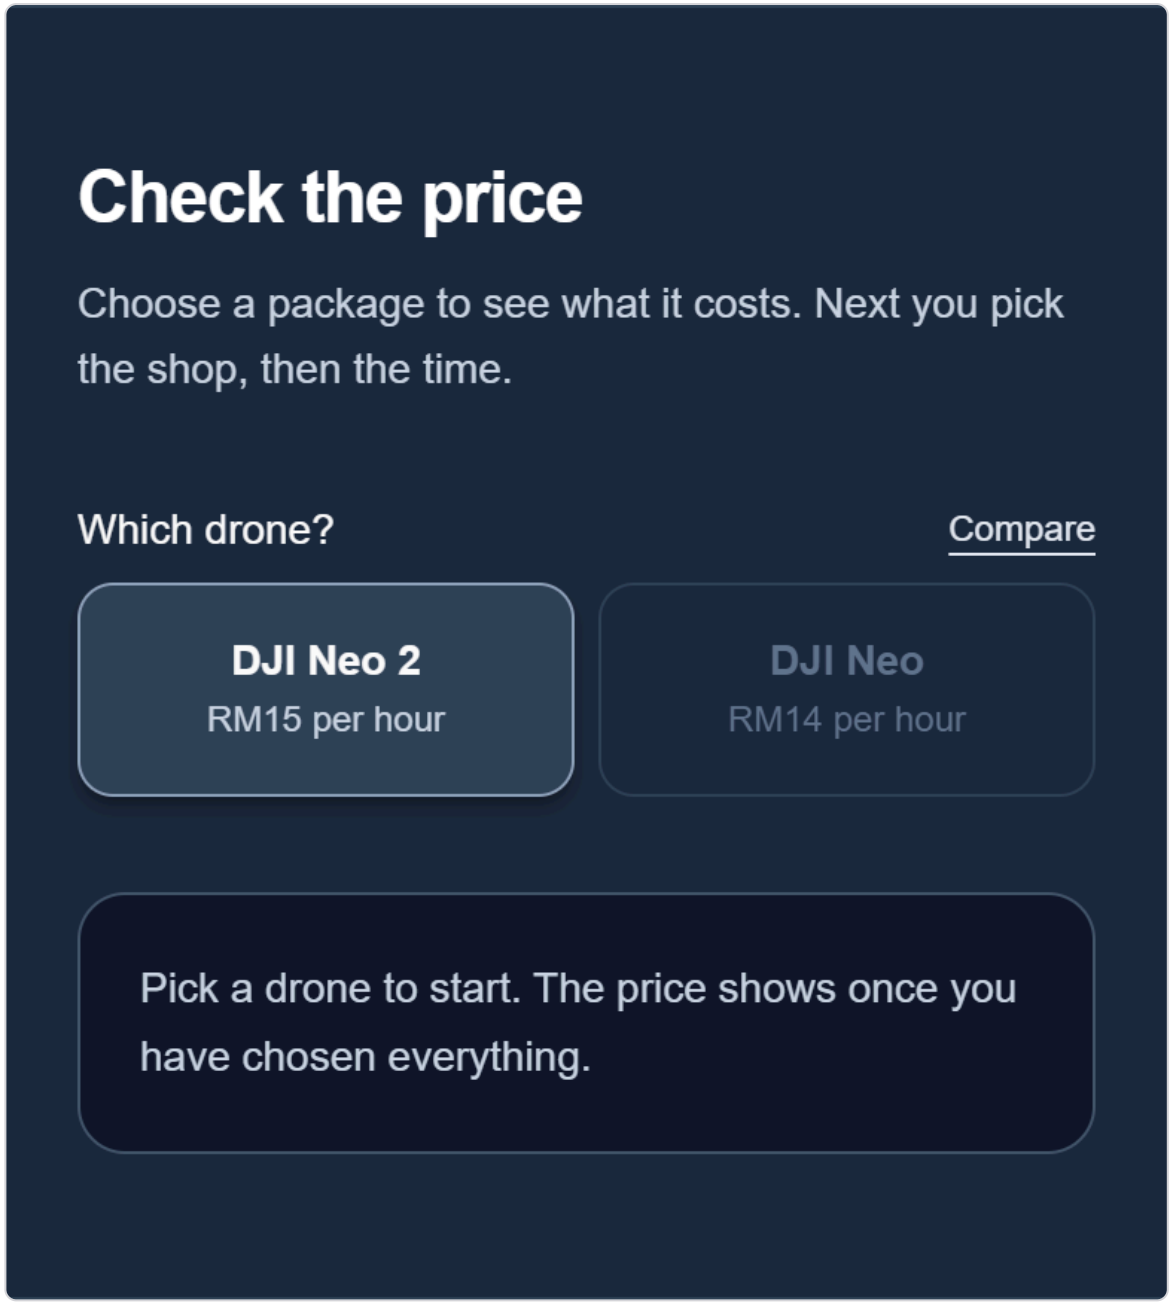

2

PART 1 · STEP 2 OF 4

Check the price

Choose a drone, how you will fly it (your own phone, or the controller (RC-N3)), then Hour or Day, and for how long. By the hour you also choose how many batteries. A drone or way of flying we do not have right now is greyed out and says Not available right now, but you can still read about it in the comparison. Once everything is chosen you see the picture and the price, with a Choose the location button. Nothing is booked yet.

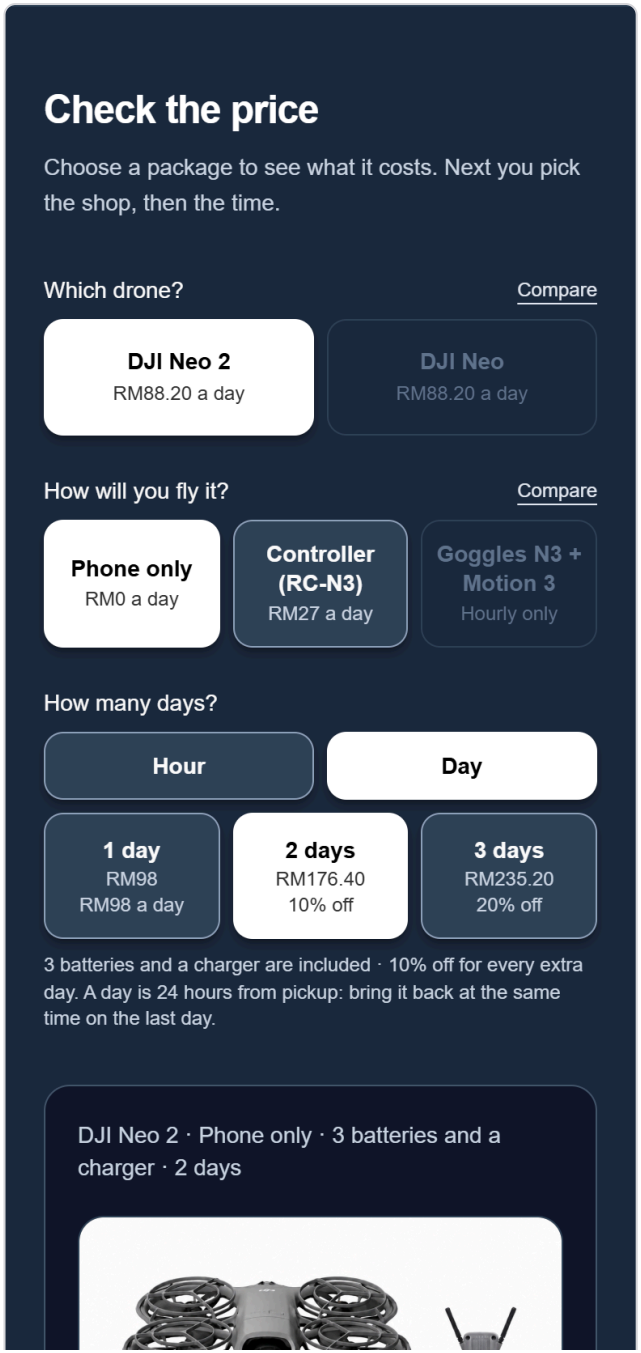

3

PART 1 · STEP 3 OF 4

Renting by the day

Tap Day under How long to see 1, 2 or 3 days. The drone and way of flying cards then show their price a day, with the multi-day discount already in it (for 2 days, RM88.20 a day on your own phone). A day is RM98 with your own phone, or RM128 with the controller (RC-N3), and 3 batteries and a charger are included, so there is no battery question. Every extra day takes 10% off the whole booking (10% off for 2 days, 20% off for 3 days), shown as a line above the total so you can see what you save. A day is 24 hours from pick-up: bring it back at the same time on the last day. The goggles set is hourly only.

4

PART 1 · STEP 4 OF 4

Not sure which one? Compare

Under each comparison table, and beside each choice, you can compare the drones or the ways of flying side by side and pick the one you like. The tables show the prices, the specs and the control range to expect in real use. Choosing one fills it in for you.

DJI Neo or DJI Neo 2

Two drones, same shops. These prices are for flying from your own phone; a controller adds to them (see below). The deposit is only a card hold: it is never deducted from your bank account.

	DJI Neo	DJI Neo 2
PRICE		
1 hour	RM14	RM15
1 battery	RM7	RM8
2 batteries	RM13	RM14
Swap 1 battery at the shop	RM7	RM8
Swap 2 batteries at the shop	RM13	RM14
Late return / hour	RM14	RM15
Deposit, held on the card	RM500	RM600
SPECS		
Weight	135 g	151 g

Part 2 · Book and pay

Pick the shop, then the time, then your details. You pay at the end. A drone is only yours once your payment has gone through: if two people pay for the last drone at the same moment, the first one gets it and the other is refunded in full.

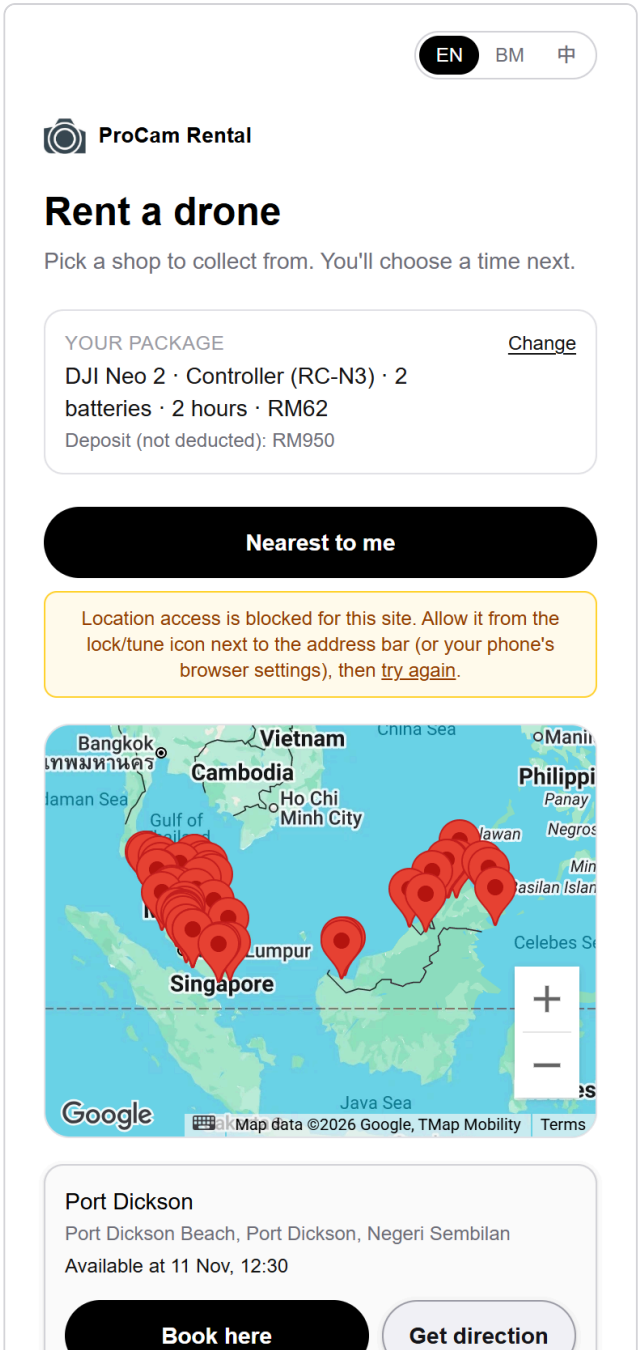

17 screens

5

PART 2 · STEP 1 OF 17

Choose the location

Your package is shown above the locations, with a Change link. Tap Nearest to me, or pick a location on the map or in the list. A location you can rent from shows Book here, and Get direction next to it (it opens Google Maps with the way there). Tap Book here to carry on.

