HOME PAGE

Landing page

Headline with Book a drone and Check price buttons, then How it works (four steps: pick a shop, choose a time, collect and fly, and battery finished: change it at the shop), then the Check the price section (below), then two tables: the DJI Neo next to the Neo 2 (prices, deposits and DJI's official specs), and phone only, RC-N3 or Goggles N3 + Motion 3 (extra per hour, extra deposit, whether you need your phone, control range). Under each table a Which do you prefer? choice. Then the three kit rules, with the key words in bold and underline. A link to the FAQ sits under How it works. Every Book a drone button has Check price beside it.

ProCam Rental

EN BM 中

Rent a drone. Fly today.

A DJI Neo or Neo 2 with batteries, ready at your nearest shop. Fly it from your phone, or add a controller or goggles. Pick a time, collect it, fly, and bring it back.

Book a drone | Check price

How it works

1
Pick a shop
Choose a pickup shop on the map, or tap Nearest to me.

2
Choose a time
Pick any free slot and pay the rental fee.

3
Collect and fly
Show your booking QR to the shop. Return everything there when your time is up.

4
Battery finished?
Change it at the shop for a fully charged one. Each swap is charged at the battery price.

Questions? Read the FAQ

Check the price

Choose a package to see what it costs. Next you pick the shop, then the time.

Which drone? Compare

DJI Neo 2 RM10 per hour | DJI Neo RM9 per hour

Pick a drone to start. The price shows once you have chosen everything.

DJI Neo or DJI Neo 2

Two drones, same shops. These prices are for flying from your own phone; a controller adds to them (see below). The deposit is a card hold, not a charge.

	DJI Neo	DJI Neo 2
PRICE		
1 hour	RM9	RM10

4

CUSTOMER: CHOOSING THE PACKAGE FIRST

Choose the location

Your package (drone, how you fly it, batteries, length, price and deposit) sits above the shops, with a Change link back to the picker. Picking a shop carries it on.

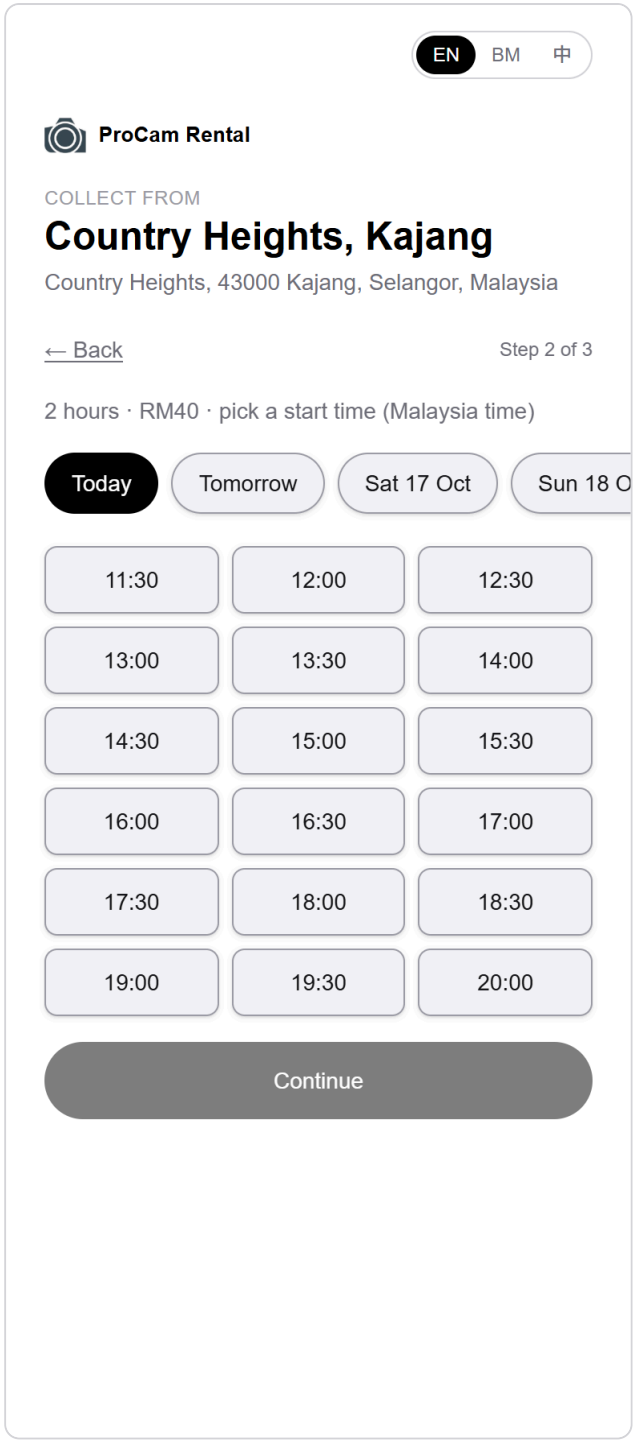

5

CUSTOMER: CHOOSING THE PACKAGE FIRST

Straight to the time

The booking page opens at the day and time step with the package already chosen. Back goes to the package step with the same choices.

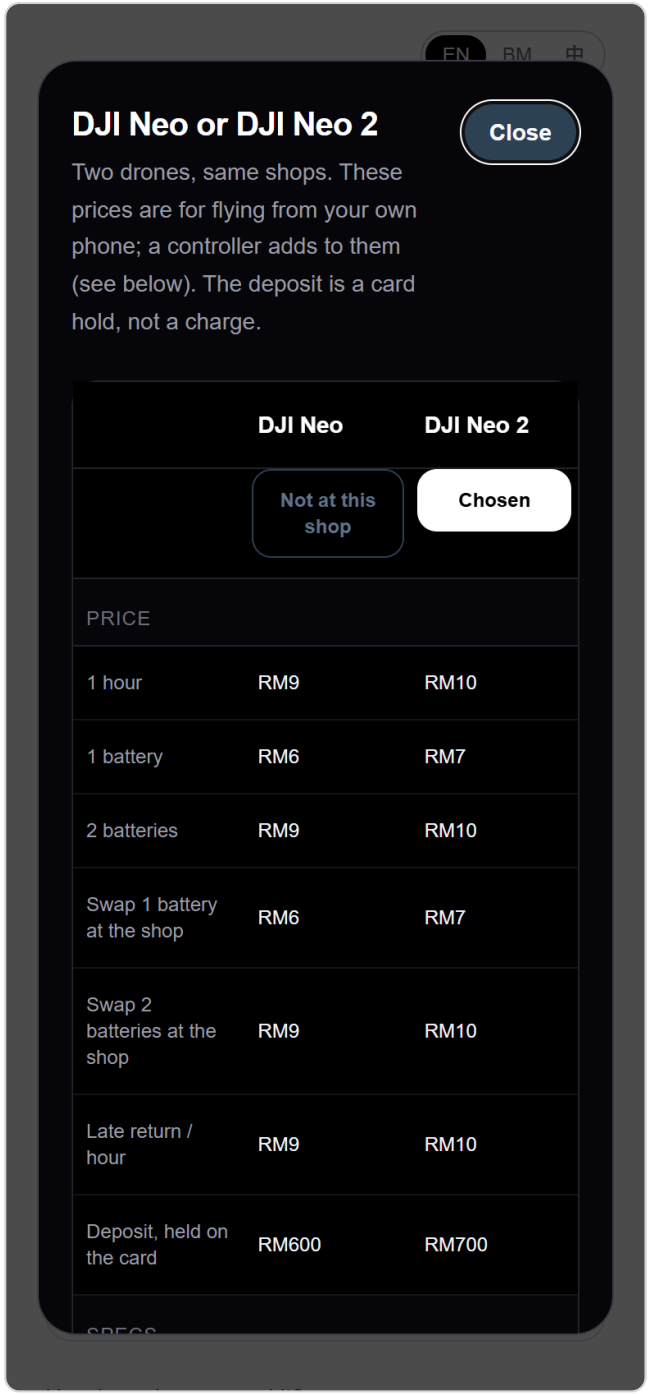

6

CUSTOMER: CHOOSING THE PACKAGE FIRST

Compare, then choose

Beside the drone choice and the how-to-fly choice (on the landing page, the booking page and the walk-in form) a Compare button opens just the comparison table, with a Choose this button under each column. Choosing one picks it and goes back. A drone or controller the shop does not have shows Not at this shop and can not be chosen.

7

CUSTOMER: CHOOSING THE PACKAGE FIRST

A shop without the goggles

Kajang has no goggles set, so a package with goggles opens at the first step with a note to check the choices.

8

CUSTOMER: BOOKING ONLINE

Pick a shop

Two shops on the map and a card for each: Country Heights, Kajang and Port Dickson Beach.

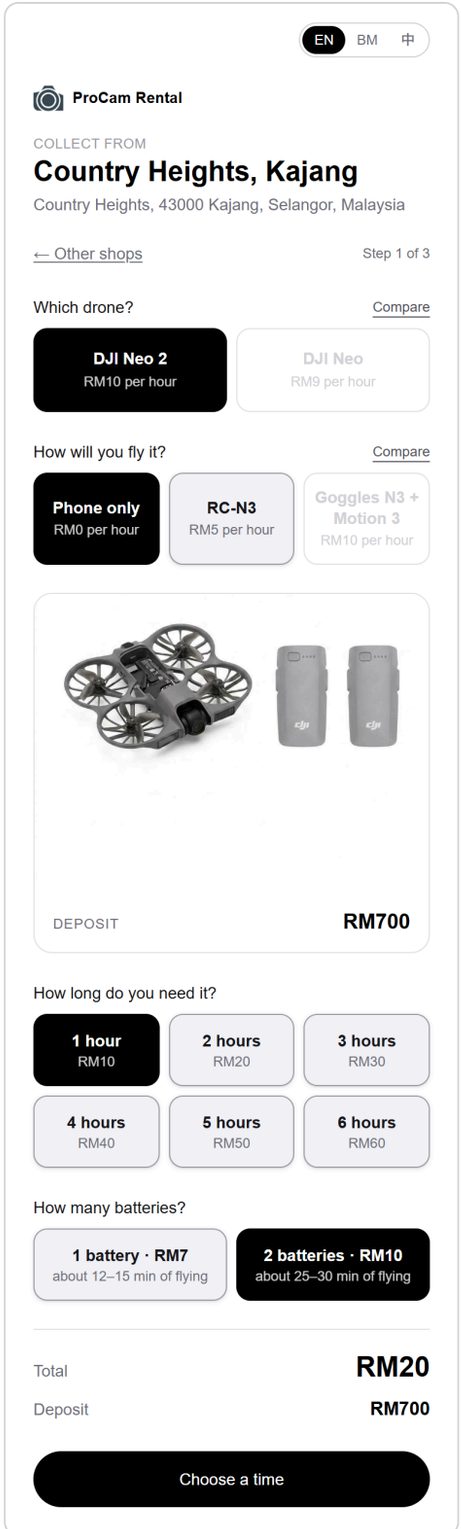

9

CUSTOMER: BOOKING ONLINE

Drone, how to fly it, how long, batteries

Neo 2 (RM10 an hour) or Neo (RM9). Phone only, RC-N3 or goggles, each showing only its own extra per hour. The picture and deposit for the chosen combination, then the length and batteries, and the total and deposit at the bottom.

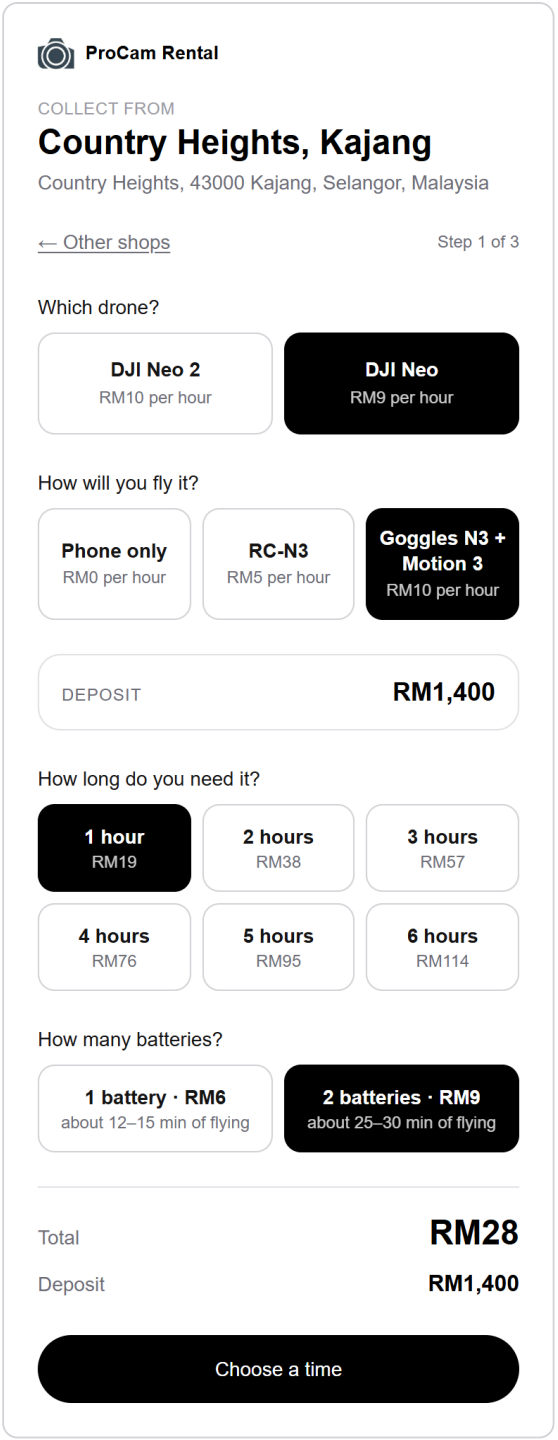

10

CUSTOMER: BOOKING ONLINE

The Neo with the goggles

Picking another drone or another way to fly changes the prices and the deposit. Goggles add RM10 an hour and RM800 deposit.

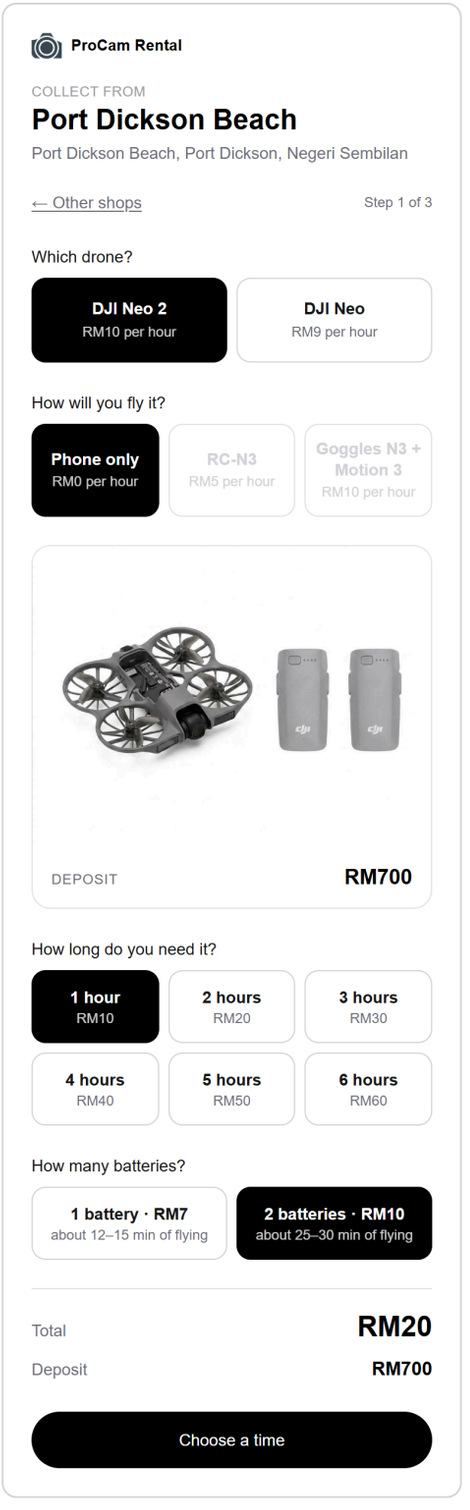

11

CUSTOMER: BOOKING ONLINE

Port Dickson Beach: phone only

This shop has no controllers, so there is no choice of how to fly: the customer uses their own phone. (The picture for each combination is uploaded in Branding.)