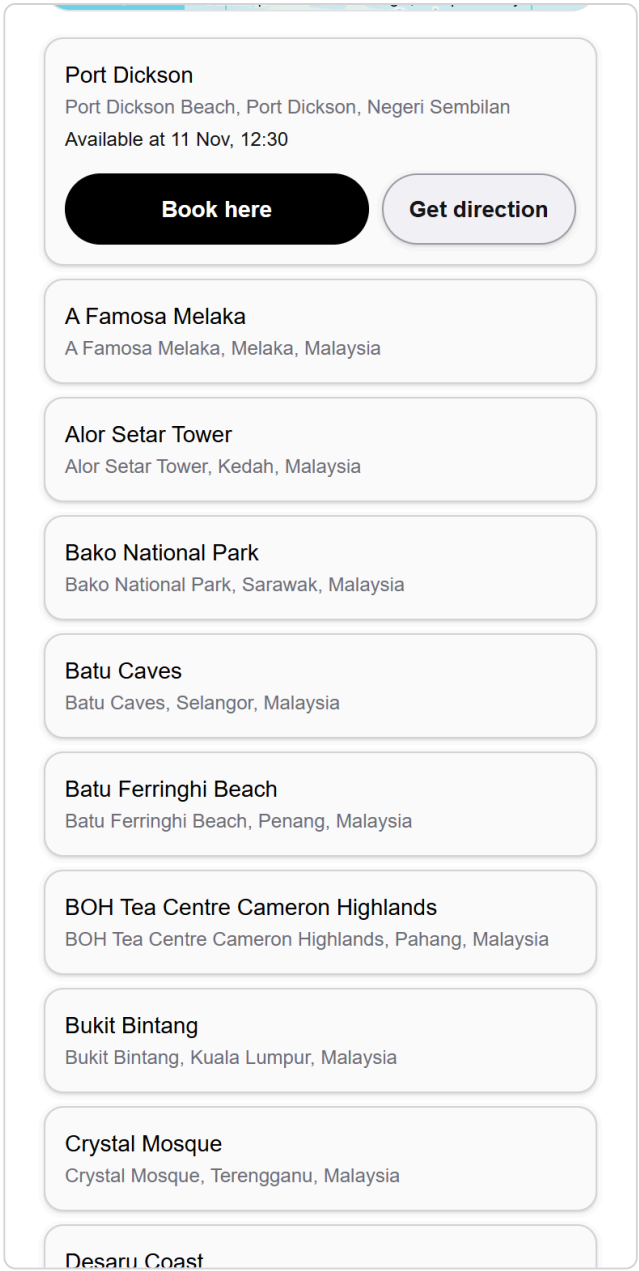

6

PART 2 · STEP 2 OF 17

Book here, or Check Rates

Every location is on the list, and you can tap any of them. A location that is too far from you for a rental right now shows Too Far, which you cannot tap, and Check Rates. Check Rates opens the same page, so you can see the drones, the prices and the deposit there, without a way to book.

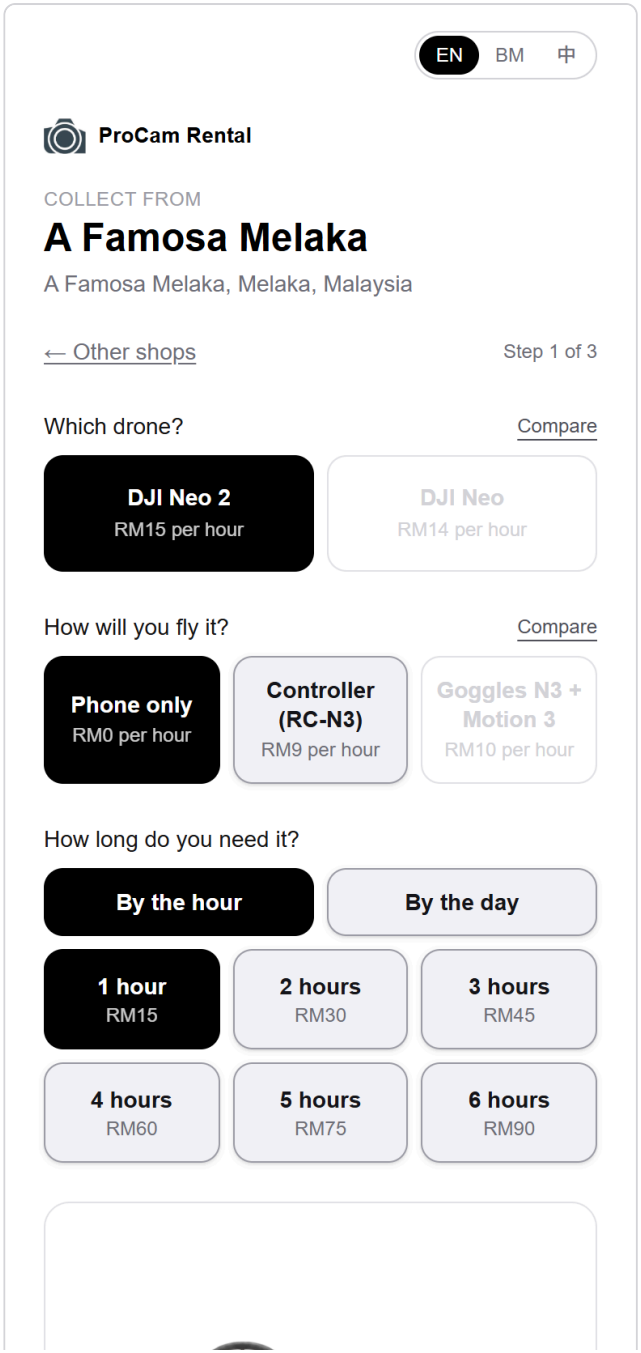

7

PART 2 · STEP 3 OF 17

Check Rates

The same booking page, with the drones, how to fly them, the lengths, the batteries, the price and the deposit, so you can work out what a rental costs. It has no button to carry on to a time.

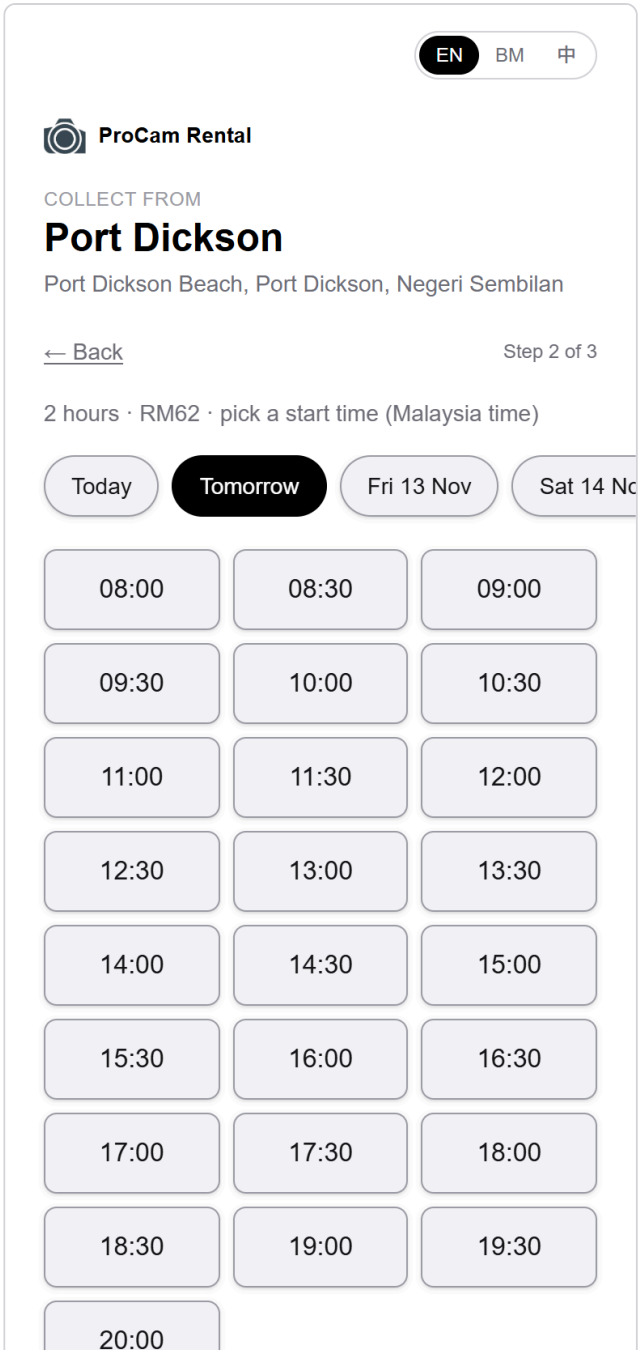

8

PART 2 · STEP 4 OF 17

Pick a day and a time

The booking page opens at the times with your package already chosen. Times are every 30 minutes, in Malaysia time, and a rental has to finish before the shop closes. Times that are taken, or too windy to fly, are greyed out. Tap a start time and the whole rental lights up, from the start to the end, with the two times written under the grid. Back takes you to the package step if you want to change something.

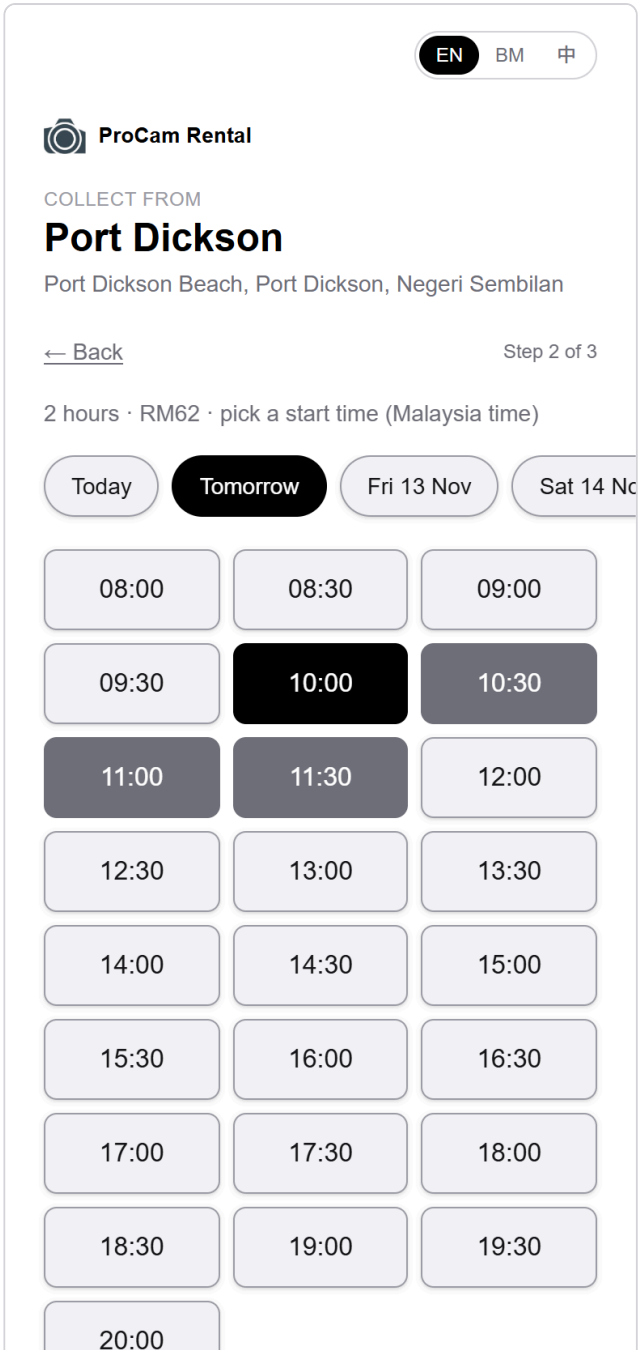

9

PART 2 · STEP 5 OF 17

The whole rental lights up

When you tap a start time, every half hour of the rental lights up with it, and the start and end time are written under the grid, so you can see exactly when you have the drone. Times where no drone is free are greyed out.

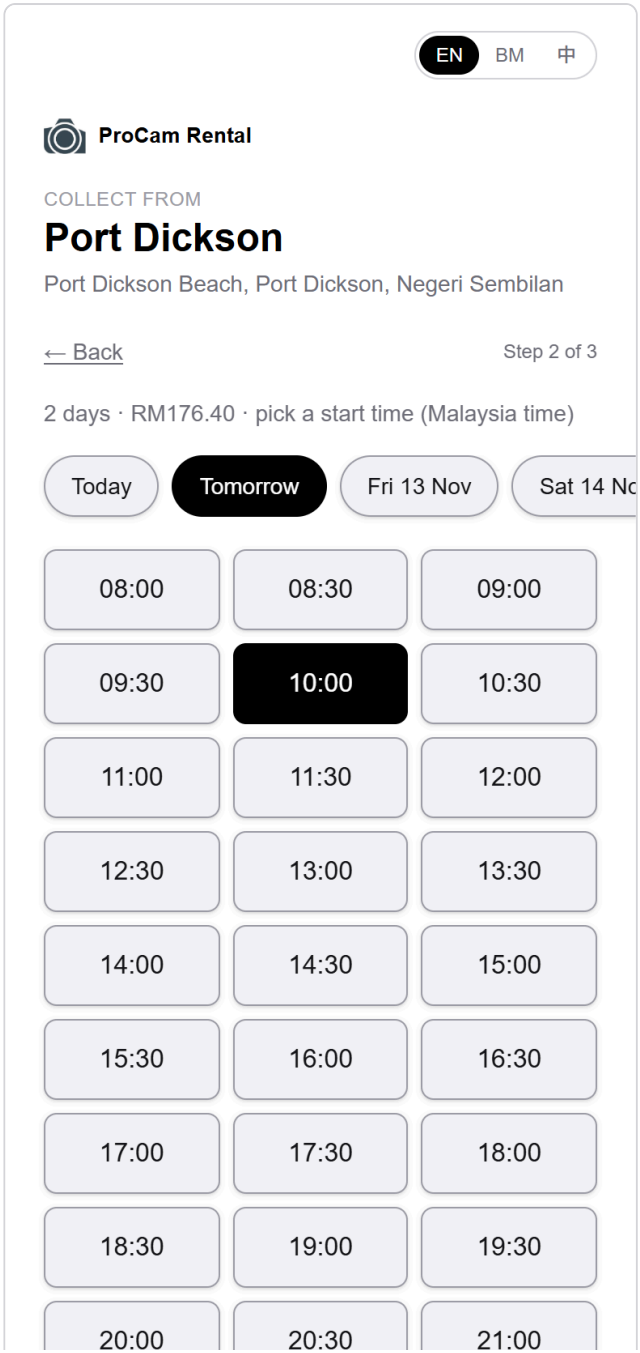

10

PART 2 · STEP 6 OF 17

By the day: pick the pick-up time

For a rental by the day you only pick when to collect. The grid shows the pick-up times, and under it Return by shows the exact time you have to be back: 24 hours for each day (here, 2 days from 10:00 on the 1st is 10:00 on the 3rd). Choose the time and tap Continue.

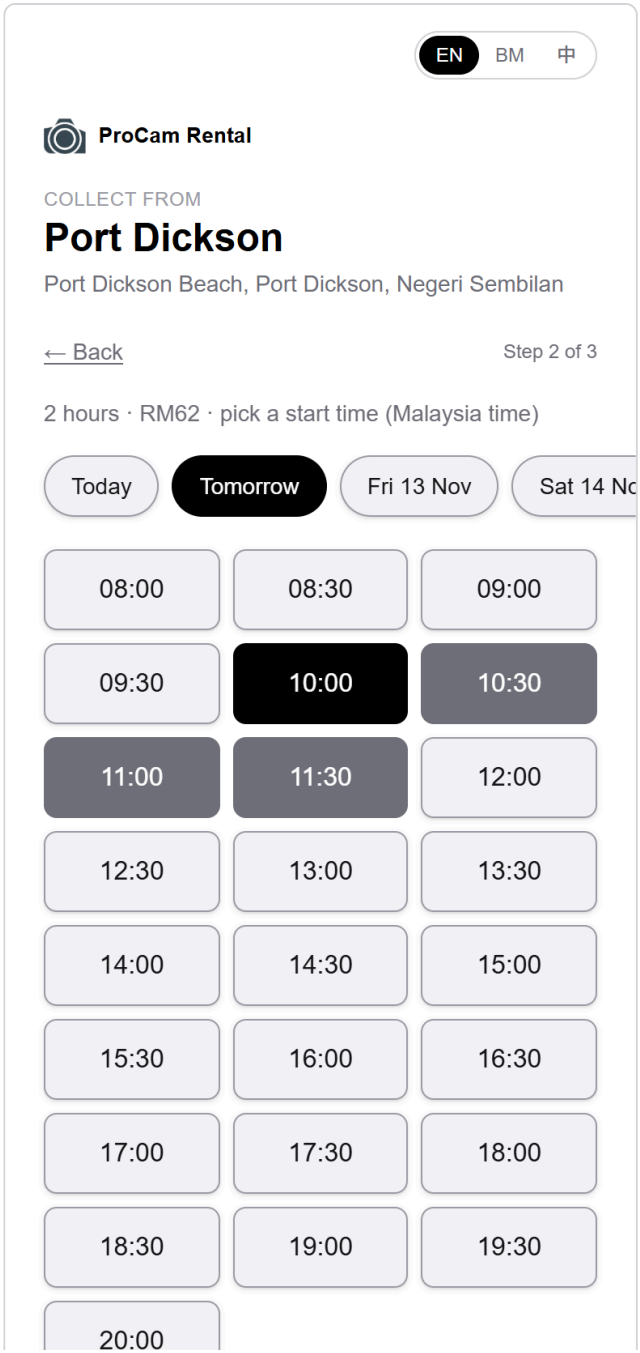

11

PART 2 · STEP 7 OF 17

Compare before you choose

On the booking page, Compare beside the drone or the way of flying shows just the comparison table, with a Choose this button under each column. A drone or controller the shop does not have is greyed out and says Not at this shop.

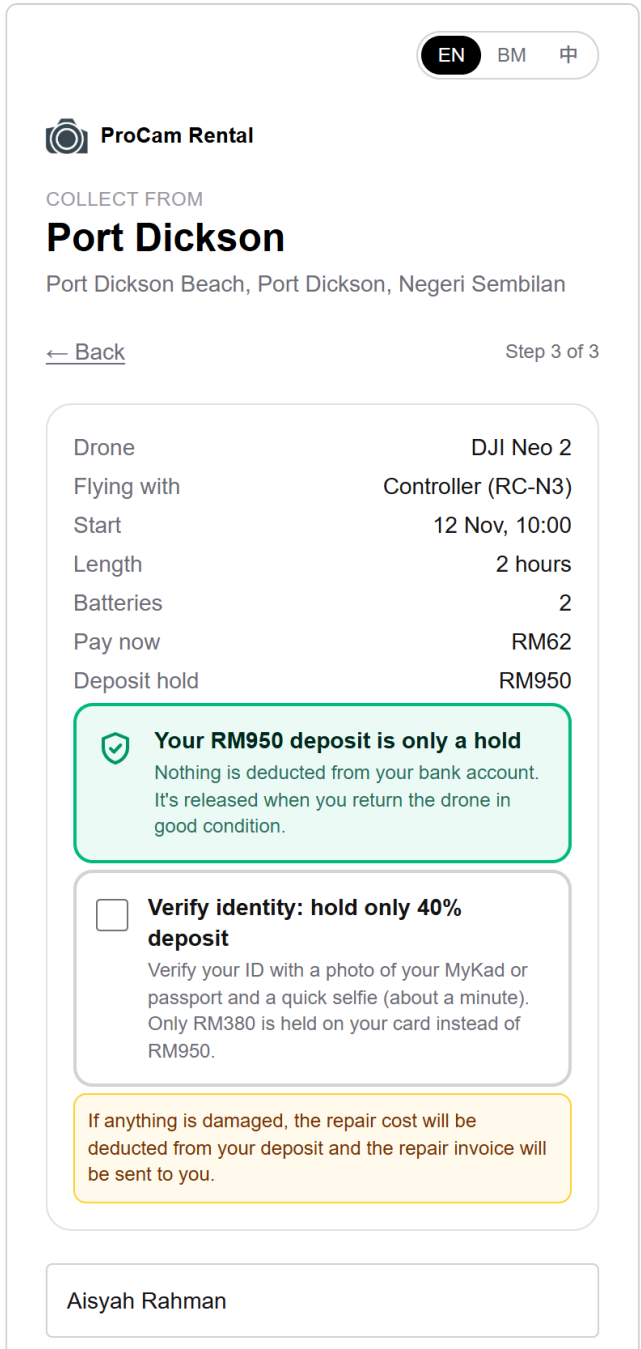

12

PART 2 · STEP 8 OF 17

Your details

Your name, phone number and email. Add a WhatsApp number if you want the confirmation, reminders and how to swap a battery on WhatsApp. Leave it empty and we text your phone number instead. You can reply STOP any time.

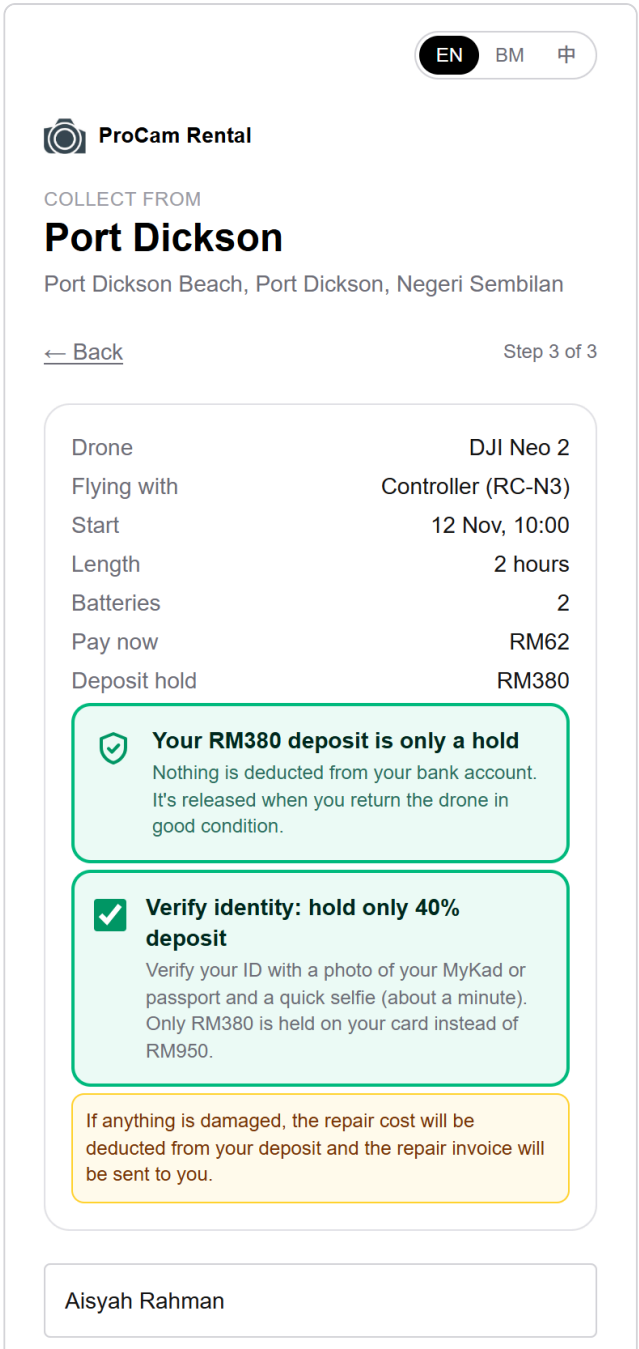

13

PART 2 · STEP 9 OF 17

Verify identity: hold only 40% deposit

Under the deposit note you can tick Verify identity. Do the check with a photo of your MyKad or passport and a quick selfie (about a minute), and only 40% of the deposit is held on your card: here RM380 instead of RM950. Leave it unticked and the full deposit is held. Either way the deposit is only a hold, never a charge.