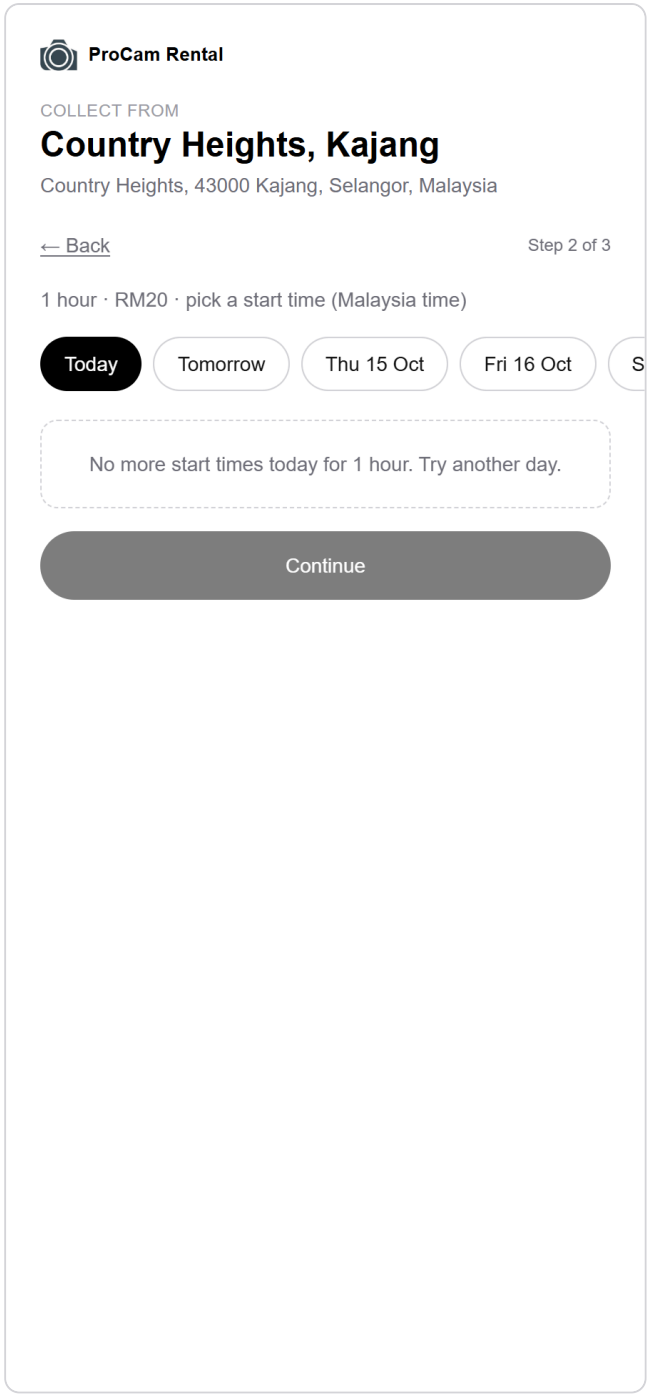

12

CUSTOMER: BOOKING ONLINE

Too windy

Times when the forecast wind is over the drone's limit (10.7 m/s for the Neo 2, 8 m/s for the Neo) are greyed out, with a note. Shown here with the limit lowered for the demo.

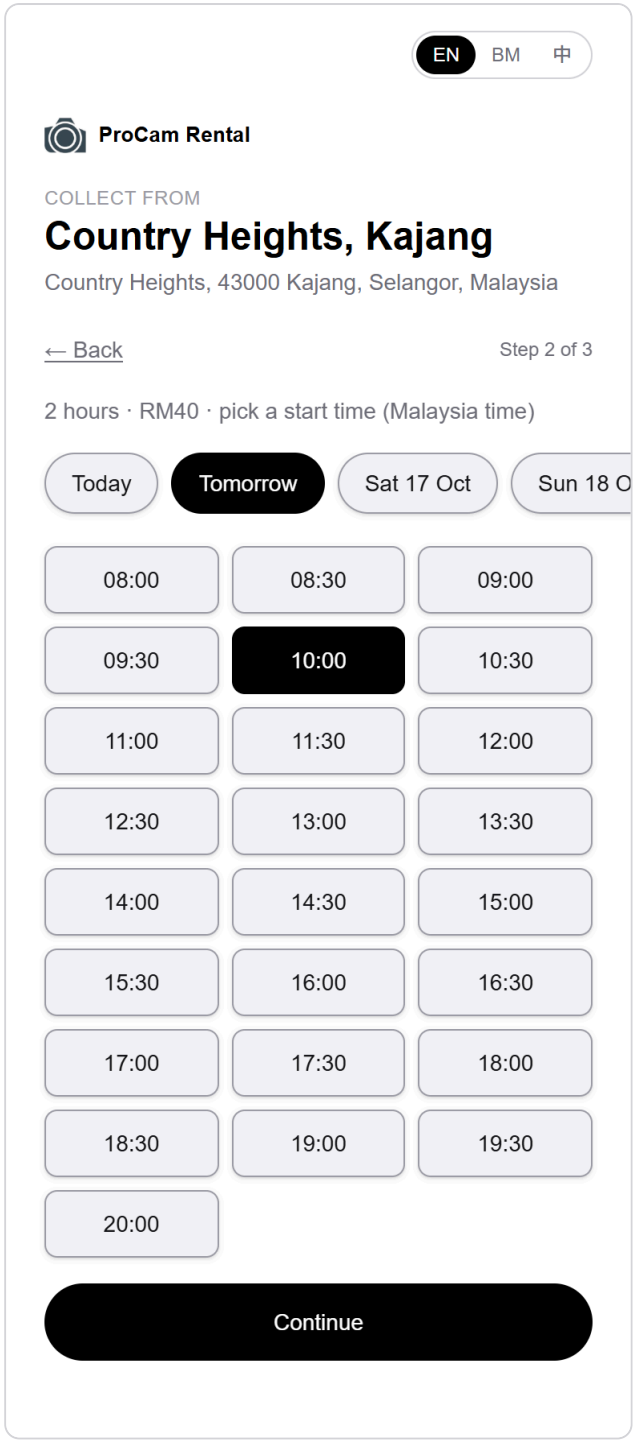

13

CUSTOMER: BOOKING ONLINE

Day and time

Seven days to choose from. Times are Malaysia time and finish by closing.

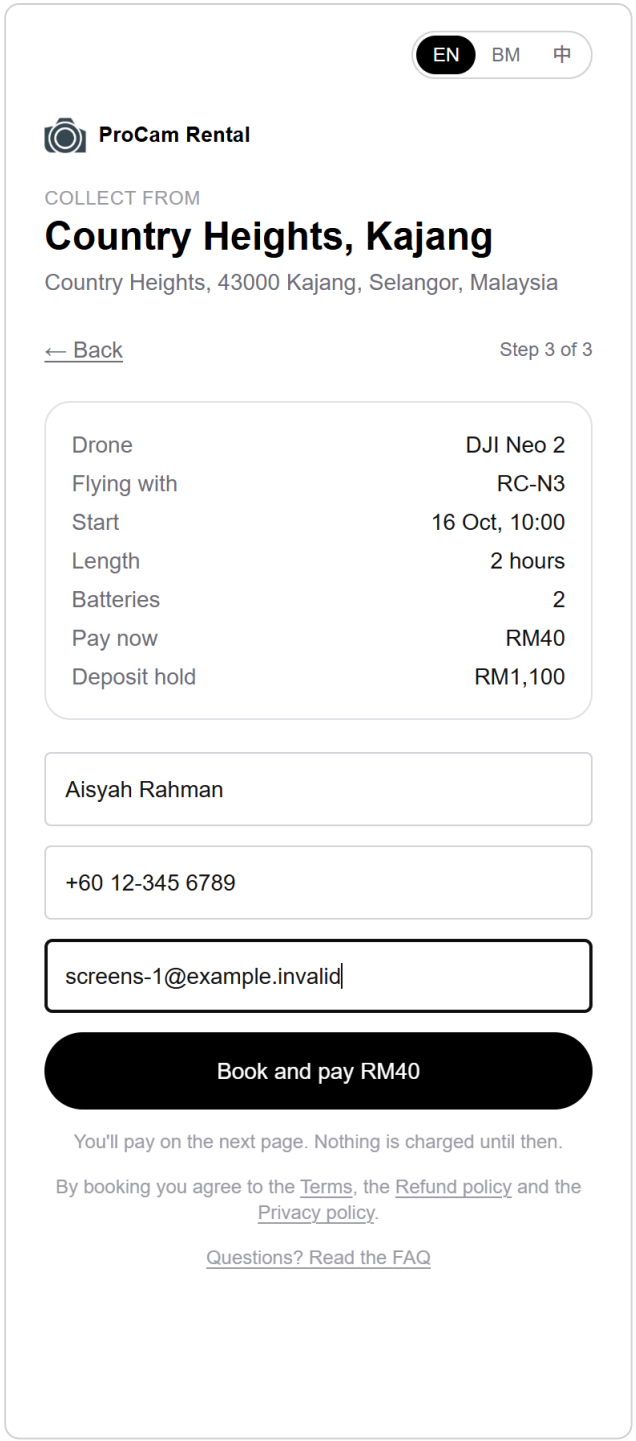

14

CUSTOMER: BOOKING ONLINE

Your details

Shows the drone, how it is flown, and what you'll pay and what is held.

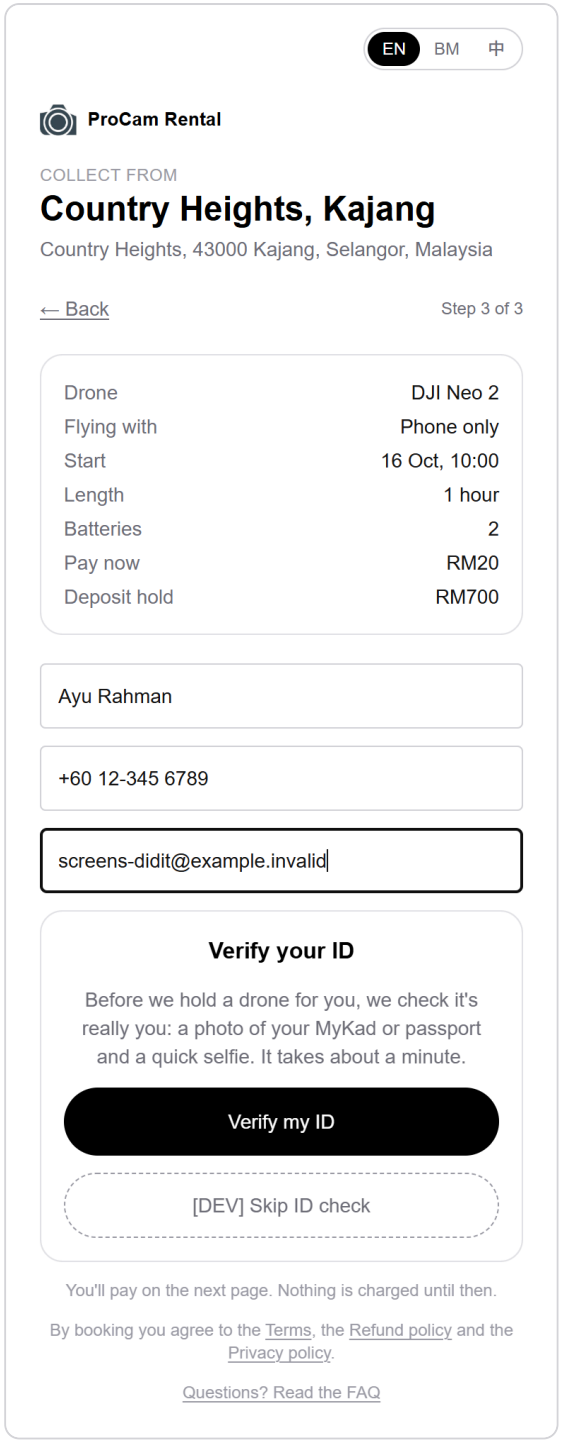

15

CUSTOMER: BOOKING ONLINE

Verify your ID

Book and pay starts with an ID check: a photo of the MyKad or passport and a quick selfie, in Didit's window on the customer's phone. Only when it passes is the booking made and the customer taken to pay. Every booking needs its own check, and walk-in orders at the shop's QR do it too. (The orange skip button is local-only.)

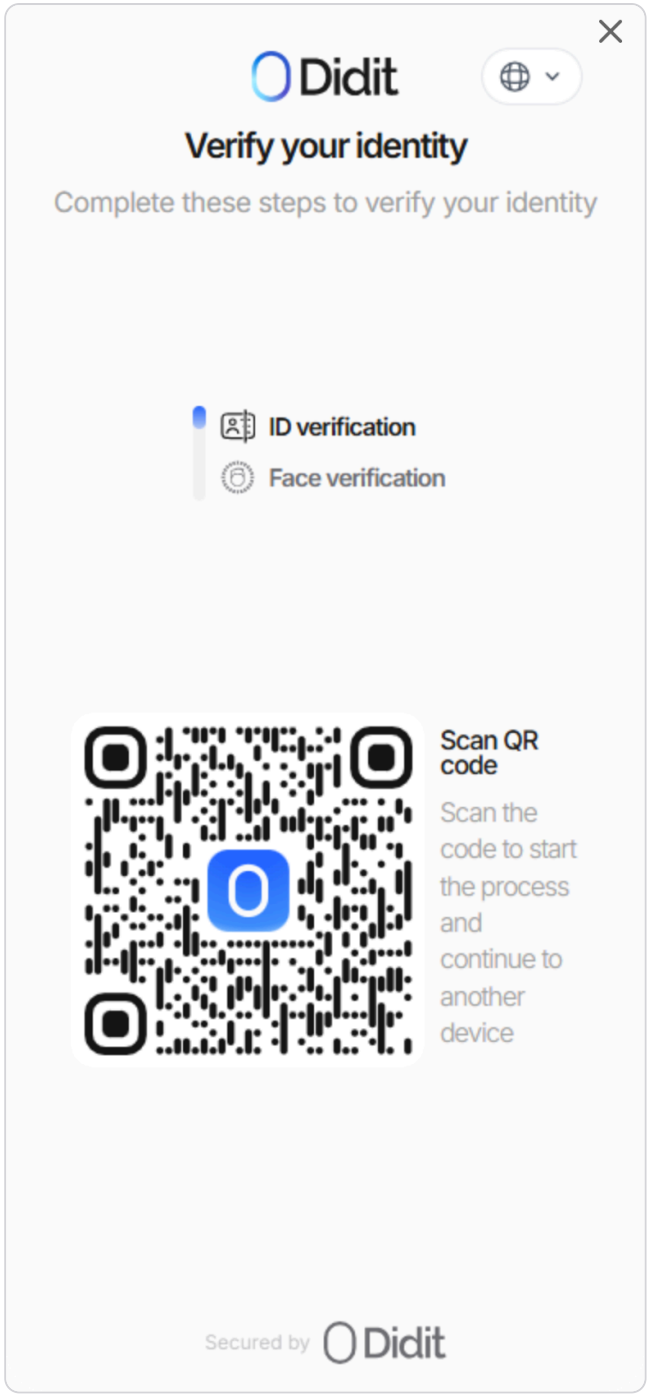

16

CUSTOMER: BOOKING ONLINE

Didit's verification window

Verify my ID opens Didit's own window over the page, with the two steps: ID verification (the MyKad or passport) and face verification (a live selfie). On a computer Didit shows a QR code to continue on a phone. This is the real Didit window; ProCam only receives the result.

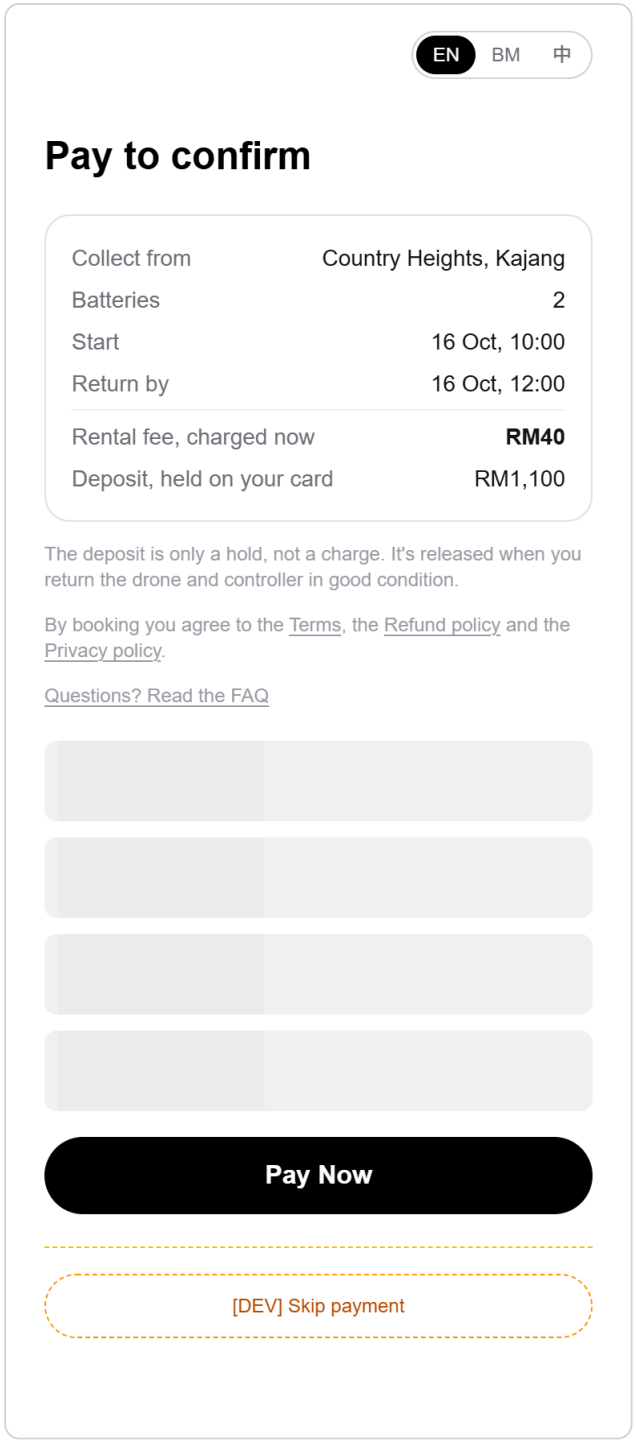

17

CUSTOMER: BOOKING ONLINE

Pay

Booking summary above the payment form. (The orange skip button is local-only.)

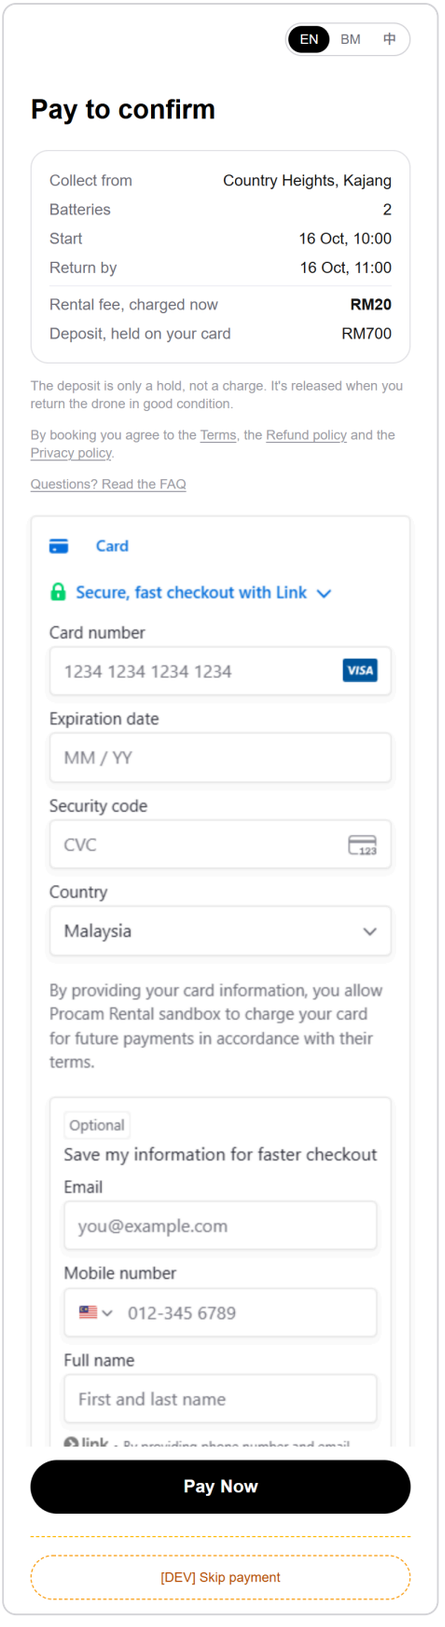

18

CUSTOMER: BOOKING ONLINE

Pay: Stripe's card form

The card form on the payment page is Stripe's own, so the card number never touches ProCam. It shows the rental fee charged now and the deposit that is only held. (Captured in Stripe's test mode; the orange skip button is local-only.)

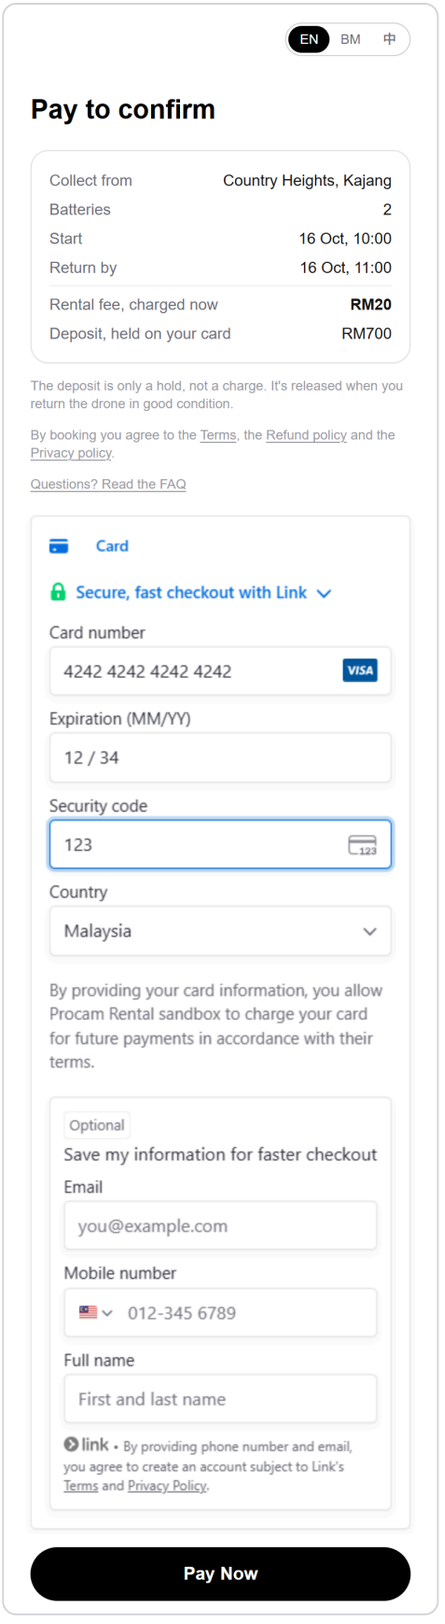

19

CUSTOMER: BOOKING ONLINE

Pay: a card filled in

Card number, expiry, security code and country, then Pay Now. Stripe's test card 4242 4242 4242 4242 is typed in here.

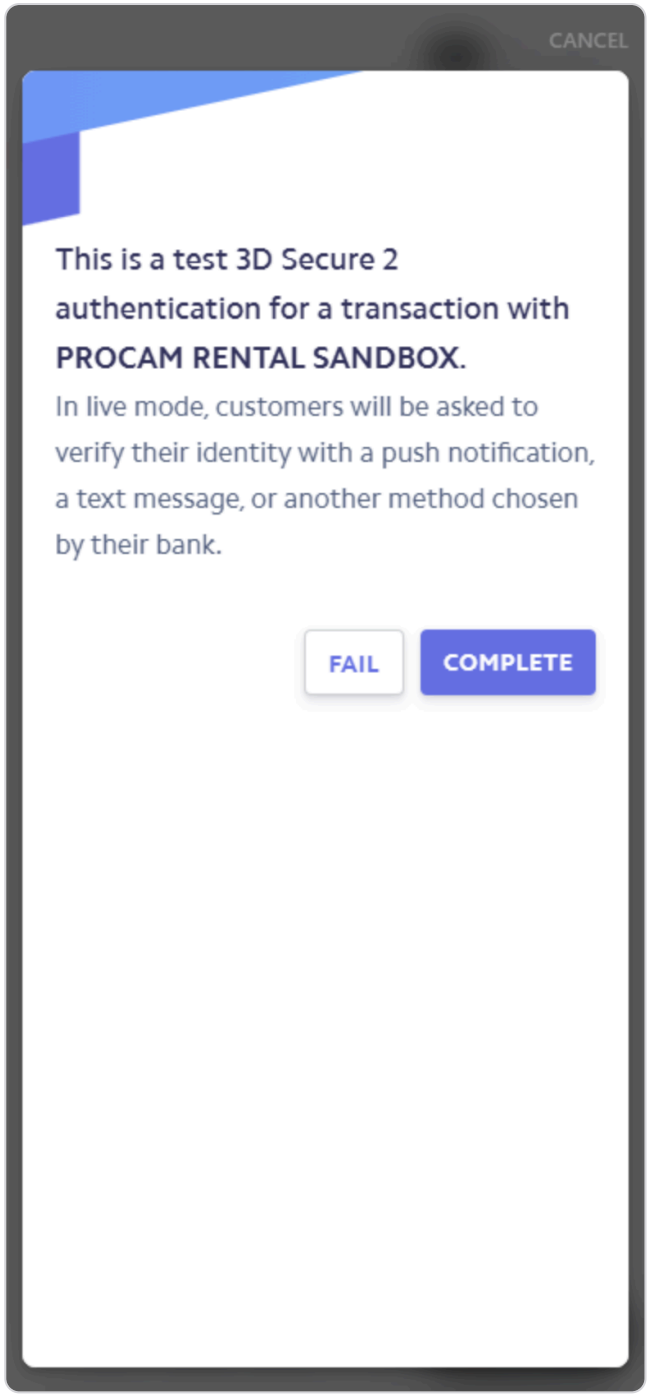

20

CUSTOMER: BOOKING ONLINE

Pay: the bank's 3-D Secure check

If the bank wants to confirm the payment, Stripe opens the bank's check over the page. In live mode the customer approves it with a push notification, a text message or their bank app. This is Stripe's test version, which has a Complete and a Fail button.

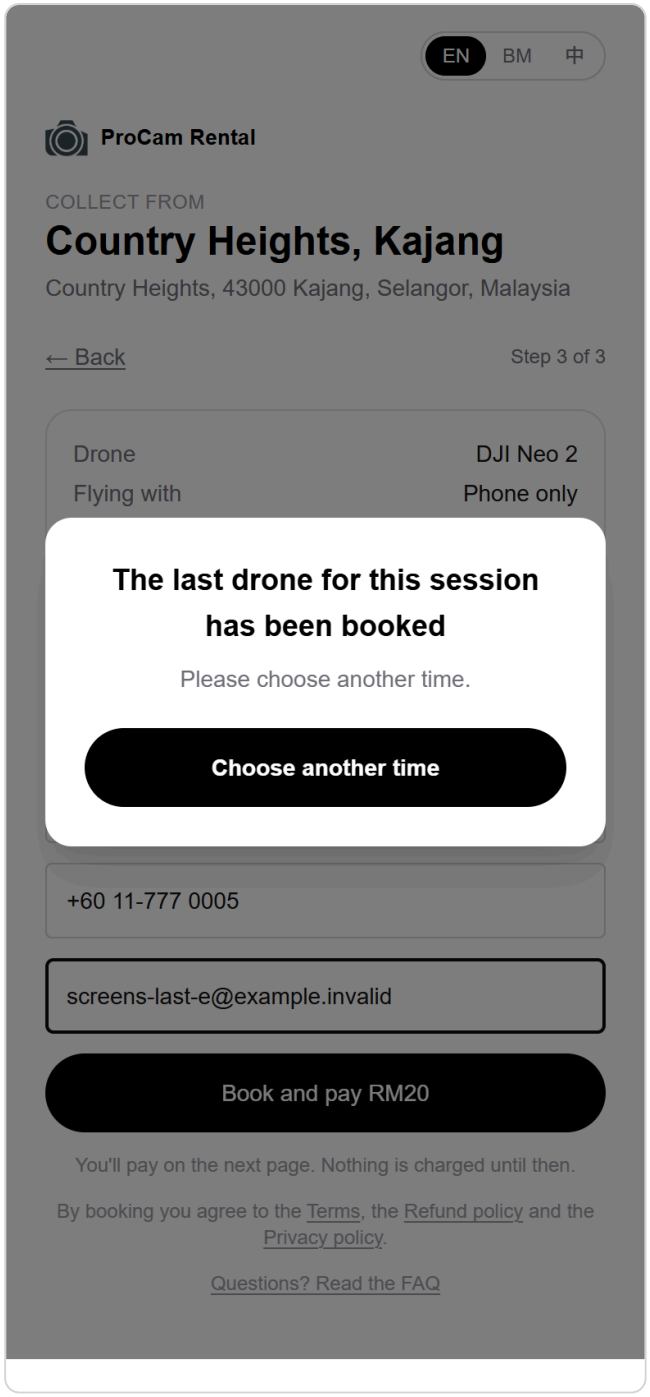

21

CUSTOMER: BOOKING ONLINE

The last drone was taken first

If someone else booked and paid for the last drone while you were filling in your details, this popup appears. Everything you typed stays on the page; Choose another time takes you back to the times.

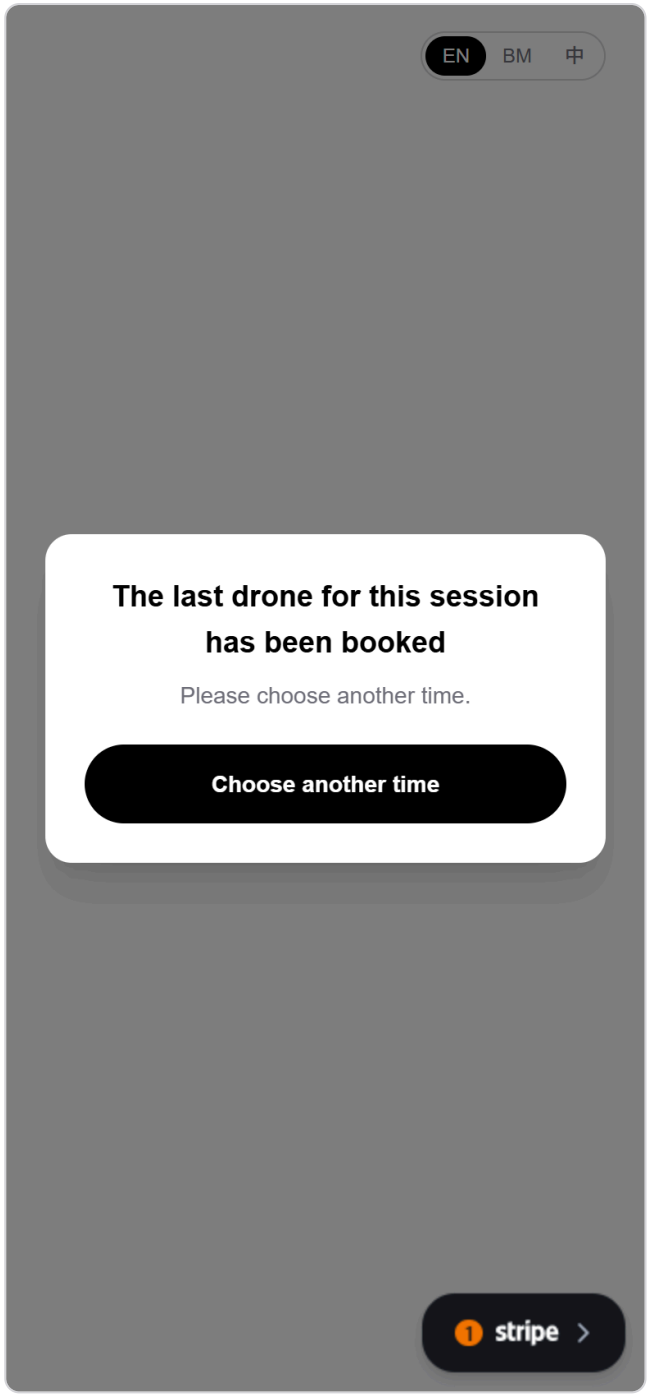

22

CUSTOMER: BOOKING ONLINE

Someone paid before you

Two people can be on the payment page for the last drone at once; the first to pay gets it. The other sees this and is not charged (a card payment that went through at the same instant is refunded).

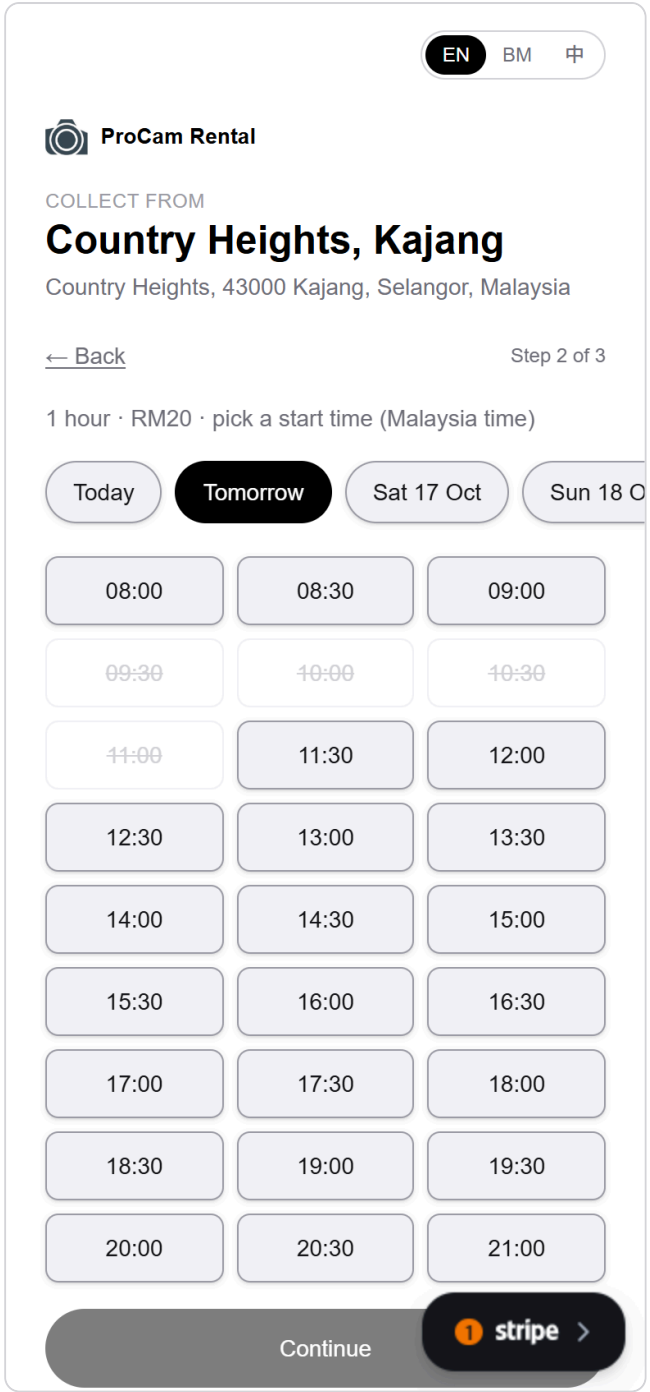

23

CUSTOMER: BOOKING ONLINE

Back to the times, nothing lost

Choose another time returns to the day and time step with the length, drone, controller, batteries and personal details still filled in. These are kept only in the browser tab, never saved on the server, and are gone as soon as the page is closed.