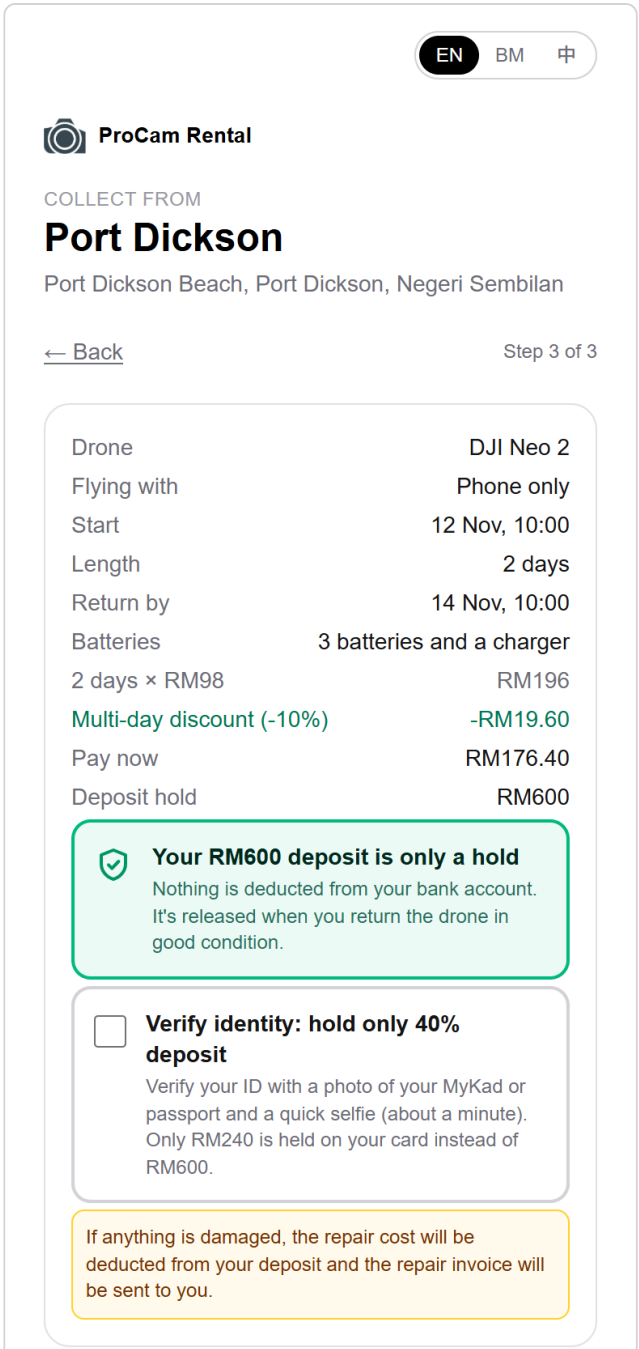

14

PART 2 · STEP 10 OF 17

Your details, with the discount shown

By the day, the summary lists 3 batteries and a charger, the Return by time, and the price lines: 2 days × RM98, then the multi-day discount (-10%) in green, so the total you pay now is clear before you pay. The deposit hold is the same as for an hourly rental.

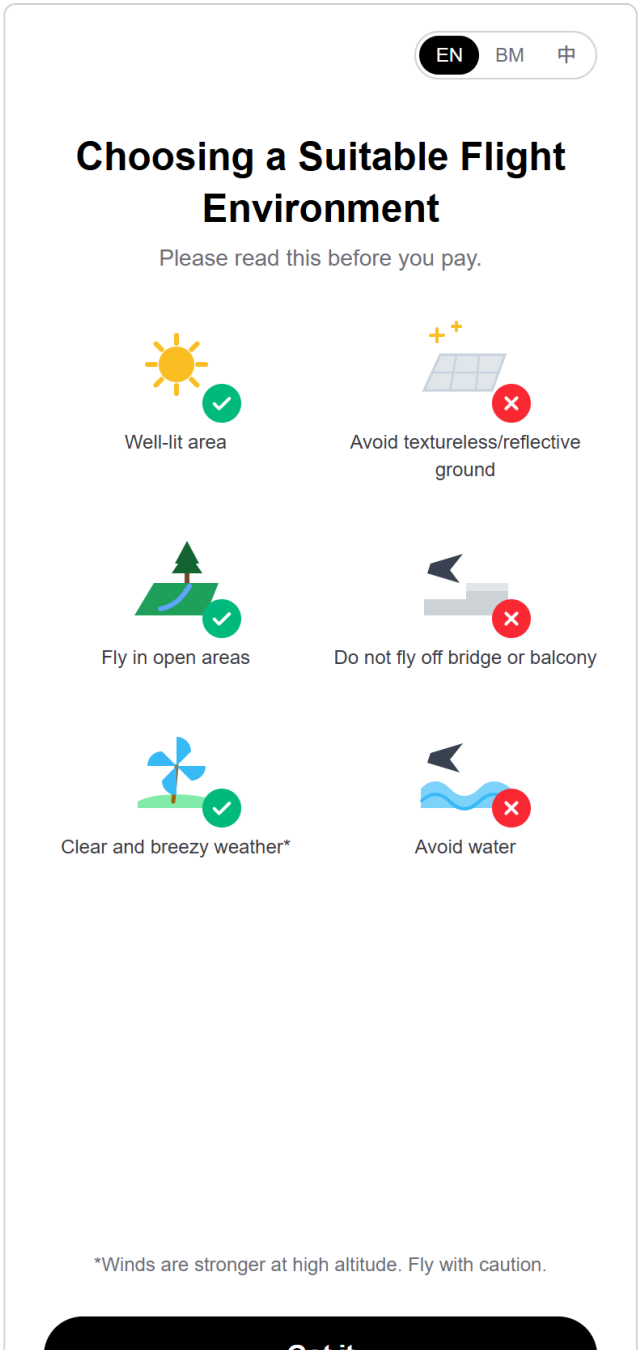

15

PART 2 · STEP 11 OF 17

Before you pay: where to fly

Before the payment page you see where it is safe to fly. Fine: a well-lit area, open areas, clear and breezy weather. Avoid: textureless or reflective ground, flying off a bridge or balcony, and water. Winds are stronger at high altitude, so fly with caution. Tap Got it to carry on to the payment.

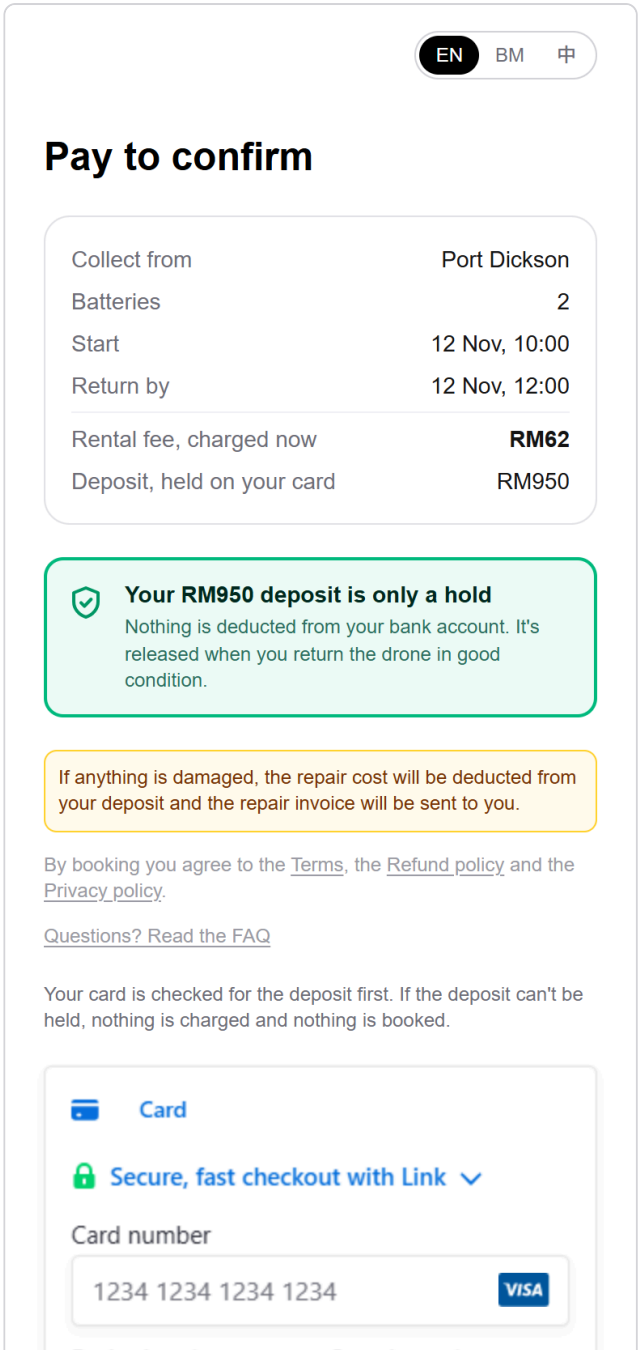

16

PART 2 · STEP 12 OF 17

Pay

The summary shows what you pay now and the deposit, which is only a hold on your card and not a charge. You can pay by card here. The deposit is checked first: if it can't be held on your card, nothing is charged and nothing is booked.

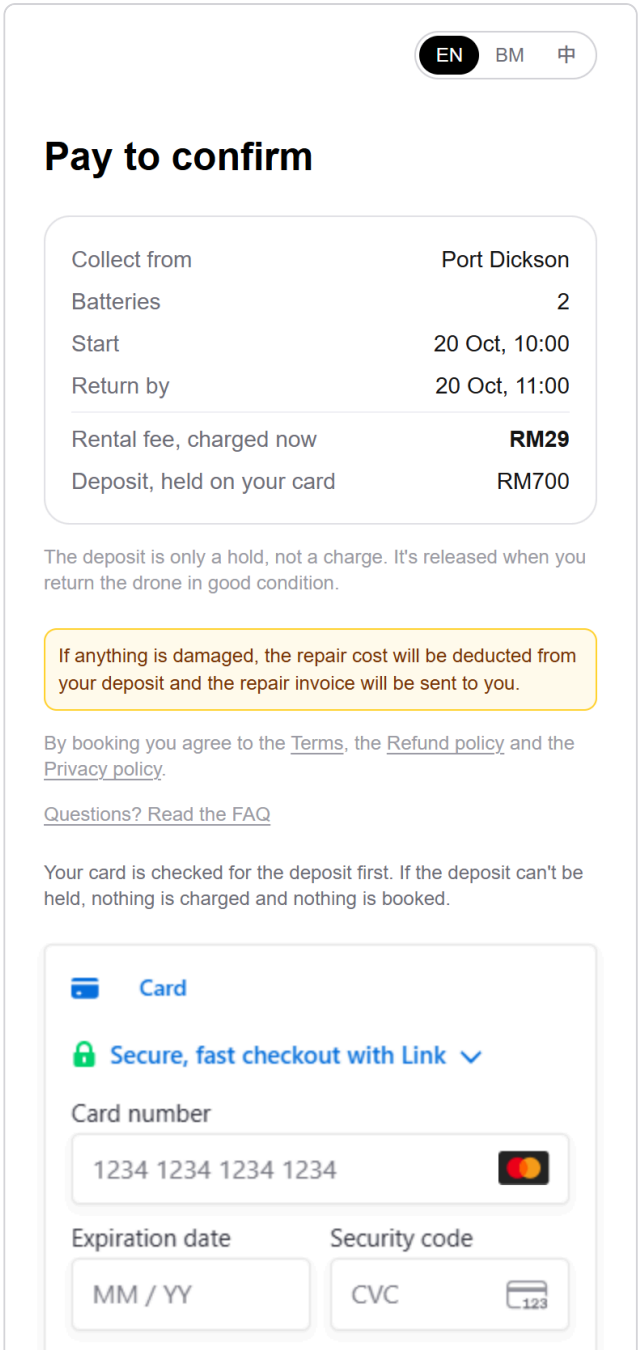

17

PART 2 · STEP 13 OF 17

Your card

The card form is Stripe's own, so ProCam never sees your card number. The button holds the deposit on your card first. Only when that has worked is the rental fee charged. If the deposit can't be held, nothing is charged and nothing is booked, and you can try again or use another card.

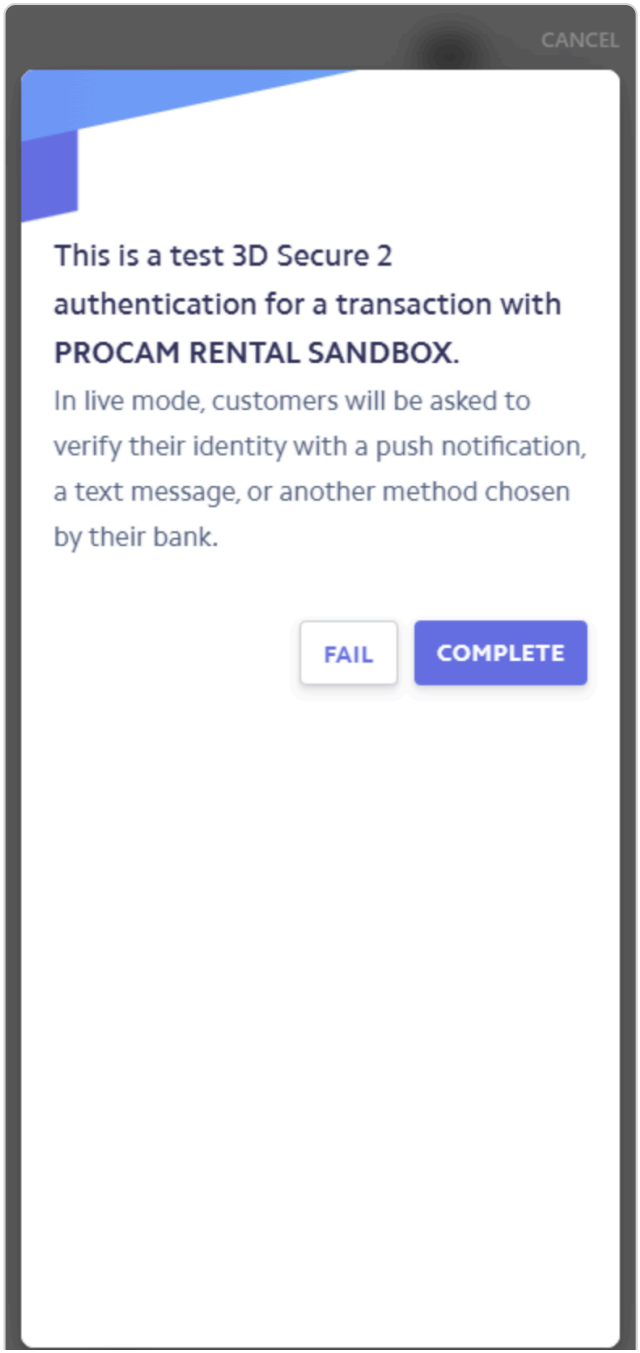

18

PART 2 · STEP 14 OF 17

If your bank asks

Some banks ask you to approve the payment in their app or with a code. Follow the bank's steps and you come straight back to your booking.

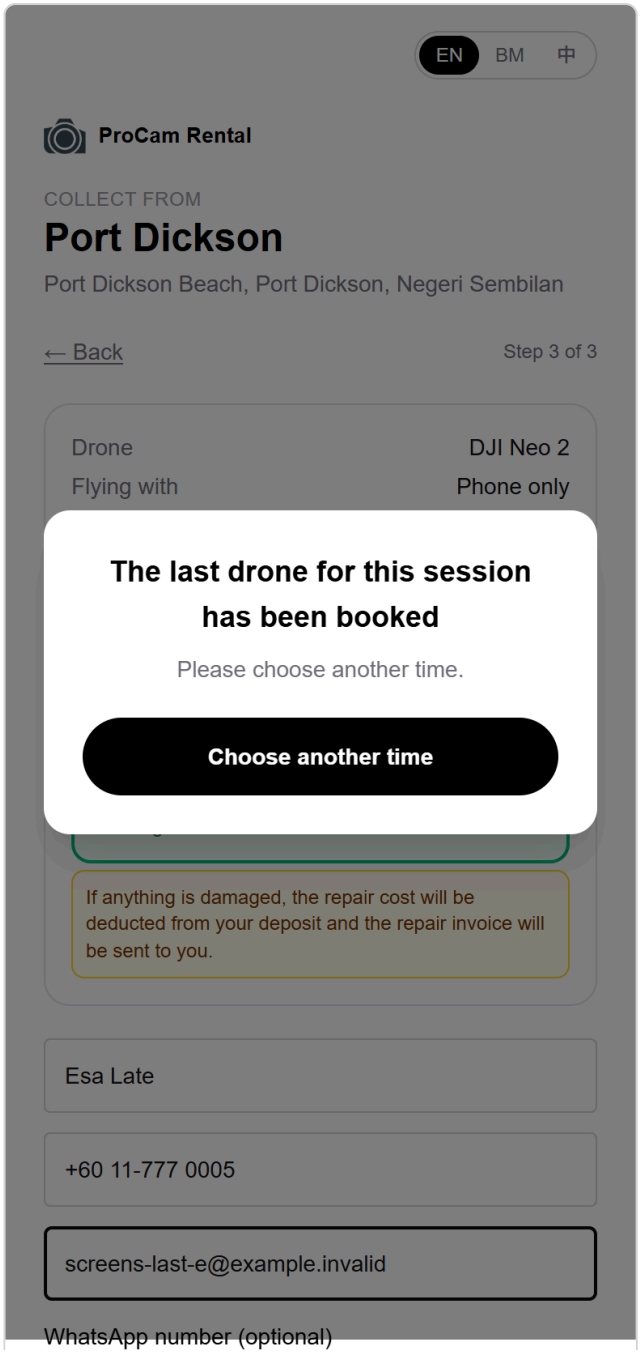

19

PART 2 · STEP 15 OF 17

If someone else got the last drone

If another customer paid for the last drone first, you see this message and are not charged (a payment that went through at the same moment is refunded in full). Choose another time and everything you typed is still there.

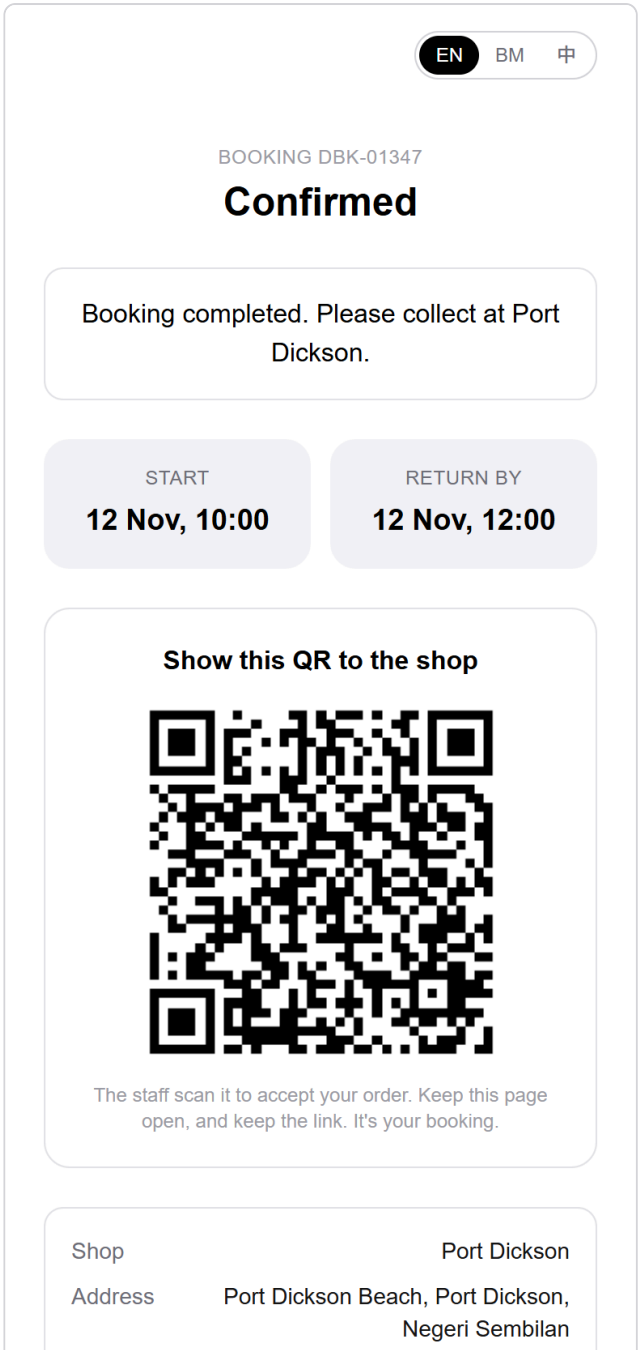

20

PART 2 · STEP 16 OF 17

You are booked

Your booking page shows the start and return times and a QR code. Show this page to the staff at the shop. If you ticked the WhatsApp box you also get the confirmation there.

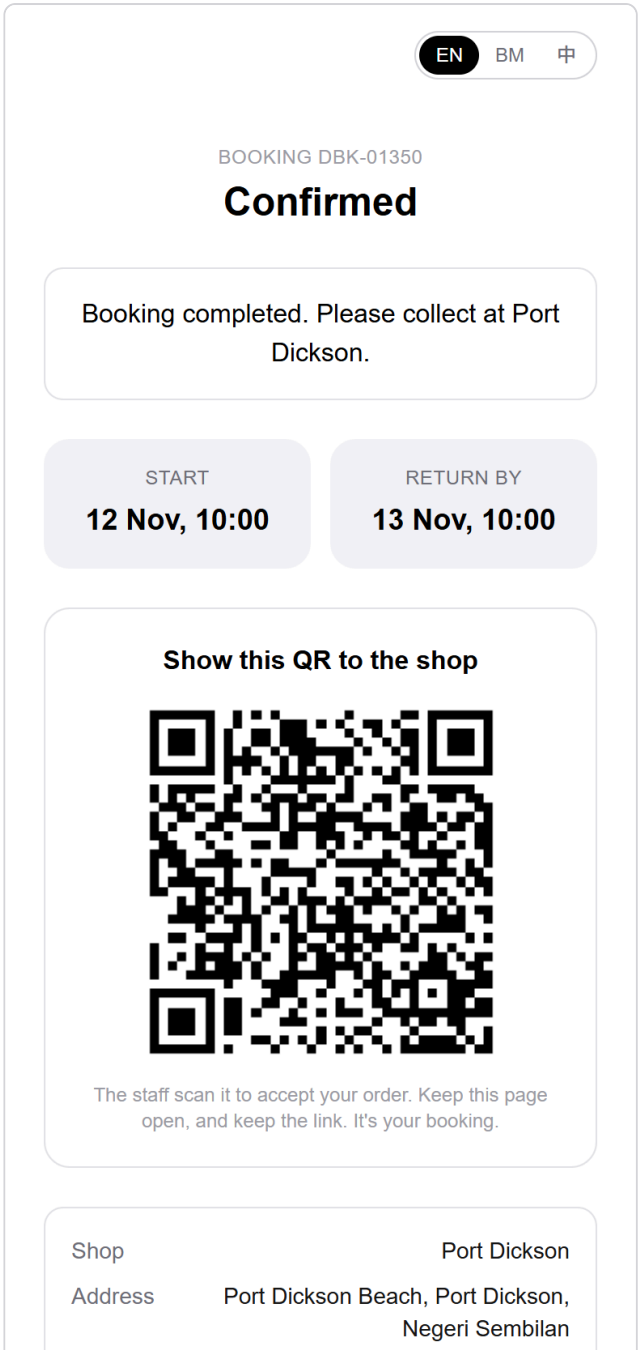

21

PART 2 · STEP 17 OF 17

A booking by the day

Same page for a booking by the day: the start and return times (here, one day apart), the QR for the shop, and what is included: the drone, 3 batteries and a charger (and the controller if you chose the RC-N3). Bring it all back at the return time.

Part 3 · Collect it, fly it, swap a battery

Bring your MyKad or passport: the staff check it against your booking. The staff check the drone, batteries and accessories with you and take photos; they do the same when you return it.

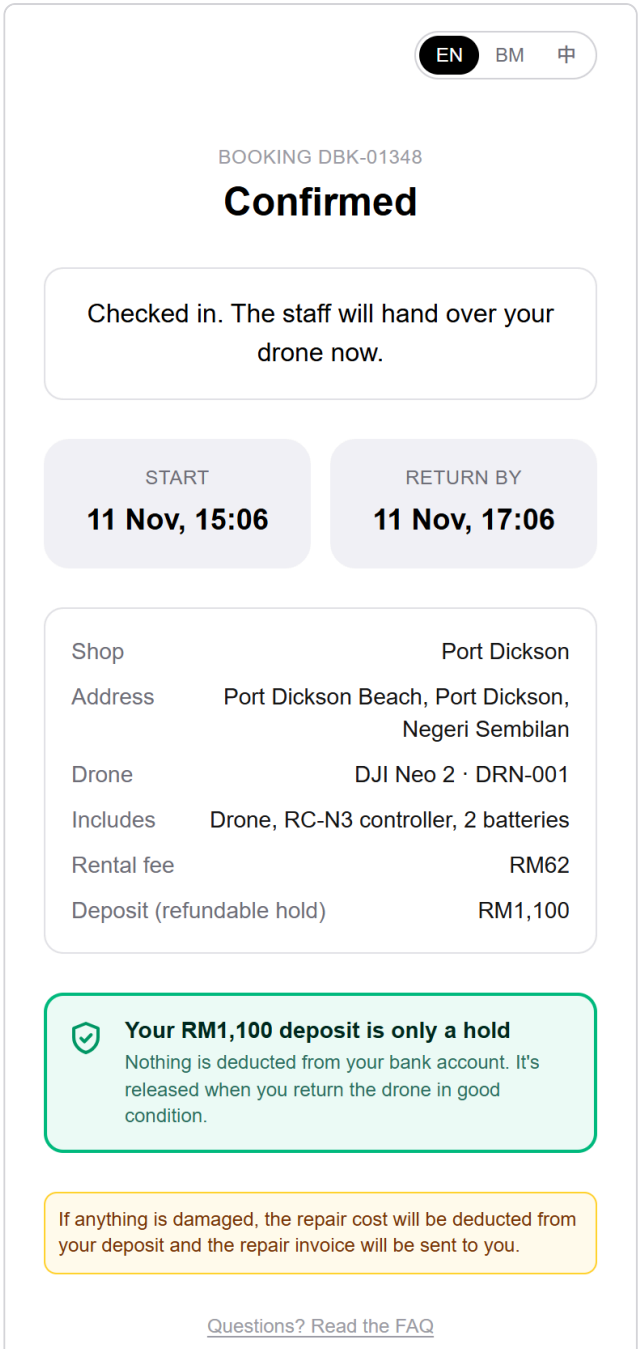

7 screens

22

PART 3 · STEP 1 OF 7

After the staff accept

When the staff scan your QR, the QR disappears and your page says Checked in. They will hand over your drone now.