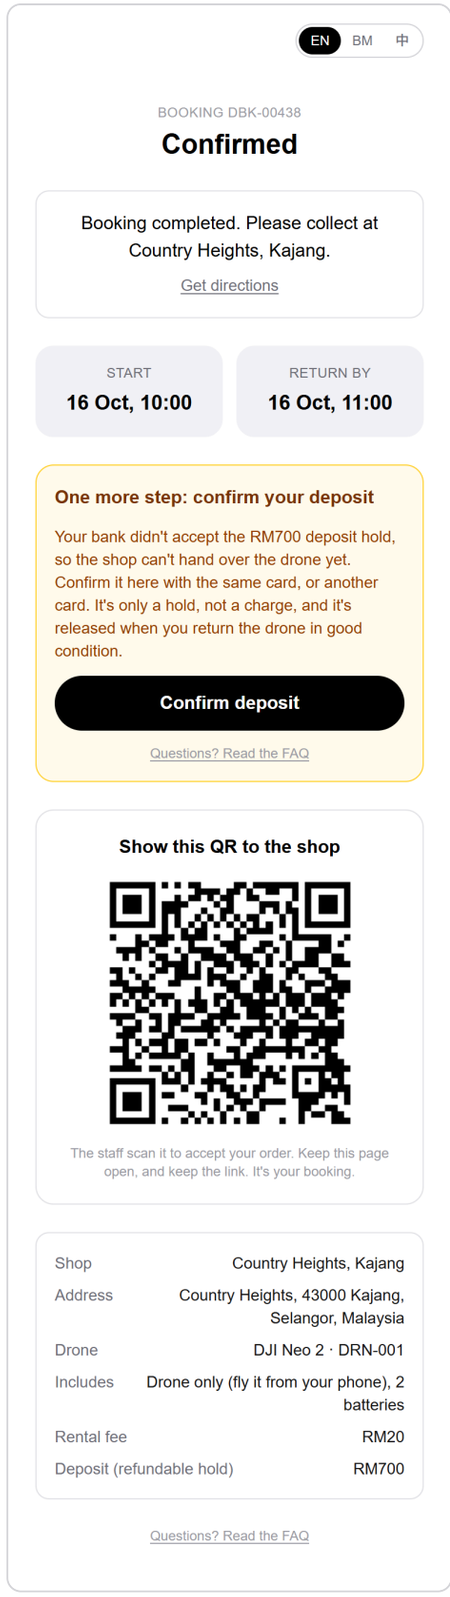

24

CUSTOMER: BOOKING ONLINE

If the bank refuses the deposit hold

The booking is paid and confirmed, but the bank didn't accept the automatic deposit hold. The booking page asks the customer to confirm the deposit while they are there to approve it.

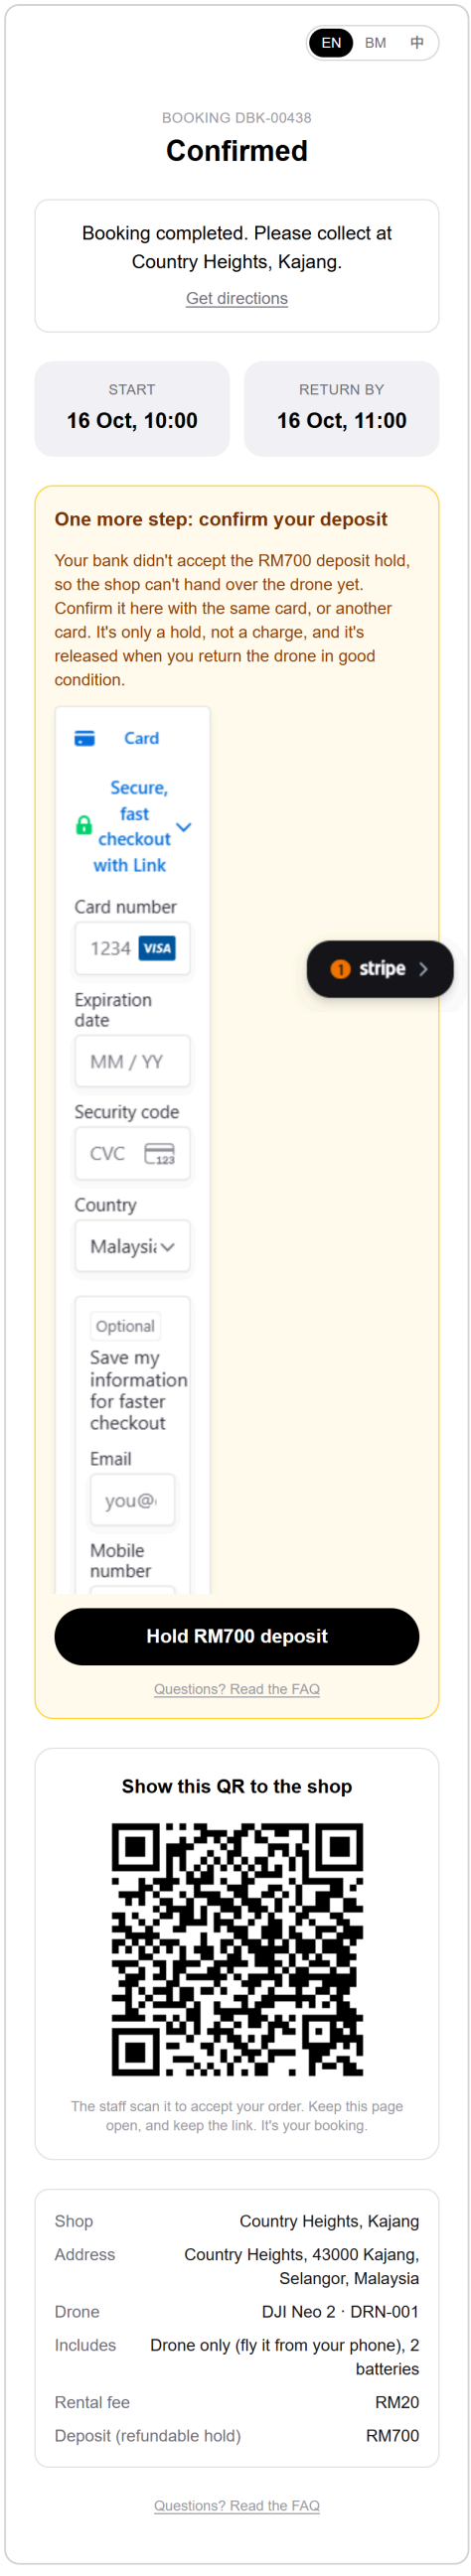

25

CUSTOMER: BOOKING ONLINE

Confirm the deposit

Confirm deposit opens a card form: the same card or another one, with any bank approval handled by Stripe. It is only a hold, never a charge.

26

CUSTOMER: BOOKING ONLINE

Confirmed, with a QR

Start and return times, and a QR to show the staff.

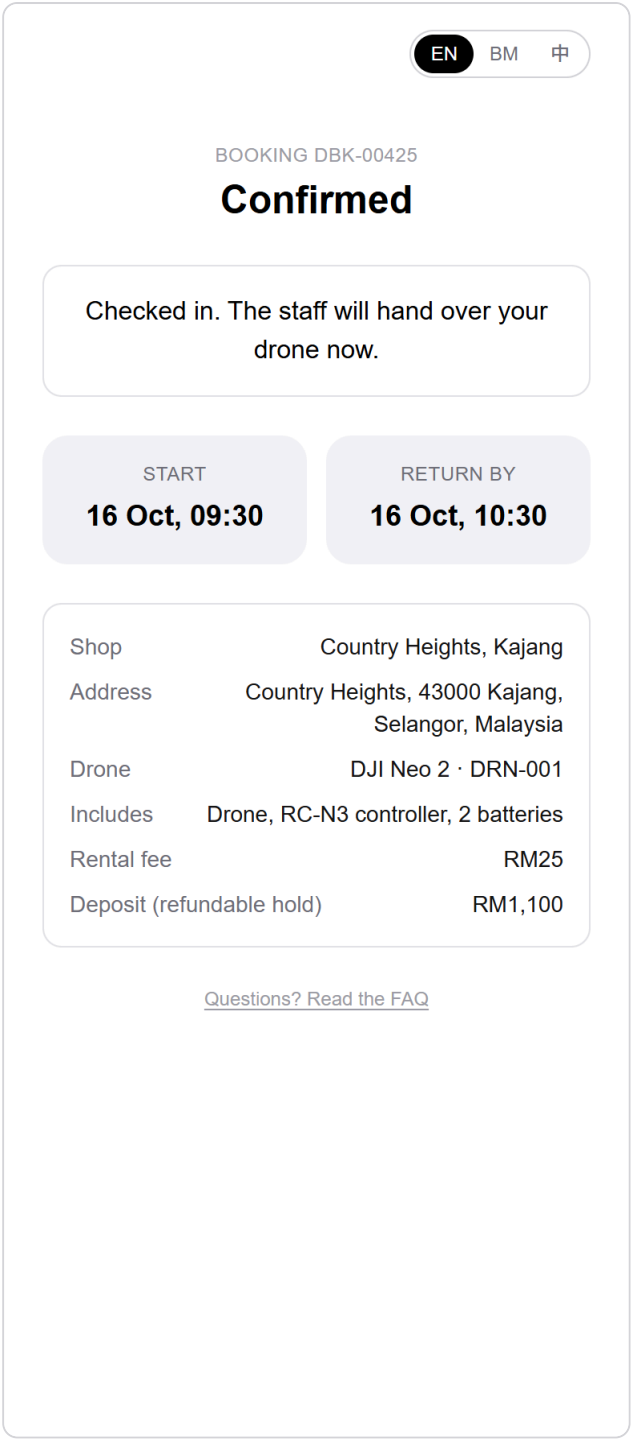

27

CUSTOMER: BOOKING ONLINE

After the staff accept

The QR disappears: Checked in. The staff will hand over your drone now.

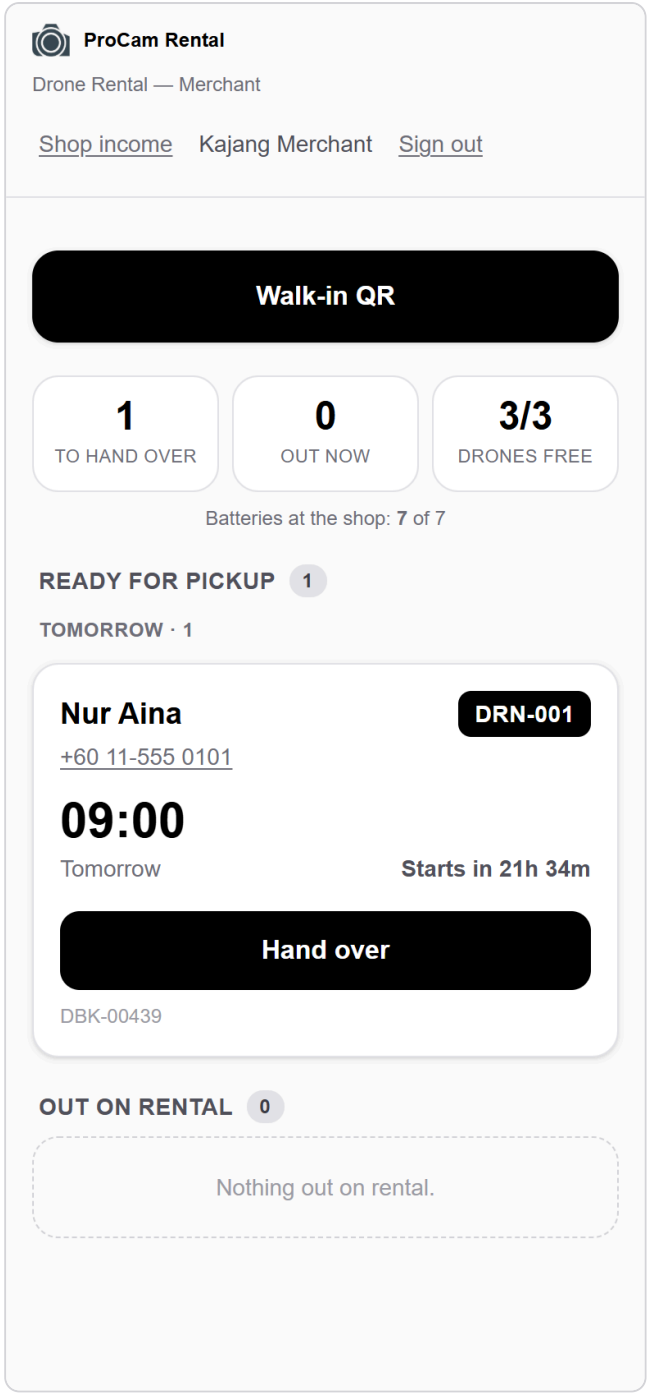

28

MERCHANT: ACCEPTING AN ONLINE ORDER BY QR

Booking waiting

Appears under Ready for pickup with the booked start time.

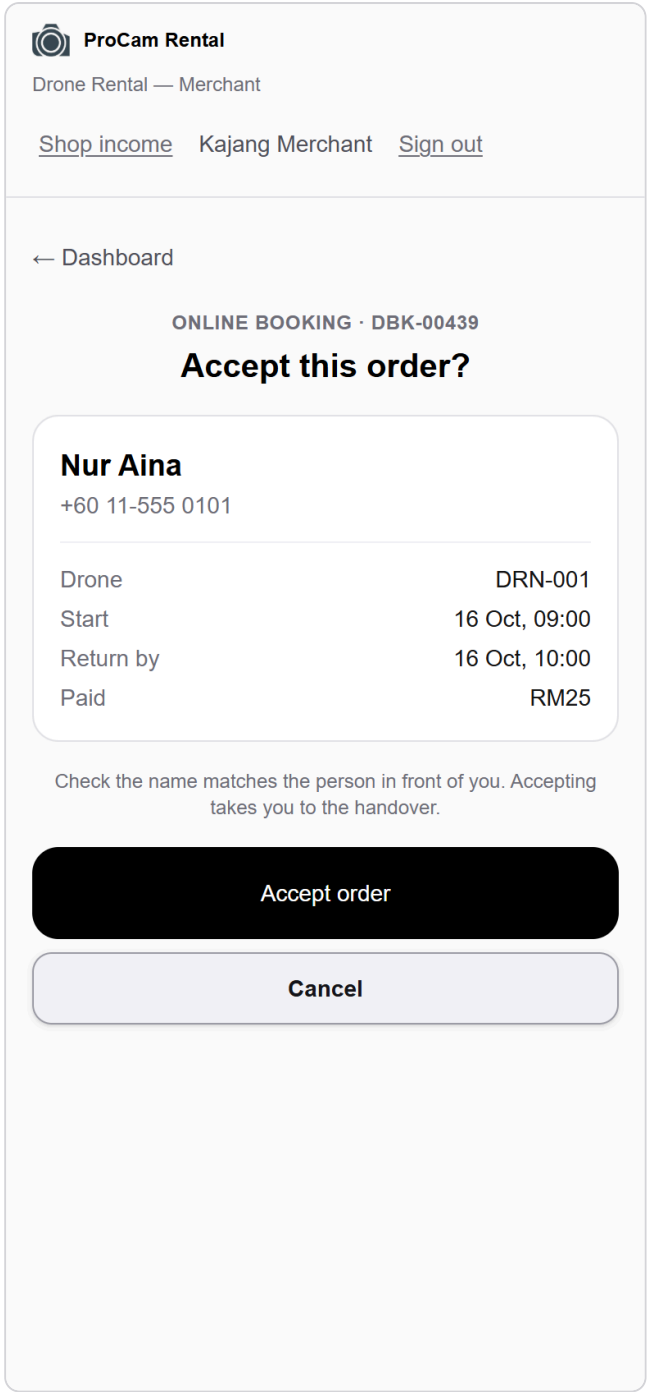

29

MERCHANT: ACCEPTING AN ONLINE ORDER BY QR

Scan: Accept order or Cancel

Opens from the customer's QR (the merchant signs in first if needed).

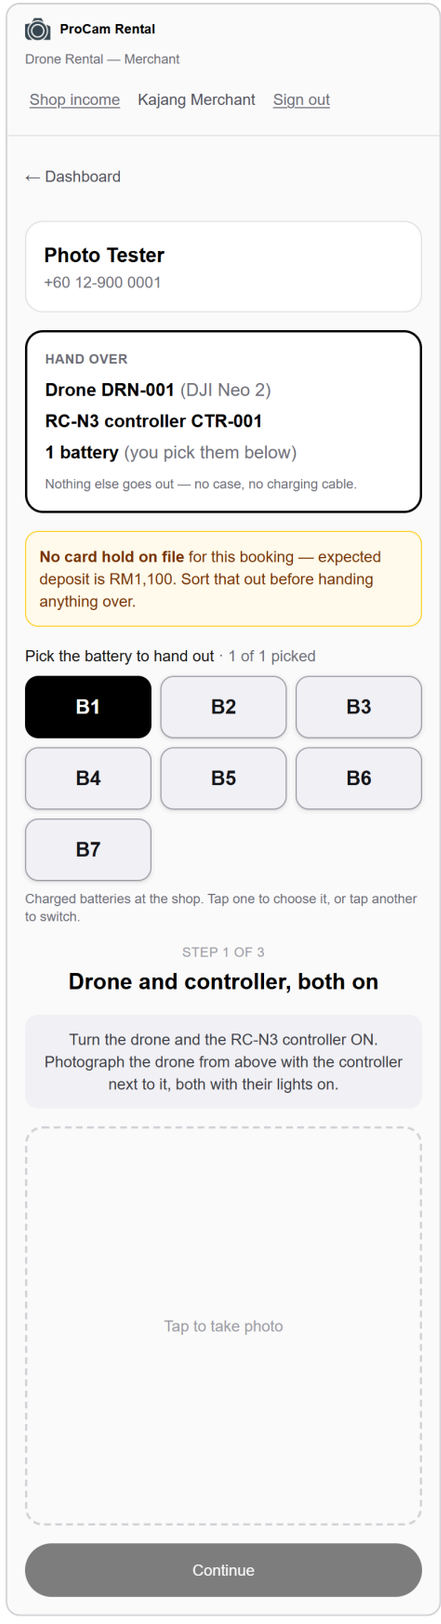

30

MERCHANT: ACCEPTING AN ONLINE ORDER BY QR

Accepted: straight to handover

Step 1 of 3. Who it's for, what goes out, then the first guided photo: the drone from above and the controller, both on.