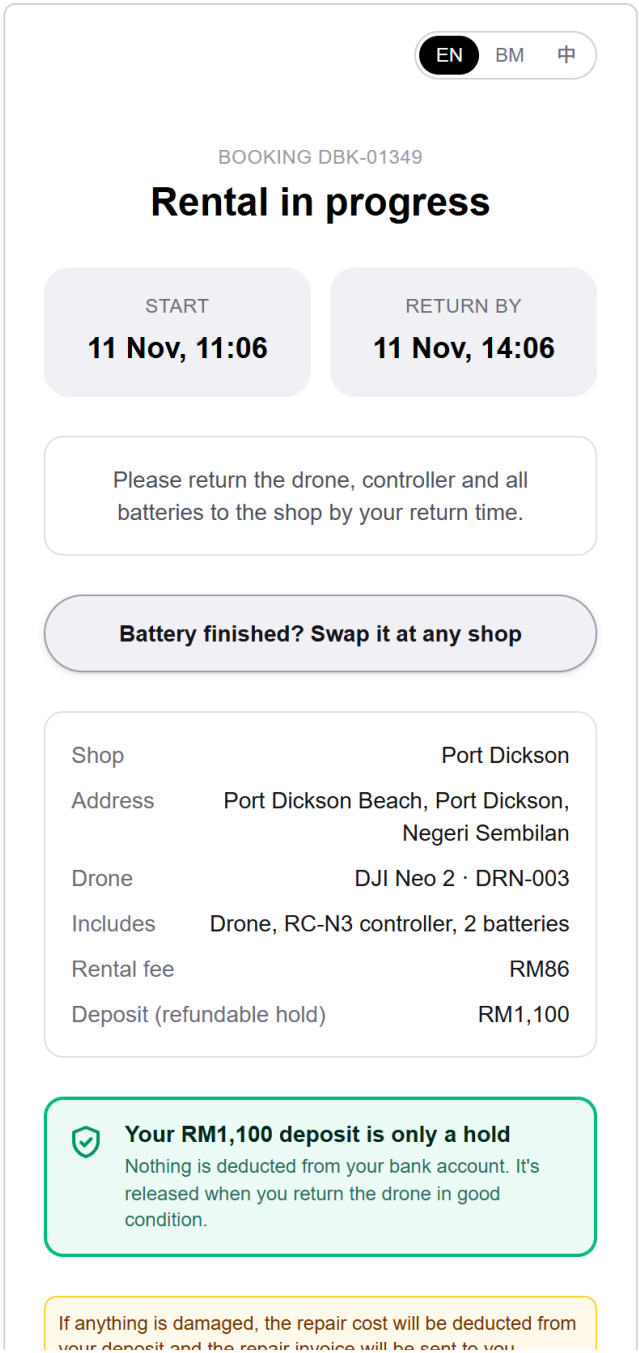

23

PART 3 · STEP 2 OF 7

While the drone is out

Your booking page shows when you have to return it. If a battery is finished, tap Battery finished? Swap it at any shop.

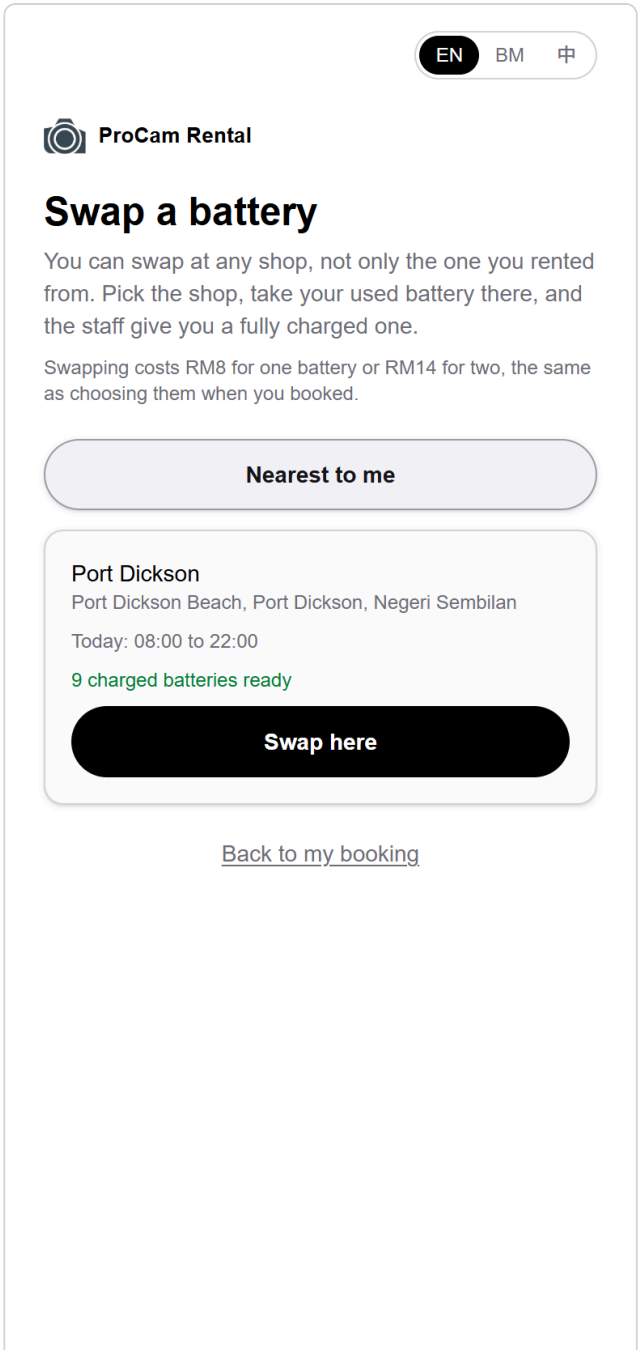

24

PART 3 · STEP 3 OF 7

Swap at any shop

You can swap at any of our shops. The list shows today's hours and how many charged batteries each shop has; a shop that is closed cannot be chosen. A swap costs the same as choosing batteries when you booked.

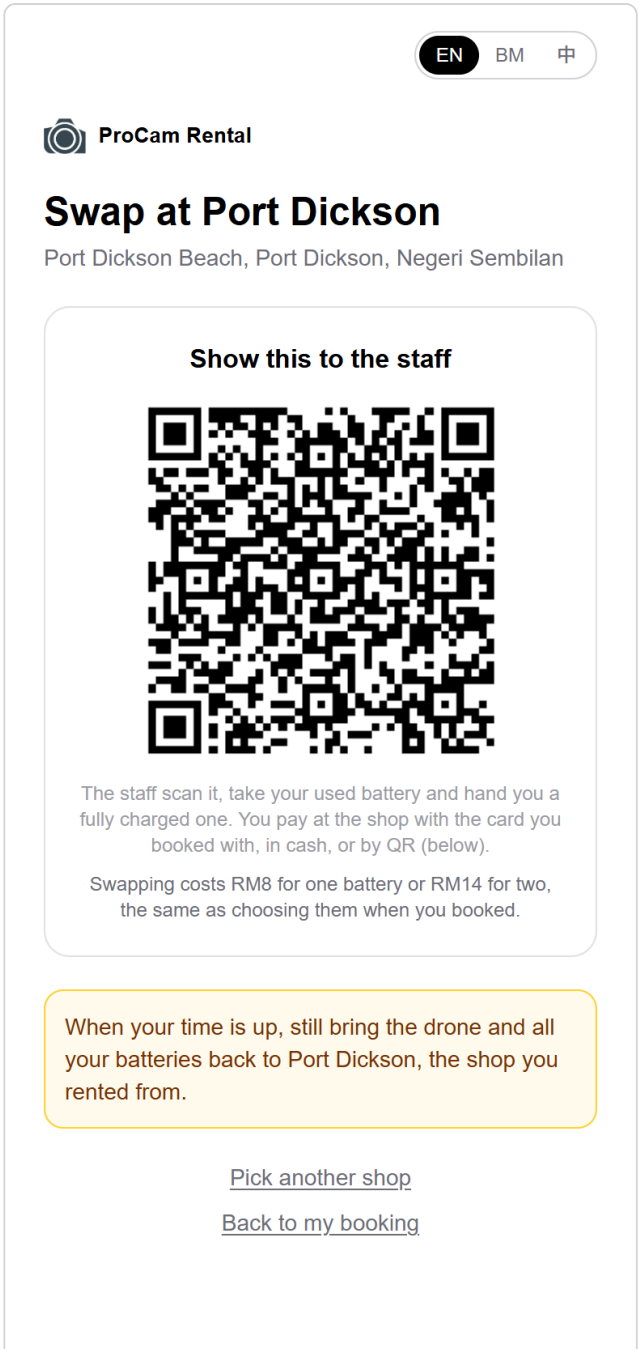

25

PART 3 · STEP 4 OF 7

Show this to the staff

Take the used battery to the shop you chose and show this QR code. They give you a fully charged one. You pay with the card you booked with, or in cash. When your time is up, you still bring the drone and all the batteries back to the shop you rented from.

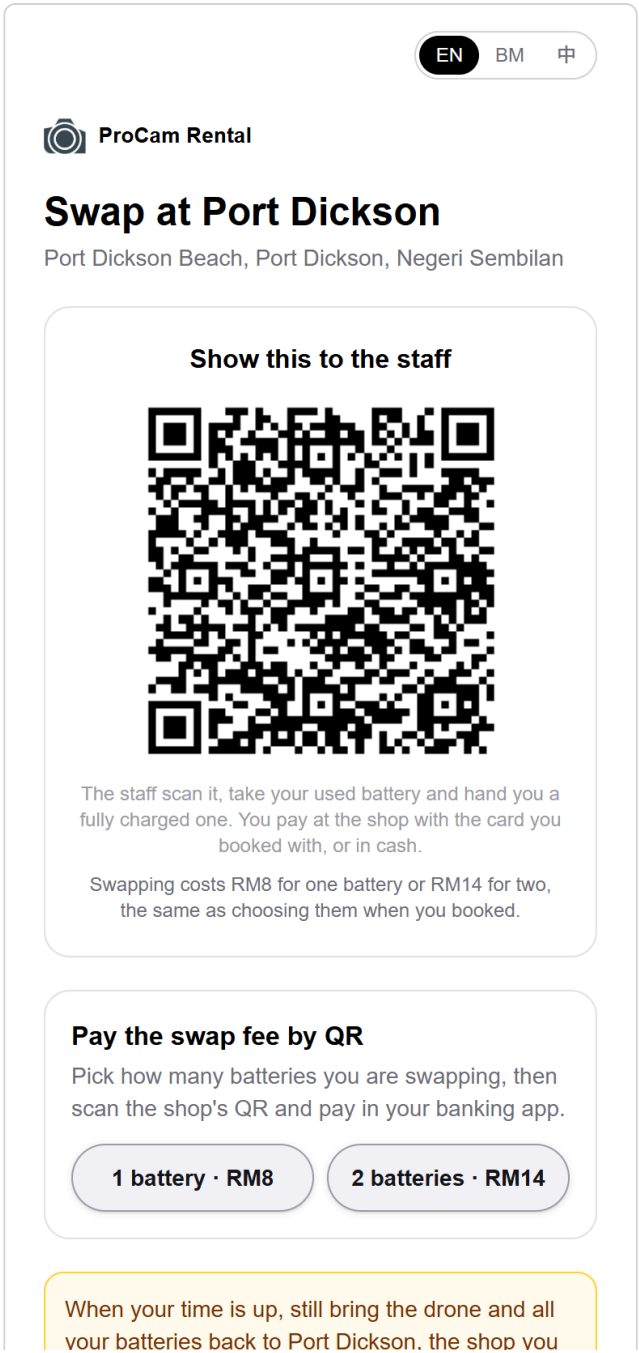

26

PART 3 · STEP 5 OF 7

Pay the swap fee by QR

Below the QR for the staff, you can pay the swap fee by QR instead of by card or cash: pick how many batteries you are swapping, 1 or 2.

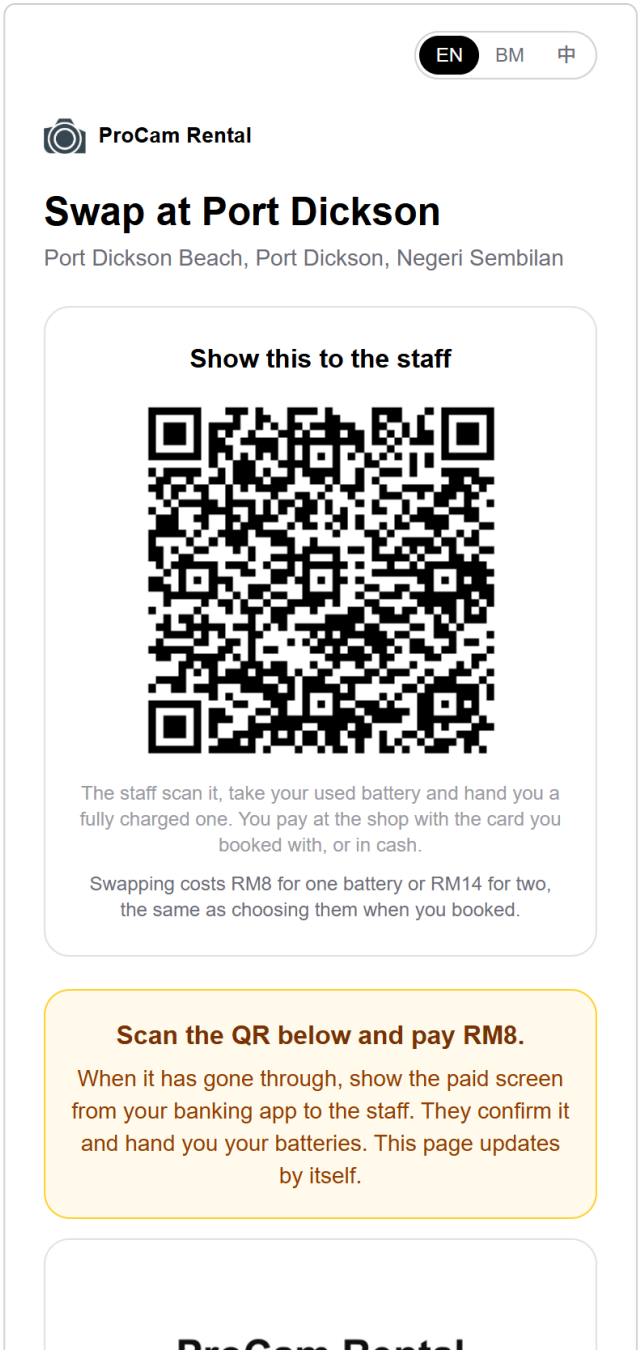

27

PART 3 · STEP 6 OF 7

Scan, pay, show the paid screen

The shop's QR appears in full, with a Save QR photo button under it (the same button as in Part 4) so you can scan it from your phone's gallery. Pay the amount shown in your banking app, then show the paid screen to the staff. They confirm it and hand you your batteries. This page updates by itself and says Payment confirmed.

28

PART 3 · STEP 7 OF 7

Watch the tutorial

The tutorial page has short guides with photos and videos: how to fly, and what happens at the shop. The link is on the home page, and in your WhatsApp messages if you ticked the box.

Part 4 · No booking: walk in at a shop

At the shop you can scan the shop's walk-in QR instead of booking in advance, as long as a drone is free and the shop is open.

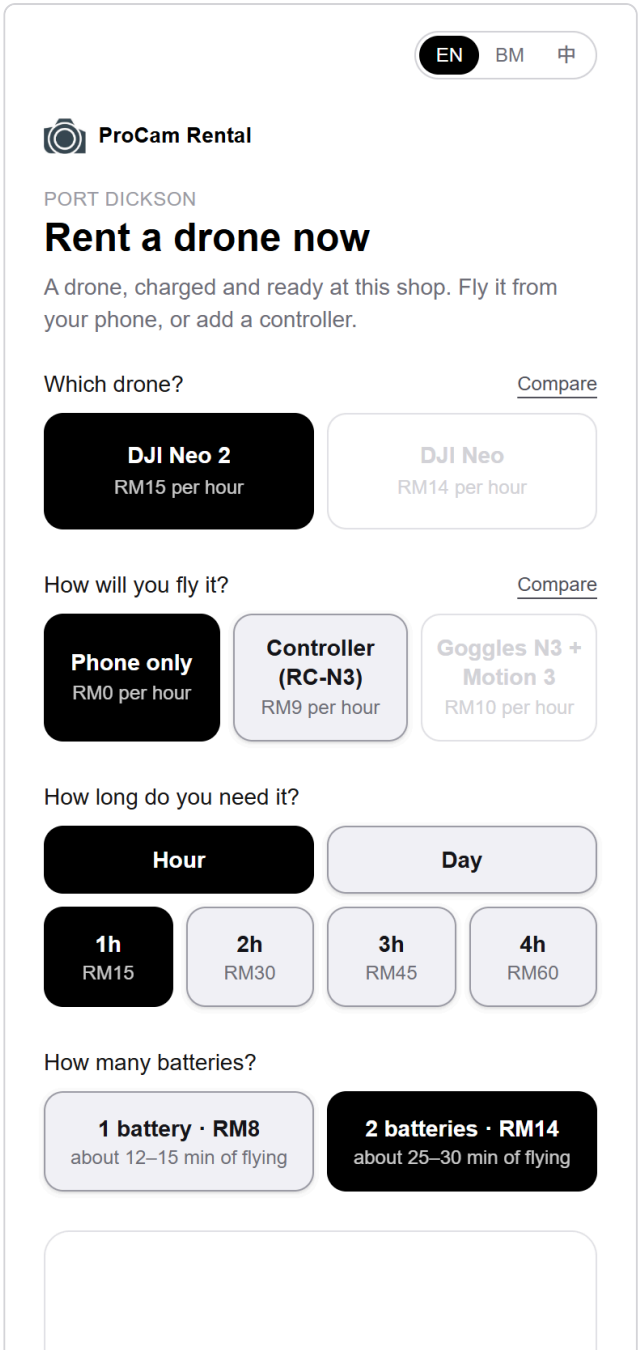

7 screens

29

PART 4 · STEP 1 OF 7

Scan the shop's QR and fill in your order

Choose the drone, how to fly it, how long (Hour, or Day when a drone is free for that long) and the batteries, then add your details. You can also tick Verify identity, and only 40% of the deposit is held.

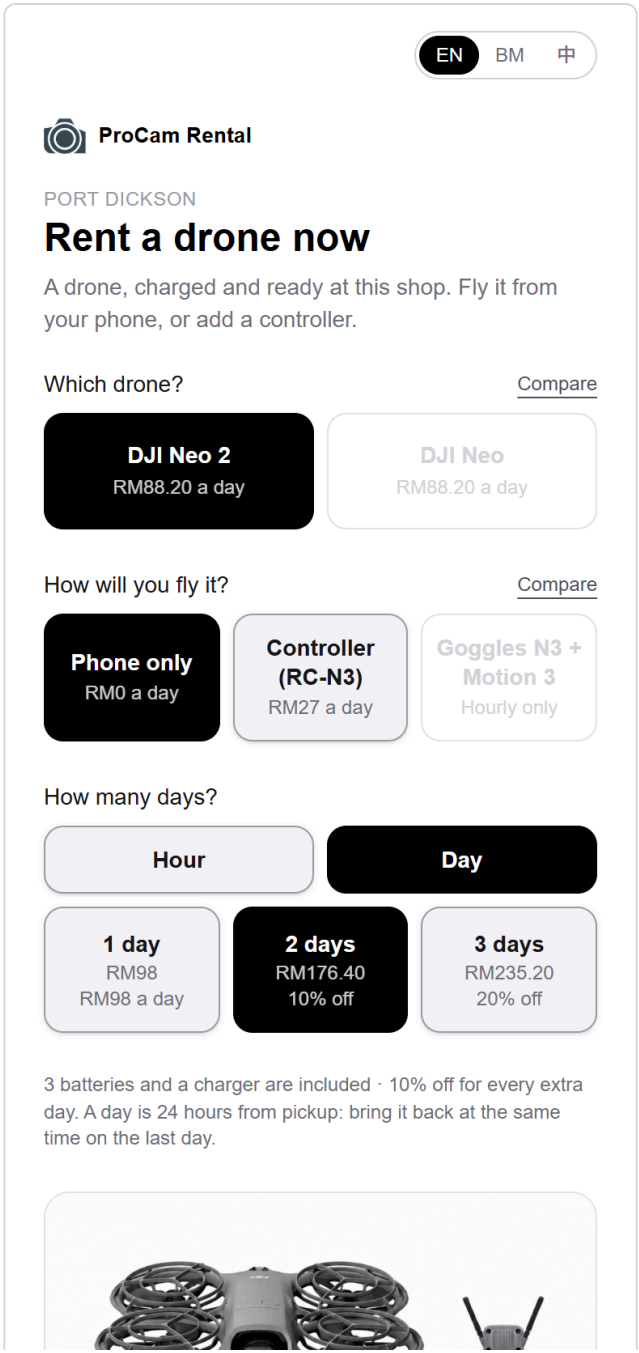

30

PART 4 · STEP 2 OF 7

Walk-in by the day

At a walk-in you can also choose Day (1 to 3 days) when a drone is free for that long. The price, the 3 batteries and charger, and the multi-day discount lines are the same as when you book online.

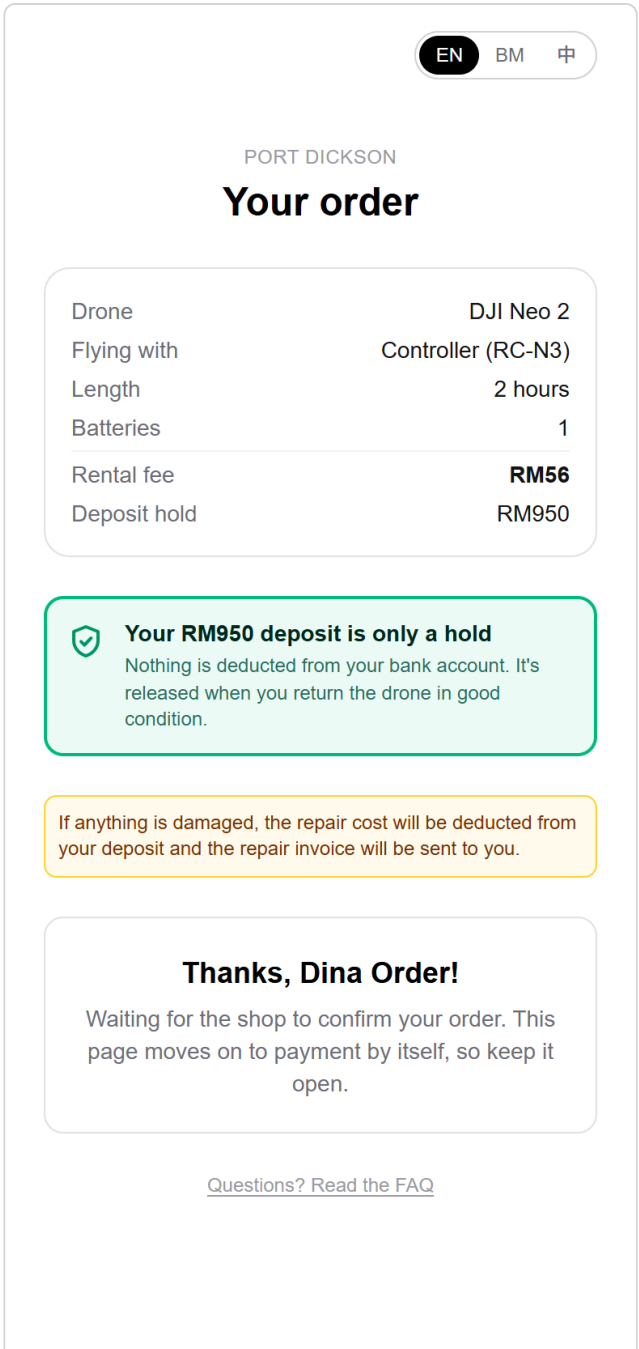

31

PART 4 · STEP 3 OF 7

Wait for the shop

Your phone waits while the staff check your name and confirm. It moves on to payment by itself.