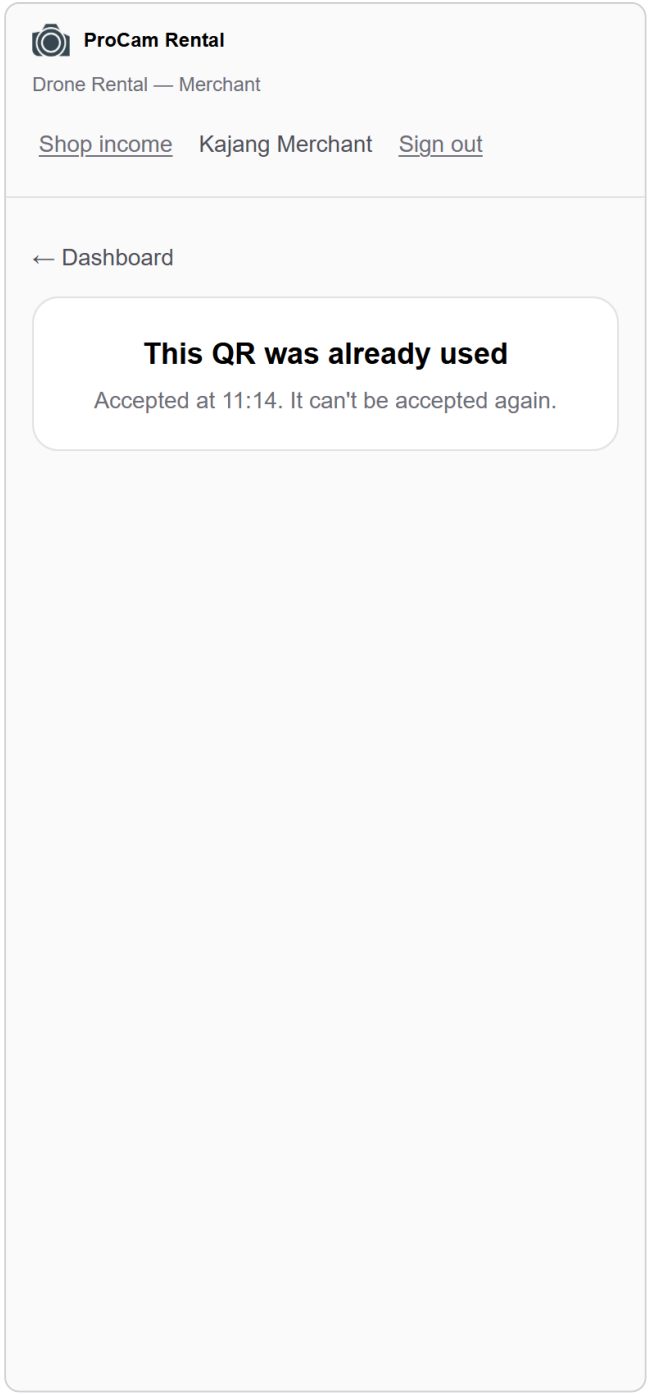

31

MERCHANT: ACCEPTING AN ONLINE ORDER BY QR

Scanning again

The QR was already used. It can't be accepted twice.

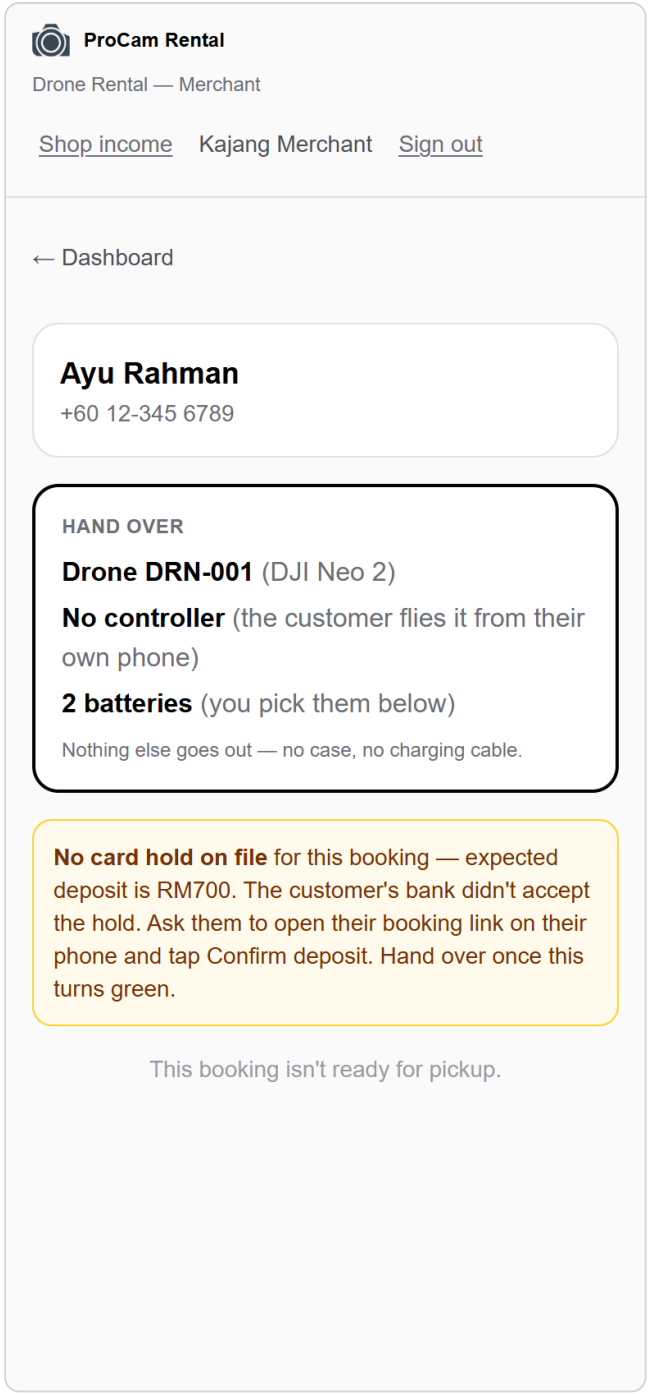

32

MERCHANT: ACCEPTING AN ONLINE ORDER BY QR

Deposit not held yet

If the customer's deposit hold isn't on, the handover page says so and the form stays locked. Ask them to open their booking link and tap Confirm deposit; it turns green and unlocks once the hold is on.

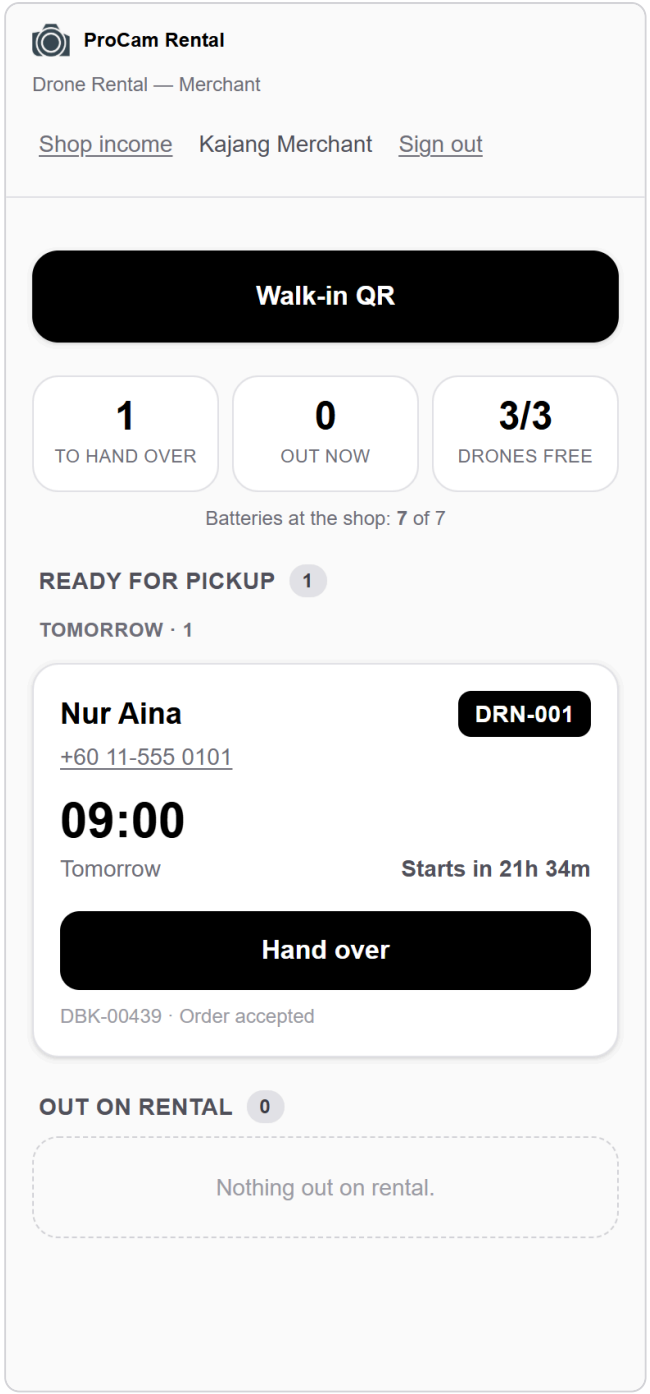

33

MERCHANT: ACCEPTING AN ONLINE ORDER BY QR

Dashboard afterwards

The accepted order is marked Order accepted.

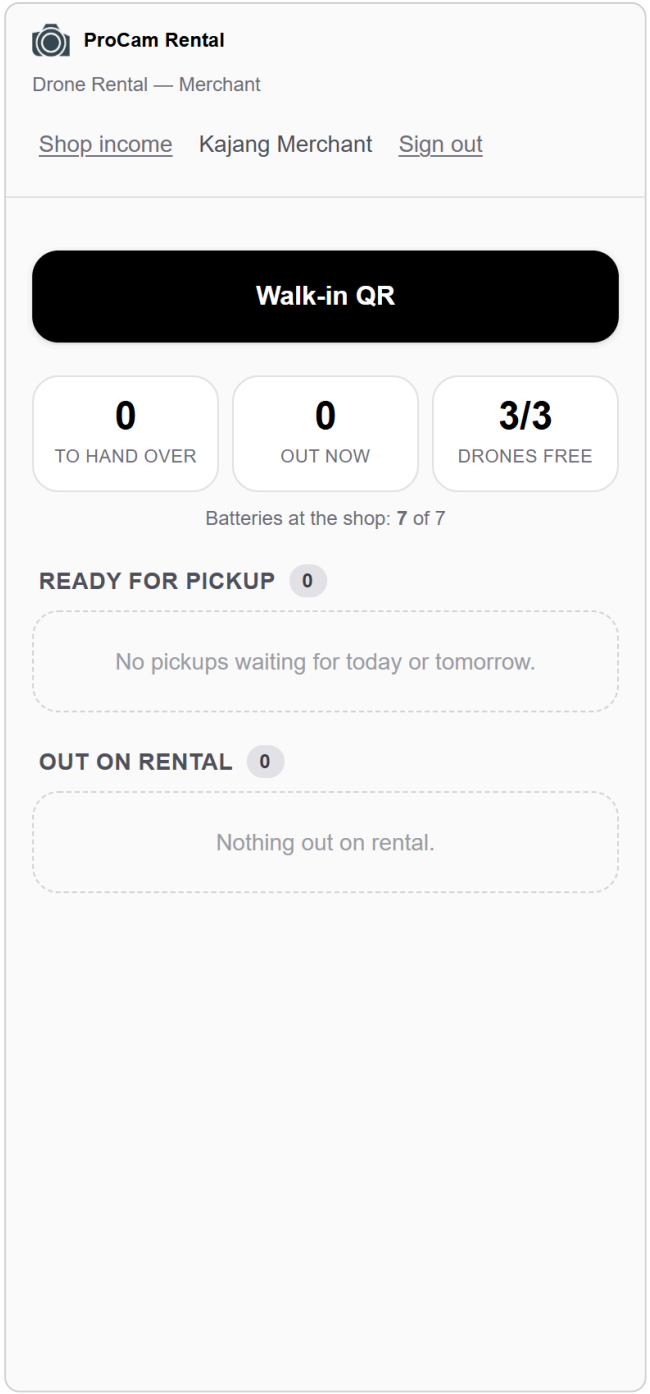

34

WALK-IN CUSTOMER: THE SHOP'S QR

Merchant dashboard

The Walk-in QR button sits at the top.

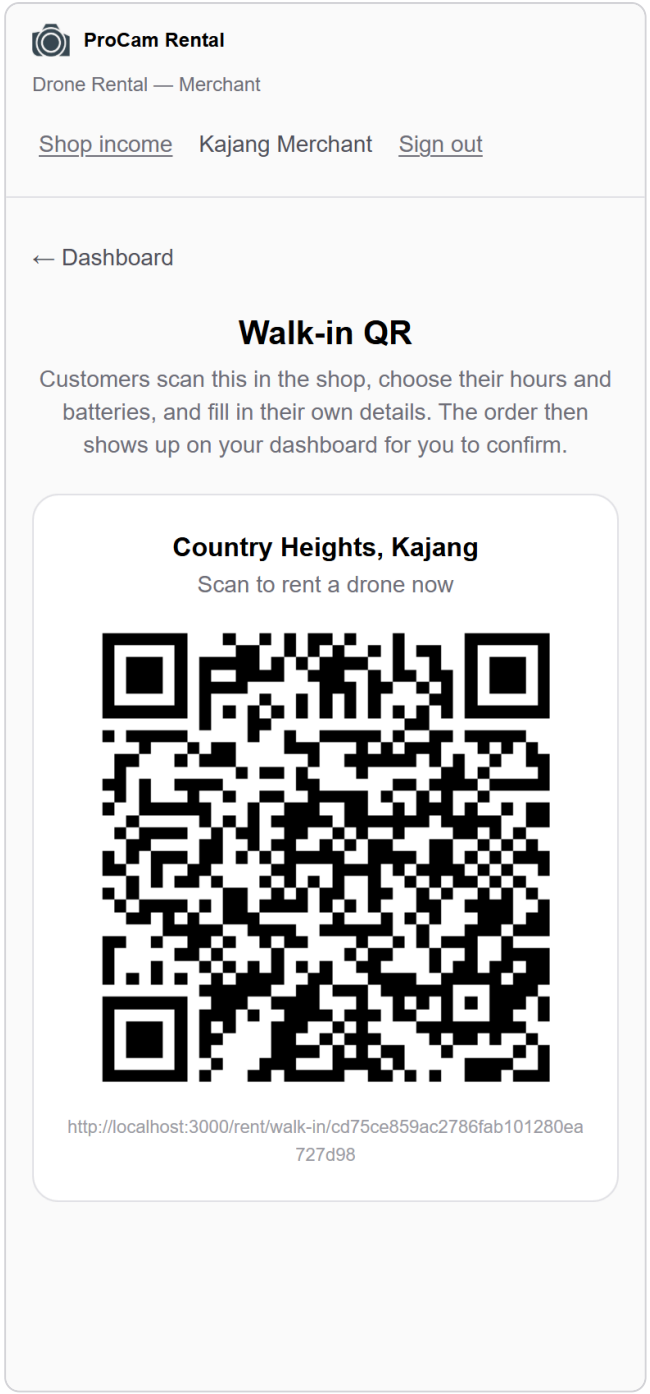

35

WALK-IN CUSTOMER: THE SHOP'S QR

The shop's walk-in QR

Show it on the counter or a screen, or print it. It never changes.

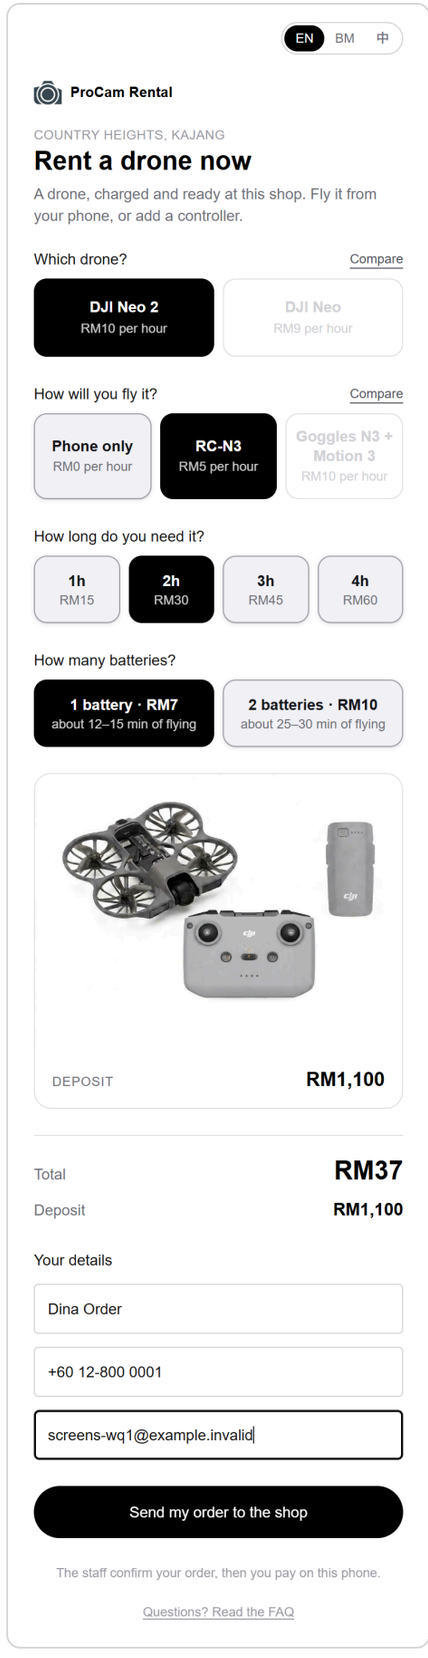

36

WALK-IN CUSTOMER: THE SHOP'S QR

Customer: scans and fills in

Drone, how to fly it, hours, batteries (1 or 2), total and deposit, and their own details.

37

WALK-IN CUSTOMER: THE SHOP'S QR

With the RC-N3

Choosing a controller changes the total and the deposit. A controller already out on another rental is not offered.

ProCam Rental

Send my order to the shop

The staff confirm your order, then you pay on this phone.

39

WALK-IN CUSTOMER: THE SHOP'S QR

Customer: waiting for the shop

Moves on to payment by itself once the merchant confirms.

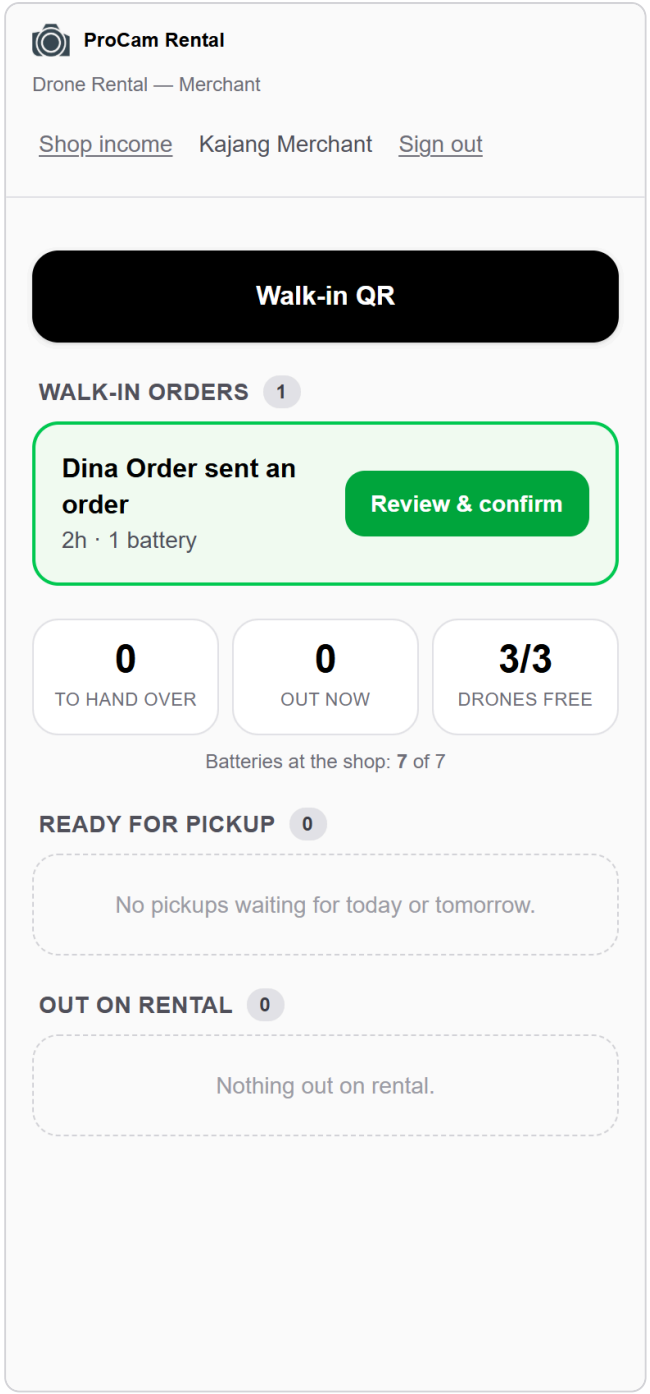

40

WALK-IN CUSTOMER: THE SHOP'S QR

Merchant: order arrives

A green Walk-in orders box with Review & confirm.

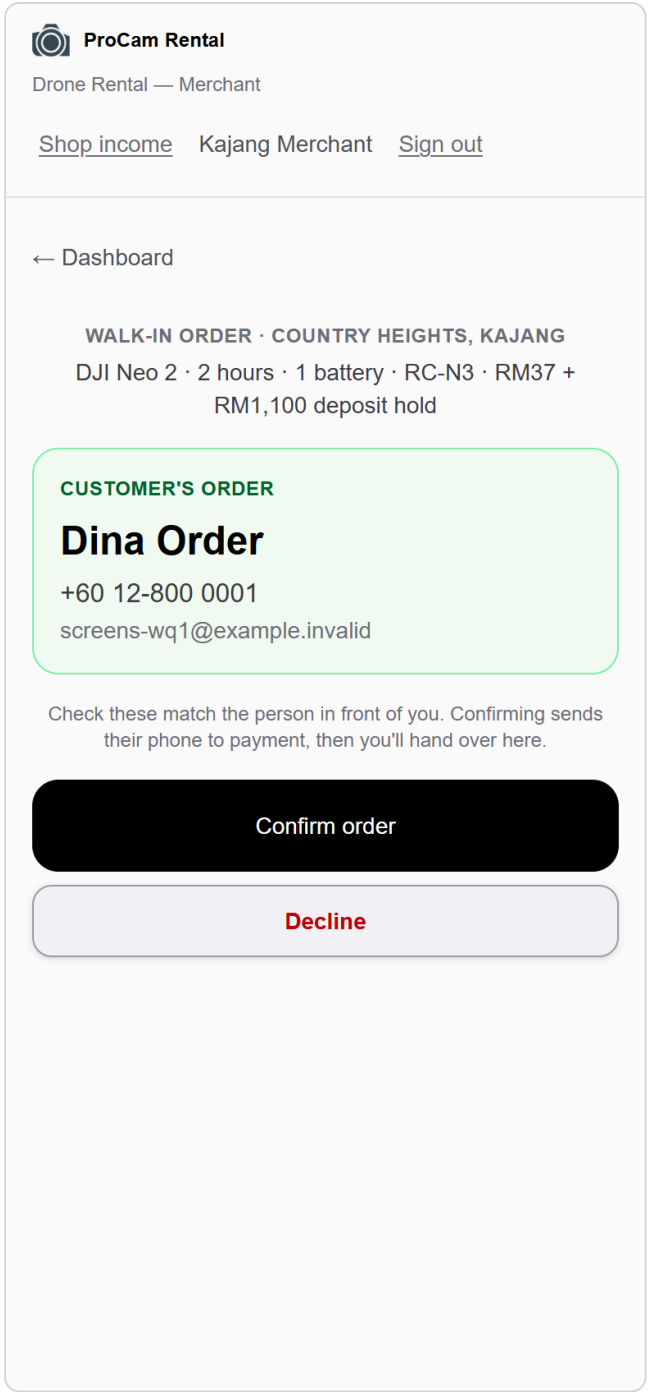

41

WALK-IN CUSTOMER: THE SHOP'S QR

Merchant: confirm the order

Check the name against the person in front of you. There is no drone to choose: confirming assigns any free one automatically. Confirm order or Decline.

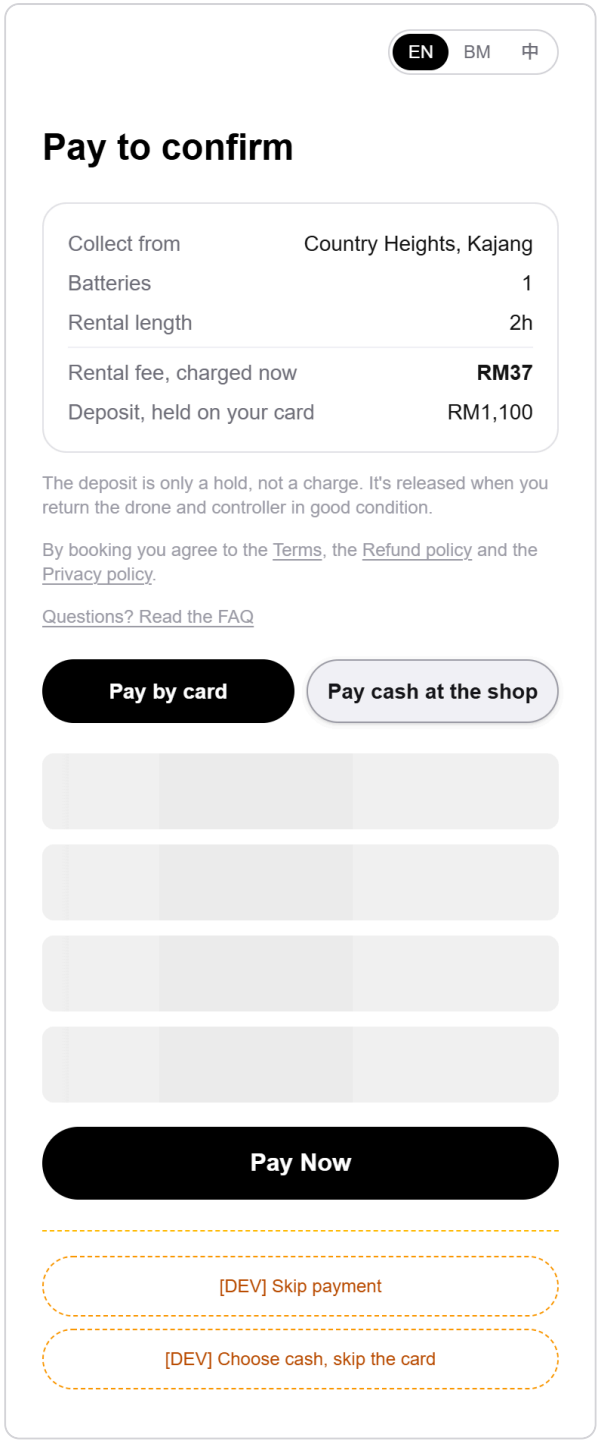

42

WALK-IN CUSTOMER: THE SHOP'S QR

Customer: pays

Their phone is now on the payment page. They choose Pay by card or Pay cash at the shop (the cash route is shown in the next section).

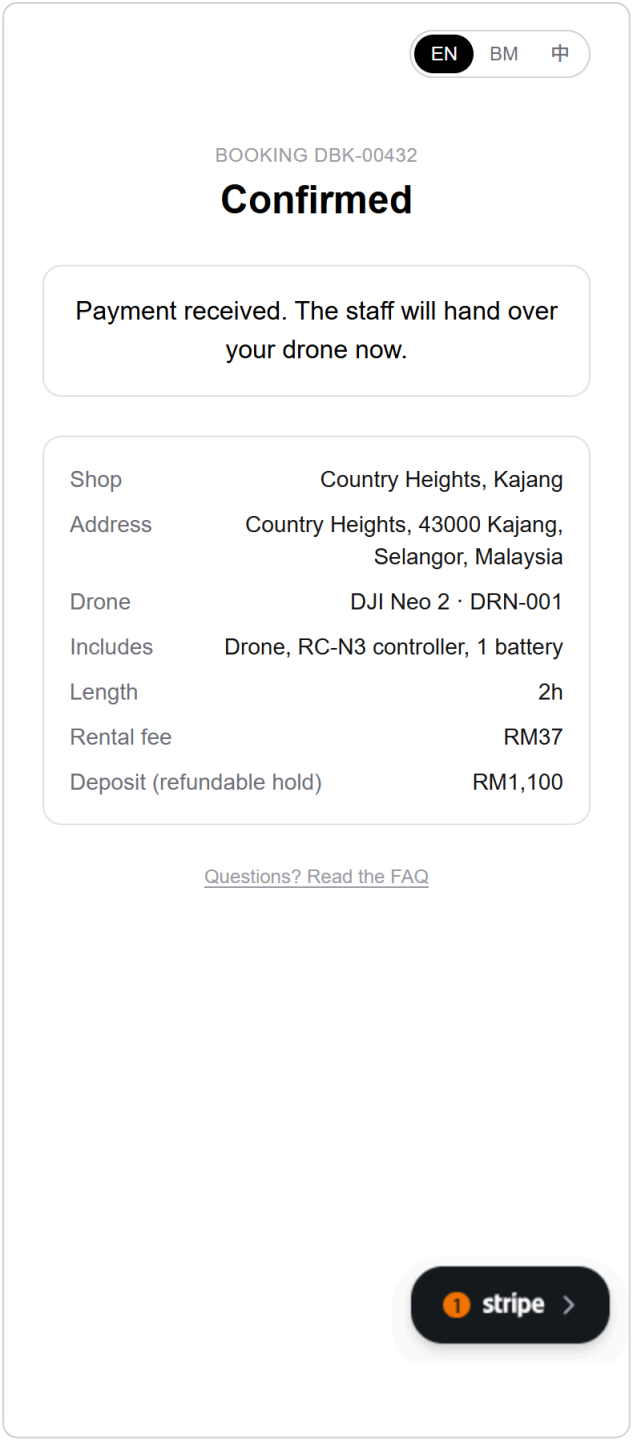

43

WALK-IN CUSTOMER: THE SHOP'S QR

Customer: confirmed

Payment received.

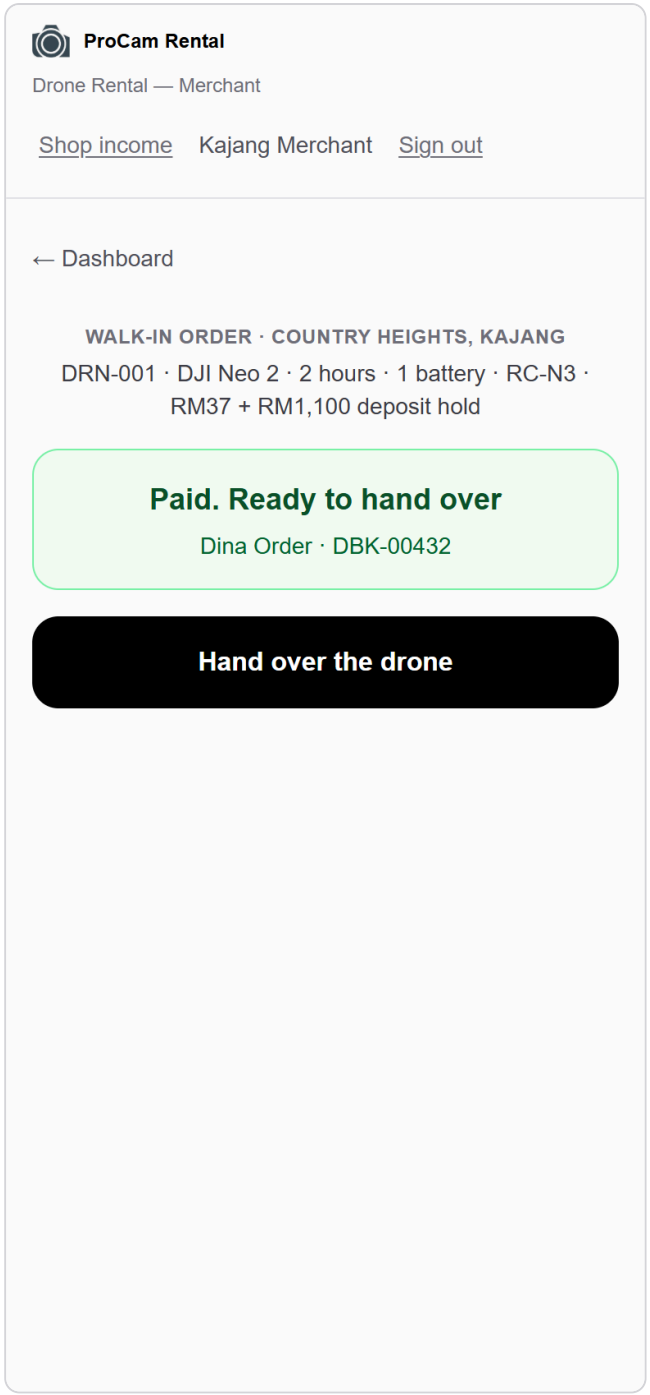

44

WALK-IN CUSTOMER: THE SHOP'S QR

Merchant: paid

Ready to hand over.