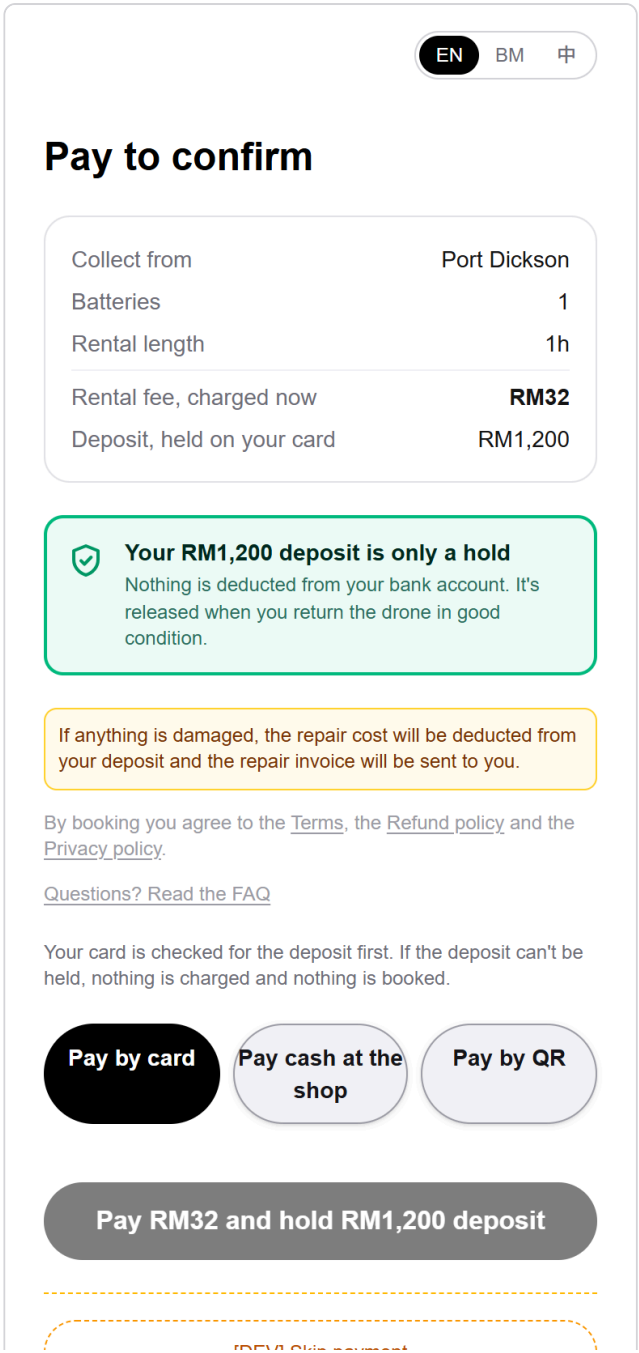

32

PART 4 · STEP 4 OF 7

Pay by card, cash or QR

At a walk-in you can pay the rental fee by card, in cash at the shop, or by scanning the shop's QR. A card is always needed for the deposit hold.

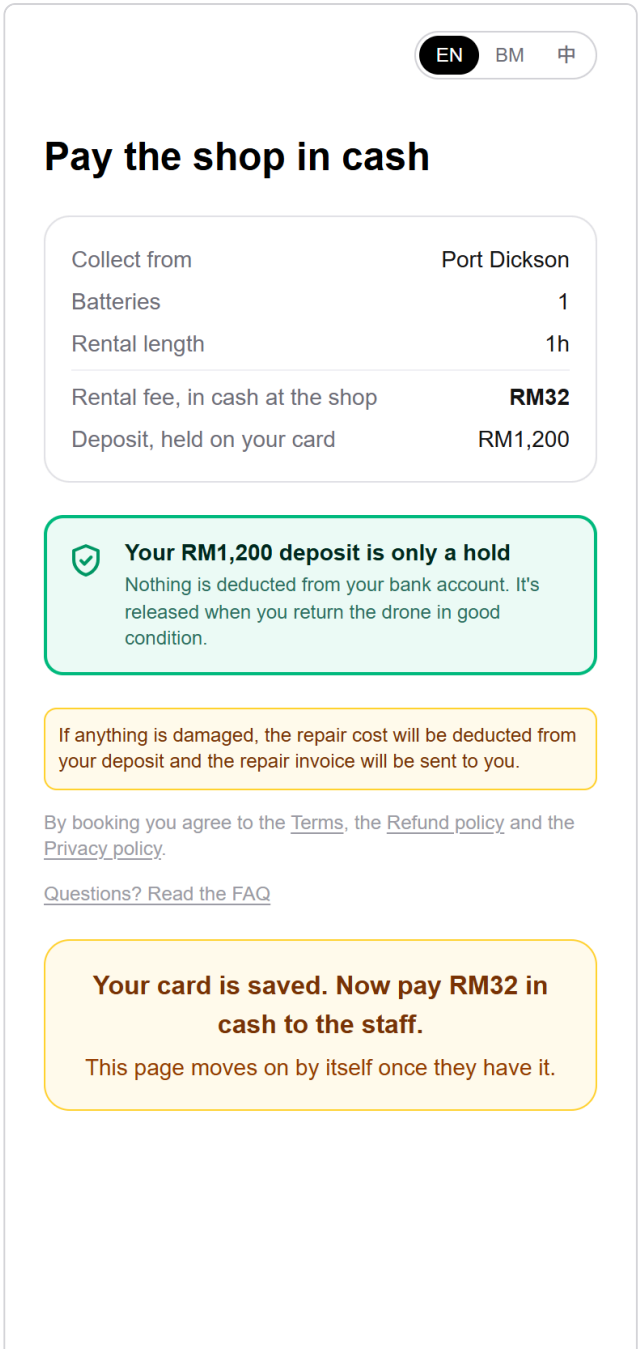

33

PART 4 · STEP 5 OF 7

Paying cash

You enter a card for the deposit hold, then pay the staff in cash. Your phone moves on by itself when they have the cash.

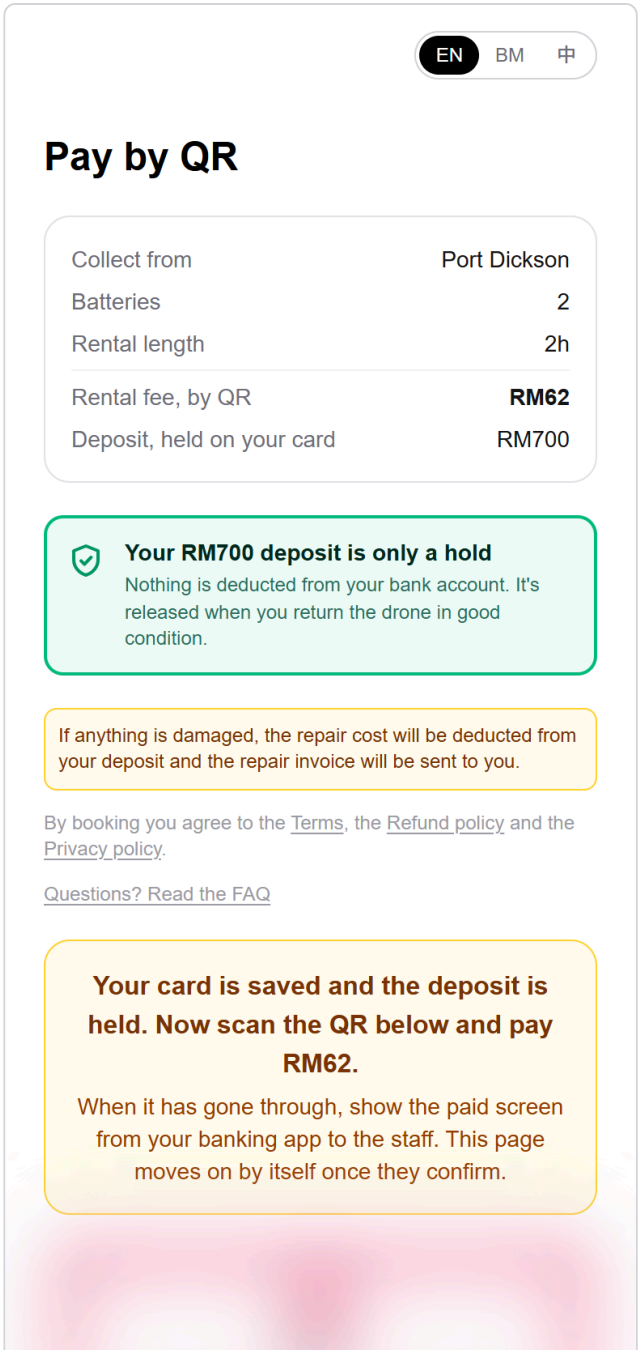

34

PART 4 · STEP 6 OF 7

Paying by QR

You enter a card for the deposit hold first. Then the shop's QR appears, in full, with a Save QR photo button under it. Tap it to save the QR to your phone, so you can pick it from your gallery in your banking app (scan from gallery or photos). Pay the amount shown. The shop is told a QR payment is coming. Show the paid screen from your banking app to the staff (not a page from our site). Once they confirm it, your phone moves on by itself.

35

PART 4 · STEP 7 OF 7

Confirmed

Payment received. The staff will hand over your drone.

EN BM 中

BOOKING DBK-01239

Confirmed

Payment received. The staff will hand over your drone now.

Shop	Port Dickson
Address	Port Dickson Beach, Port Dickson, Negeri Sembilan
Drone	DJI Neo 2 · DRN-001
Includes	Drone, RC-N3 controller, 1 battery
Length	2h
Rental fee	RM56
Deposit (refundable hold)	RM1,100

Your RM1,100 deposit is only a hold
Nothing is deducted from your bank account. It's released when you return the drone in good condition.

If anything is damaged, the repair cost will be deducted from your deposit and the repair invoice will be sent to you.

Terms Refunds Privacy FAQ Contact

Terms & Conditions

Last updated 13 October 2026.

1. Who we are and what we rent

ProCam Rental (SSM 202603270563 (TR0351009-A)) rents small DJI camera drones in Malaysia: the DJI Neo 2 and the original DJI Neo, with an optional RC-N3 controller or Goggles N3 with Motion 3 controller. You collect and return the drone at any of our partner shops. The shop's name, address and map are on the booking page and in your booking confirmation.

By making a booking you agree to these terms, our Refund & Cancellation Policy and our Privacy Policy.

2. Who can rent

You must be at least 18 years old and able to make a binding agreement. If you choose to verify your identity (so that only 40% of the deposit is held), you complete an identity check: a photo of your MyKad or passport and a live selfie, done on your phone through our verification provider. Bring your photo ID when you collect the drone: the shop staff check it against your booking and can refuse the rental if you cannot show it, if it does not match, or if they have good reason to doubt who you are. In that case the rental fee is refunded in full.

3. Booking, prices and payment

- All prices are in Malaysian Ringgit (MYR). The price

40

PART 5 · STEP 5 OF 6

Refunds and cancellations

Cancel at least 24 hours before the start for a full refund of the rental fee; the deposit is only a hold and is released when everything comes back in good condition.

Terms Refunds Privacy FAQ Contact

Refund & Cancellation Policy

Last updated 13 October 2026.

1. You cancel

- Cancel at least 24 hours before your start time: you get the whole rental fee back.
- Cancel less than 24 hours before the start, or do not turn up: the rental fee is not refunded. If we can rent the drone to someone else for that time, we will refund you.
- To cancel, contact us (see the Contact page) with your booking number, the name and the phone number you booked with.

2. We cancel, or something goes wrong: full refund

You get the full rental fee back, and your deposit hold is released, when:

- the last drone for your time was taken by someone who paid just before you. This is refunded automatically and you are asked to choose another time;
- the wind forecast is above the drone's limit, or the shop judges the weather or the place unsafe to fly, and you are not able to rebook;
- the shop cannot give you the drone you booked, or the drone, battery or controller is faulty at hand-over;
- the shop cannot confirm who you are, or your ID