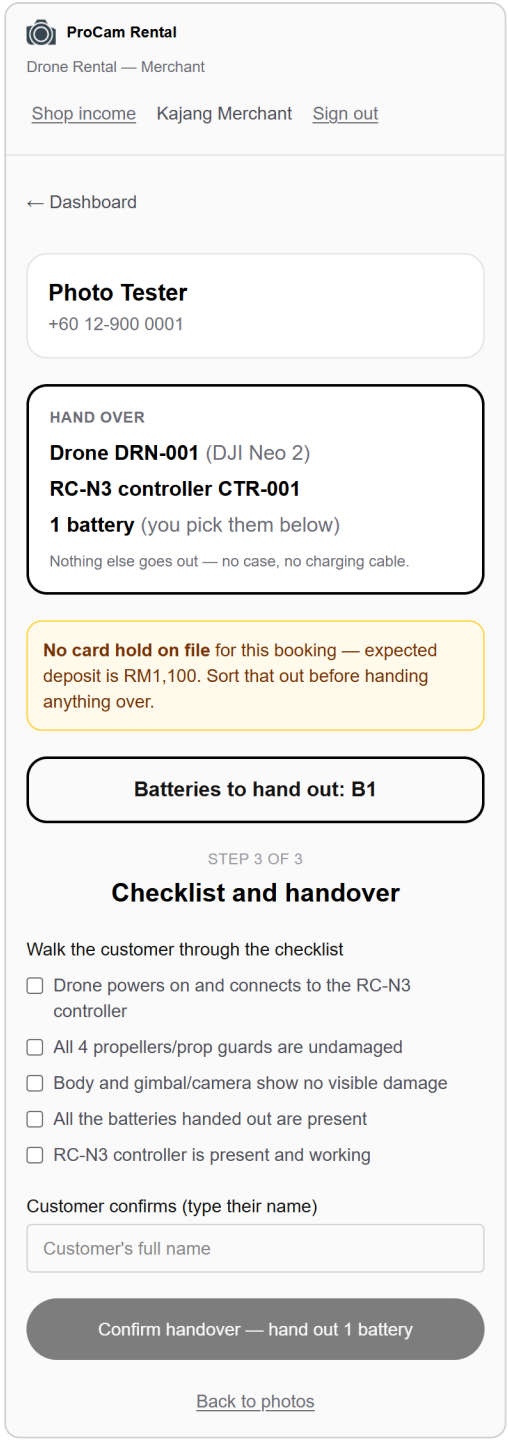

45

WALK-IN CUSTOMER: THE SHOP'S QR

Merchant: checklist and handover

After the two photos: the checklist and the customer's typed name, then Confirm handover. It says how many batteries to hand out.

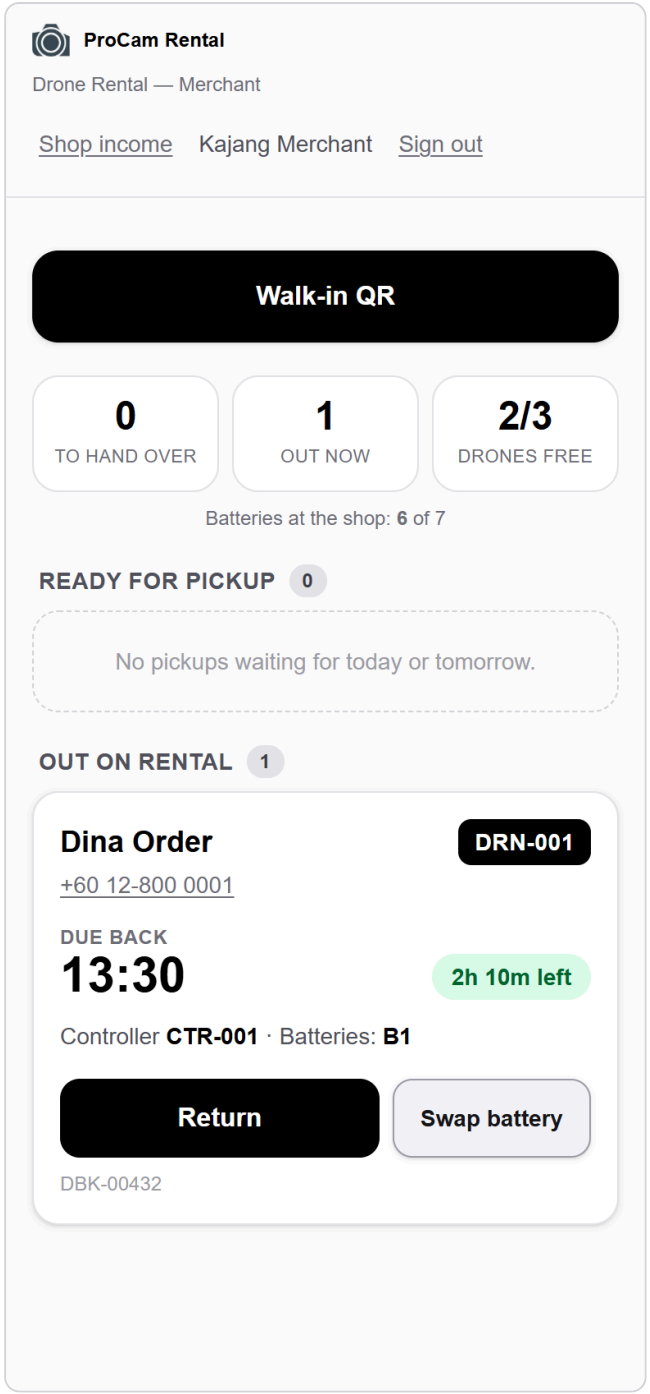

46

WALK-IN CUSTOMER: THE SHOP'S QR

Out on rental

Due back is rounded to the next half hour mark.

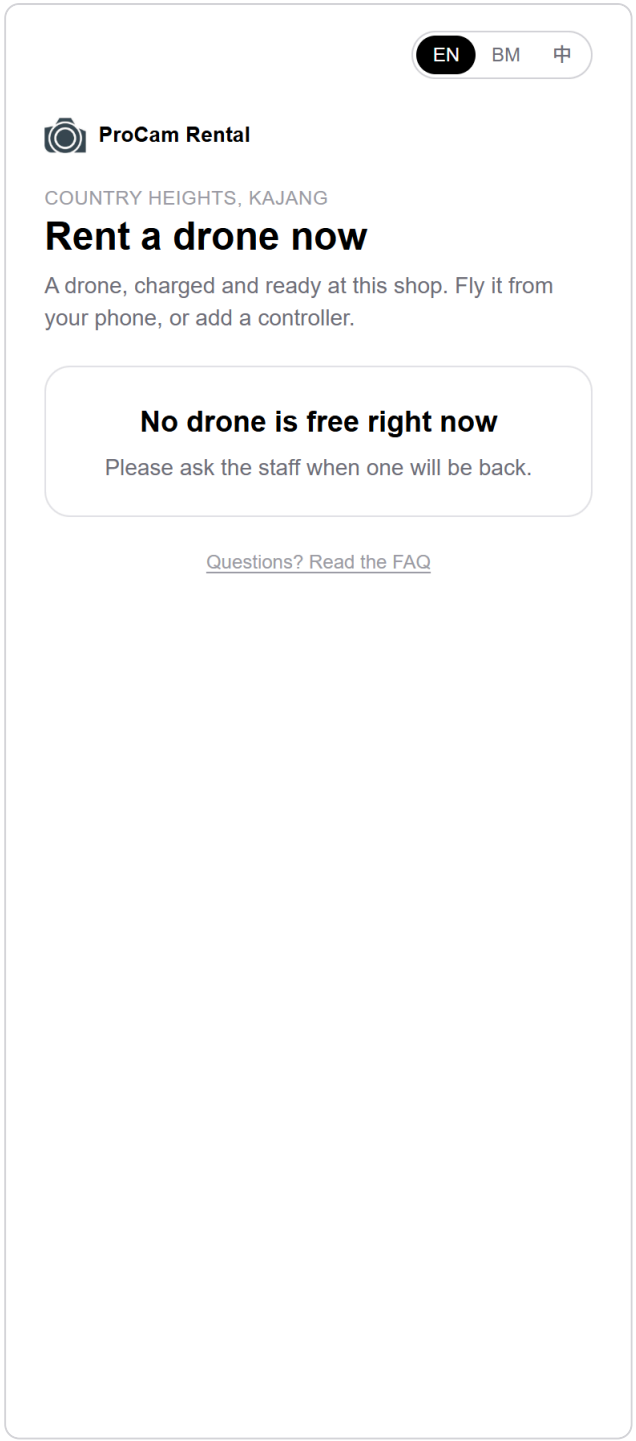

47

WALK-IN CUSTOMER: THE SHOP'S QR

When no drone is free

The customer is told, and there is no form.

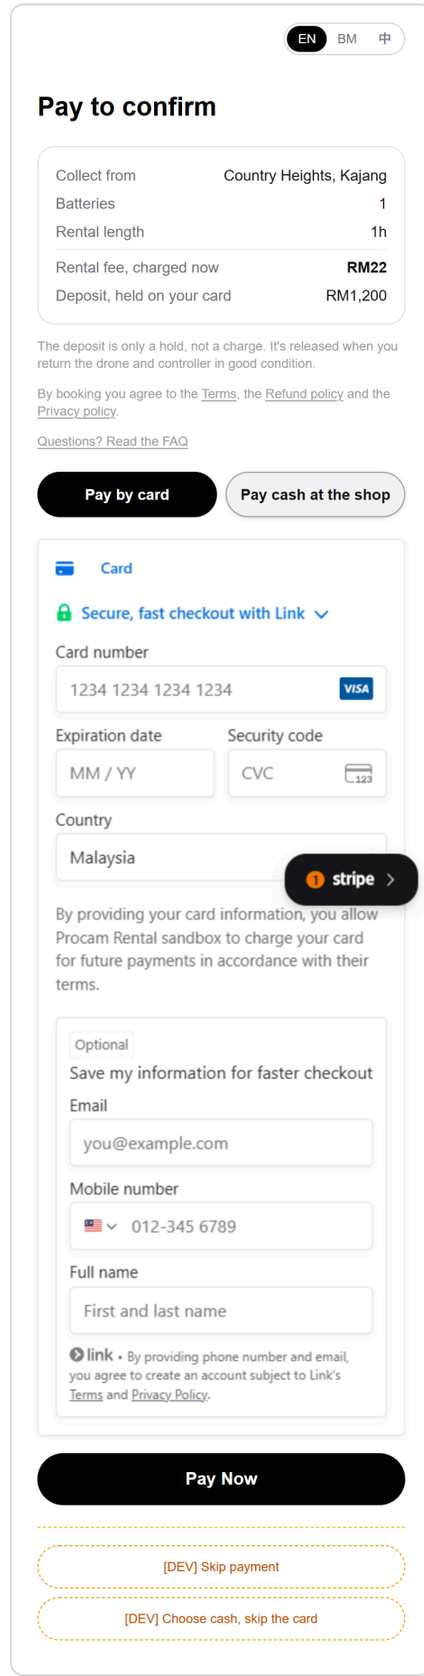

48

CASH OR CARD, ONE PAYMENT AT A TIME

Customer: pay by card or cash

A walk-in customer's payment page offers Pay by card or Pay cash at the shop. (The card form itself is Stripe's and isn't shown on this test copy.)

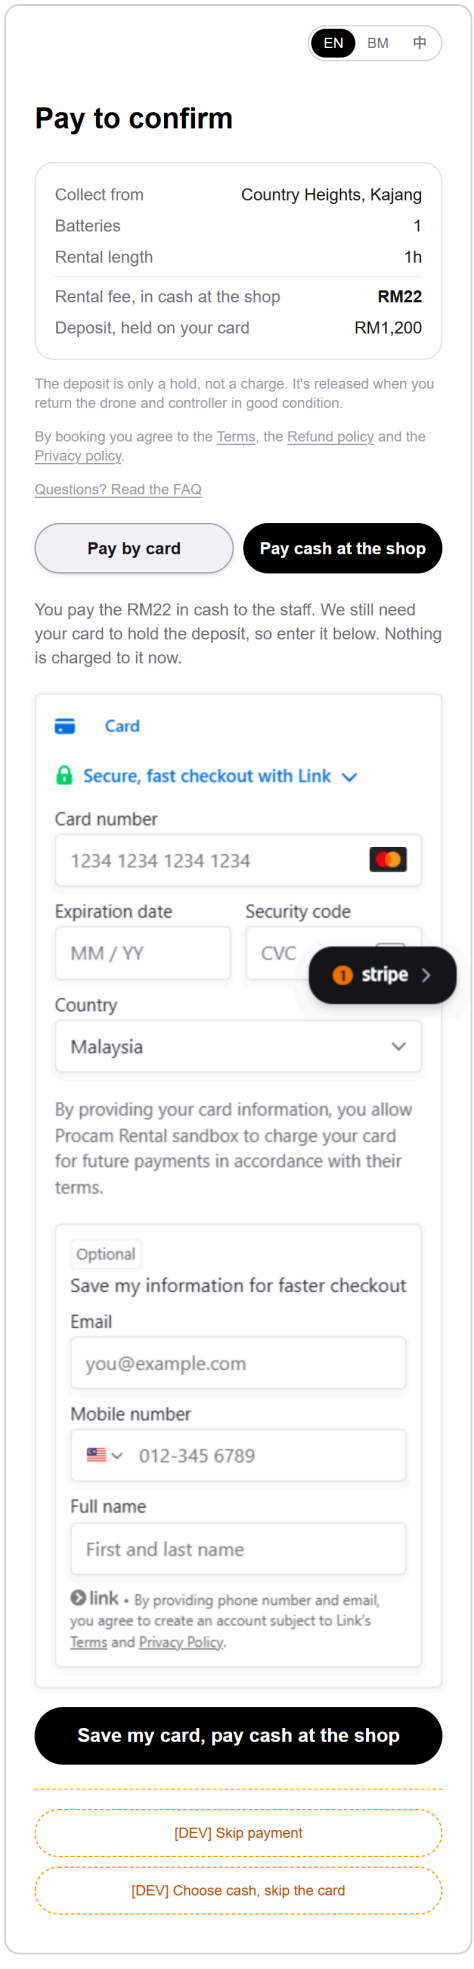

49

CASH OR CARD, ONE PAYMENT AT A TIME

Customer: cash tab

The rental fee is paid in cash at the shop. The card is still entered, to hold the deposit. Nothing is charged to it now.

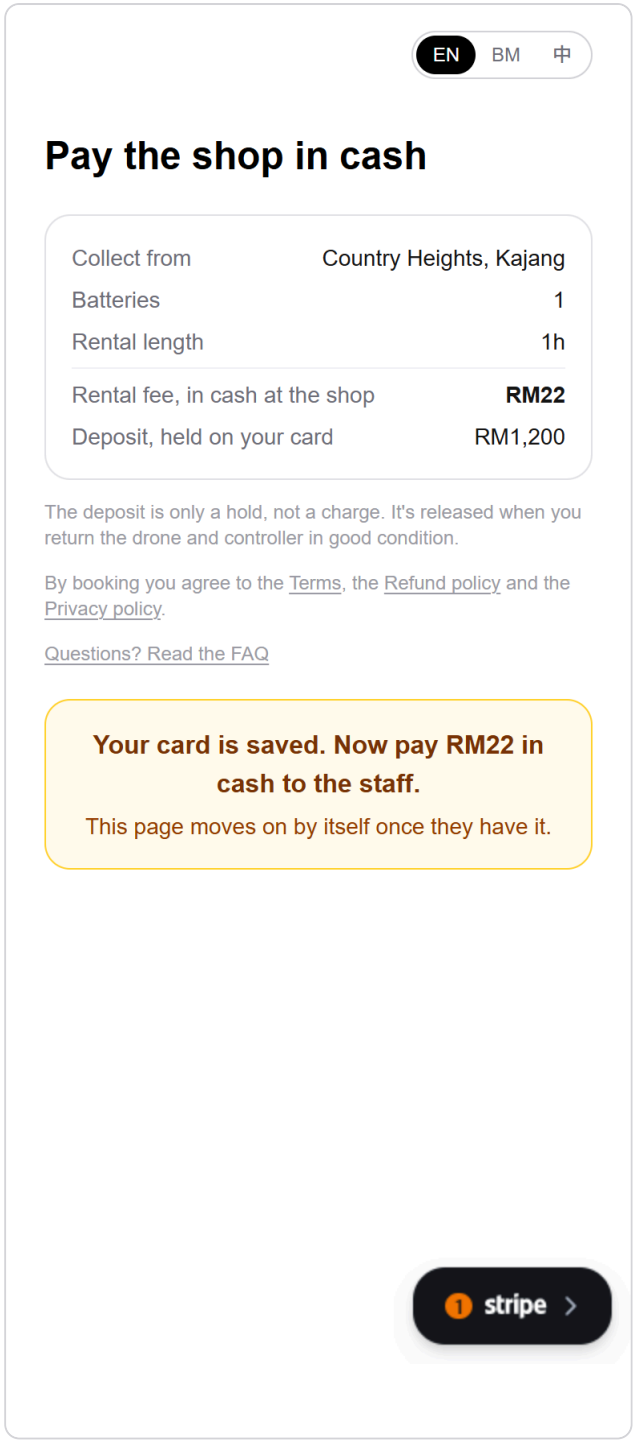

50

CASH OR CARD, ONE PAYMENT AT A TIME

Customer: card saved, pay the staff

Their phone waits and moves on by itself once the shop has the cash.

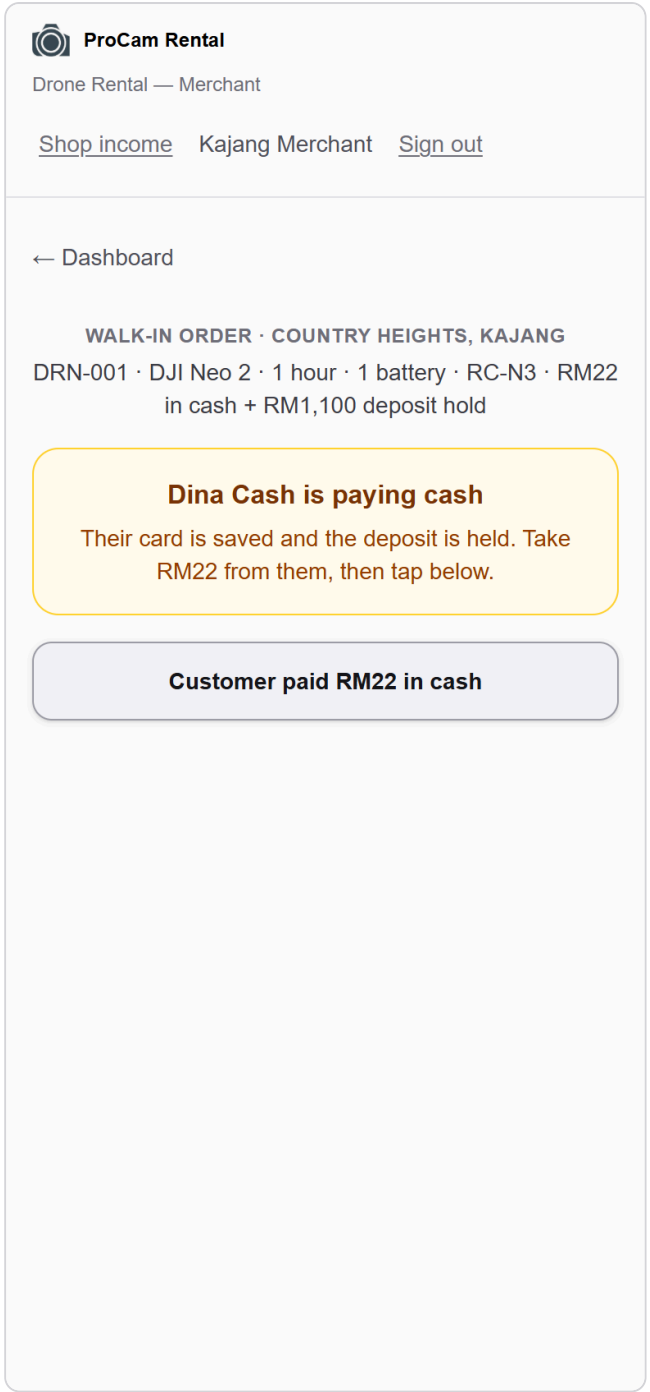

51

CASH OR CARD, ONE PAYMENT AT A TIME

Merchant: the customer is paying cash

Shows that the card is saved and the deposit is held. The merchant takes the cash, then taps the button.

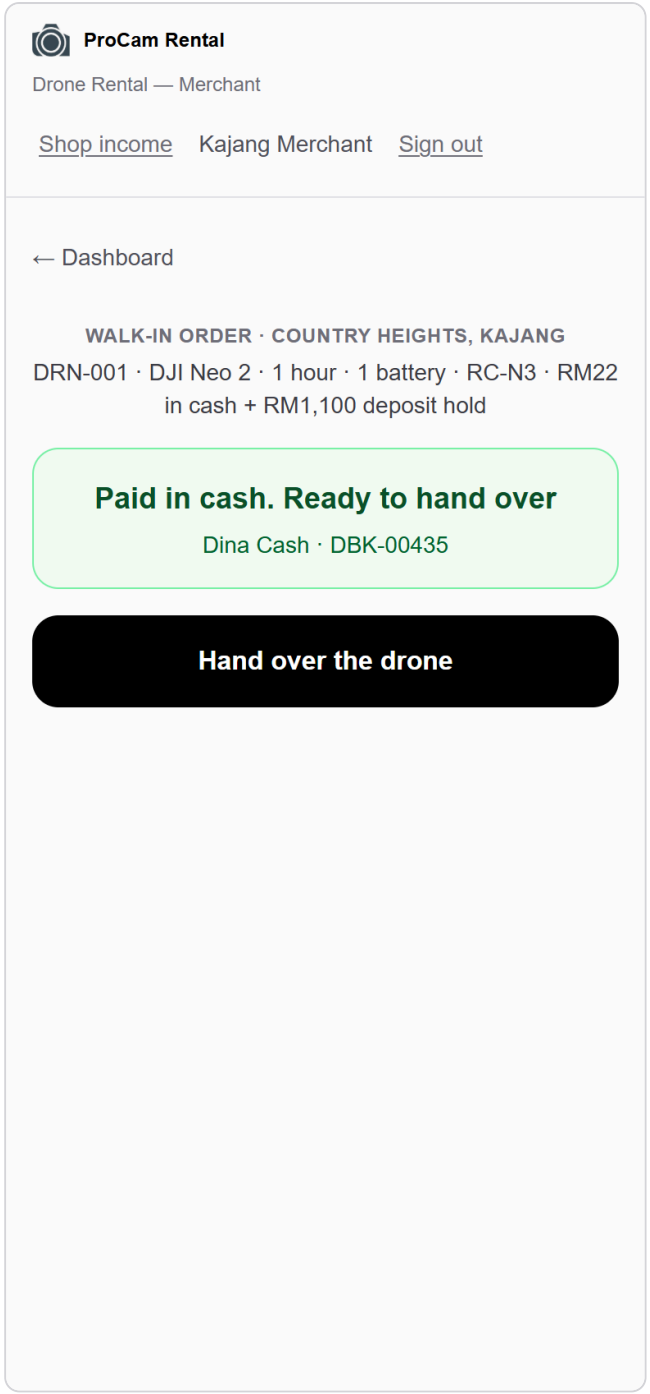

52

CASH OR CARD, ONE PAYMENT AT A TIME

Merchant: paid in cash

The order is confirmed and goes straight to handover.

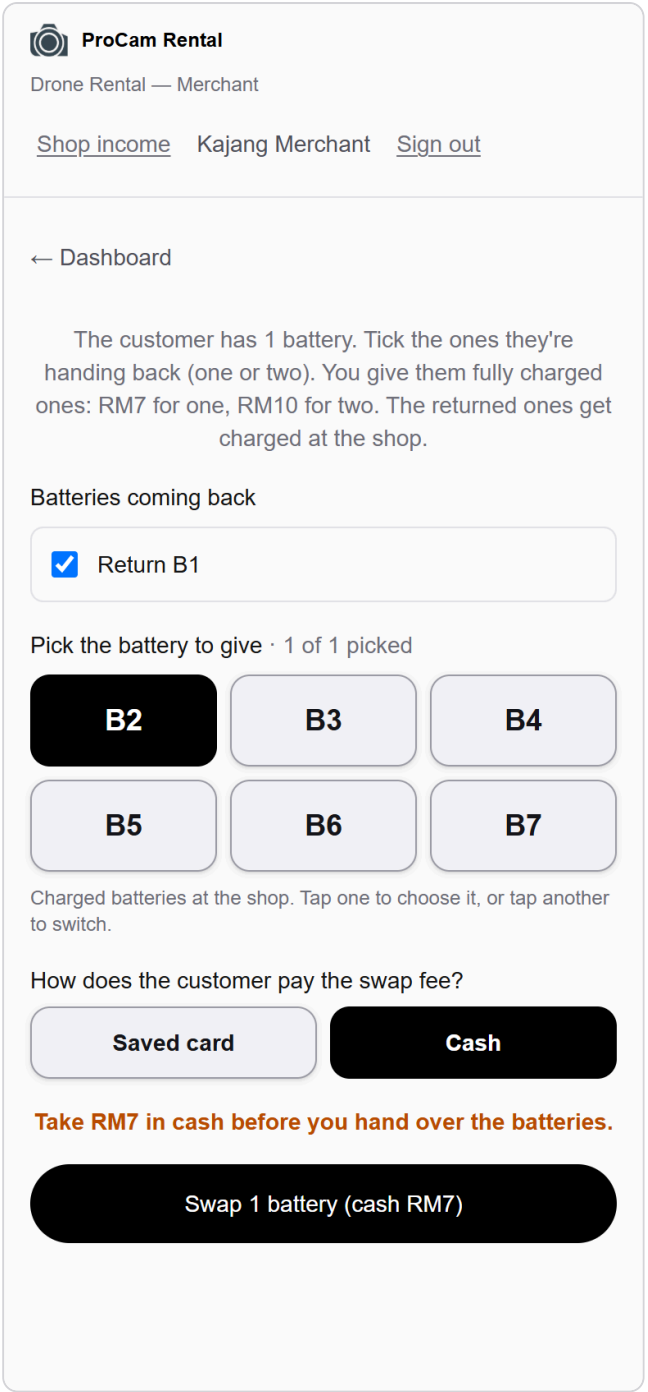

53

CASH OR CARD, ONE PAYMENT AT A TIME

Swap: paid in cash

Choosing Cash for this swap says to take the money first. The rental fee and the swap are independent: either can be card or cash.

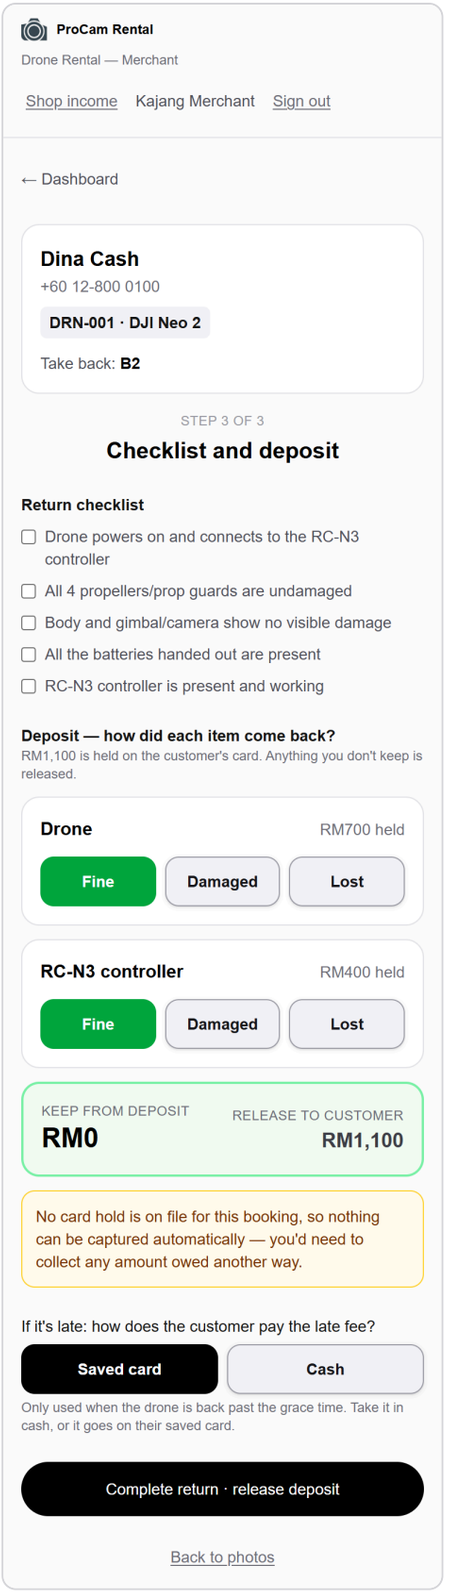

54

CASH OR CARD, ONE PAYMENT AT A TIME

Return: late fee by card or cash

The same choice for a late fee, only used if the drone is back past the grace time.

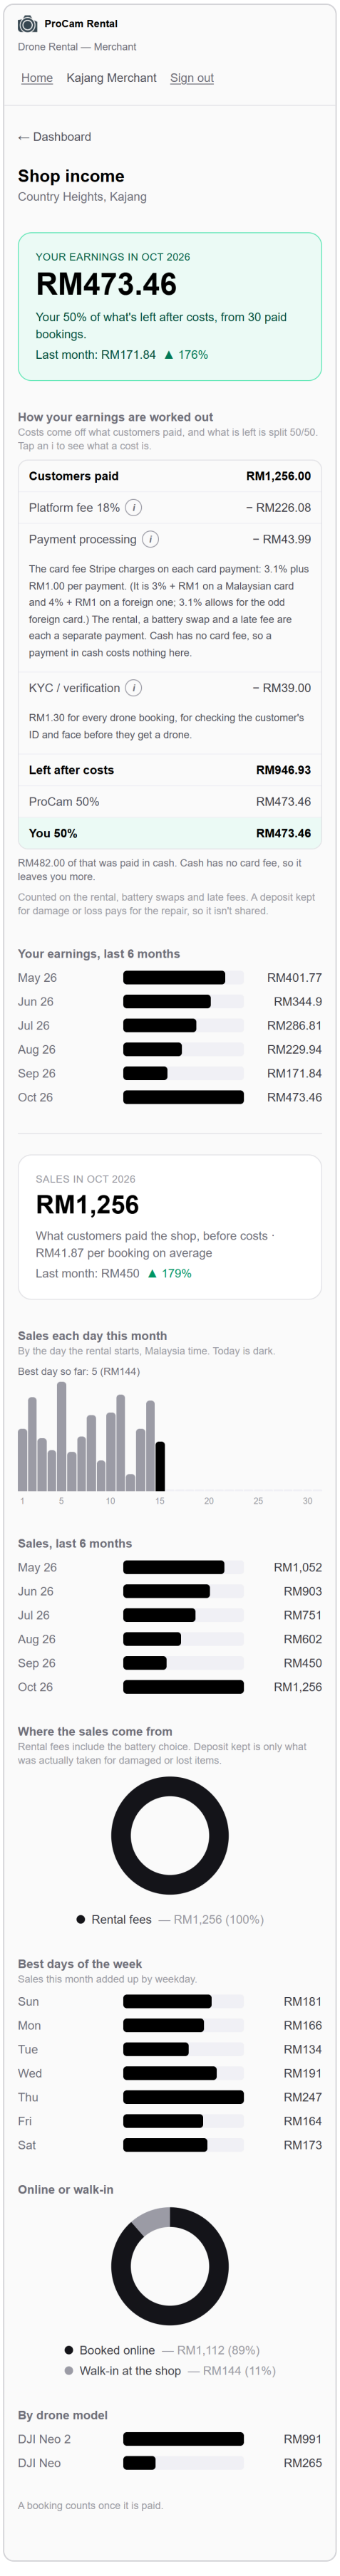

55

MERCHANT: SHOP INCOME

Shop income

Your earnings this month on top, how they are worked out line by line (tap an i for what each cost is; two are open here), earnings for the last 6 months, then the sales analysis: sales this month, each day, the last 6 months, where the sales come from, best weekdays, online or walk-in, and by drone model.

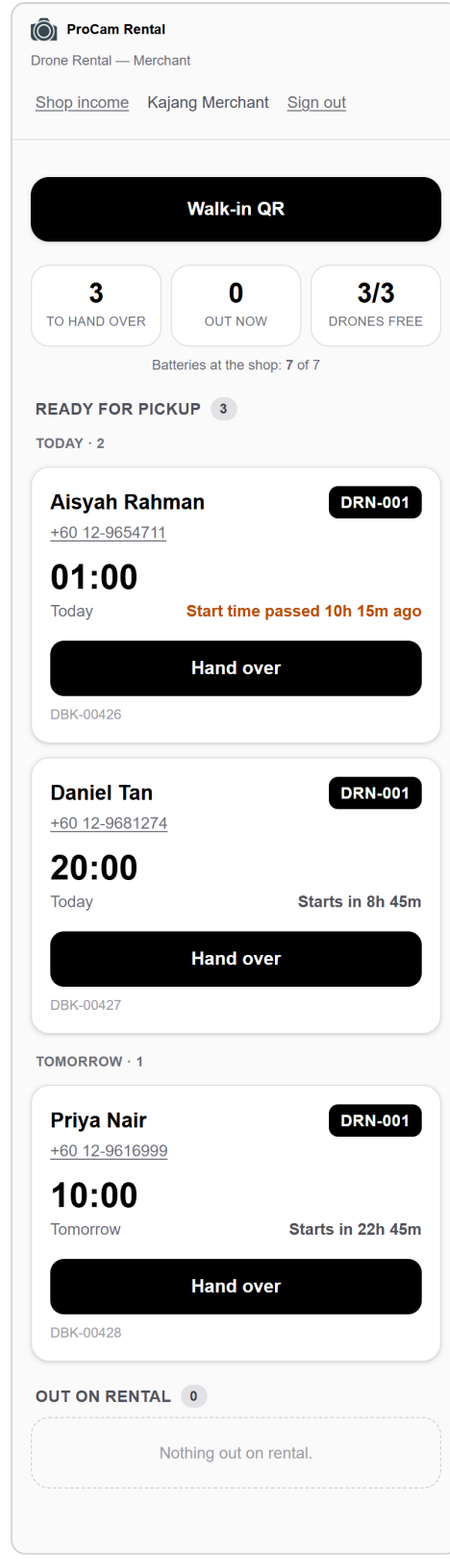

56

MERCHANT: TODAY AND TOMORROW, AND NAMED BATTERIES

Pickups: today, then tomorrow

Soonest first within each day. Later bookings and old uncollected ones are not listed.

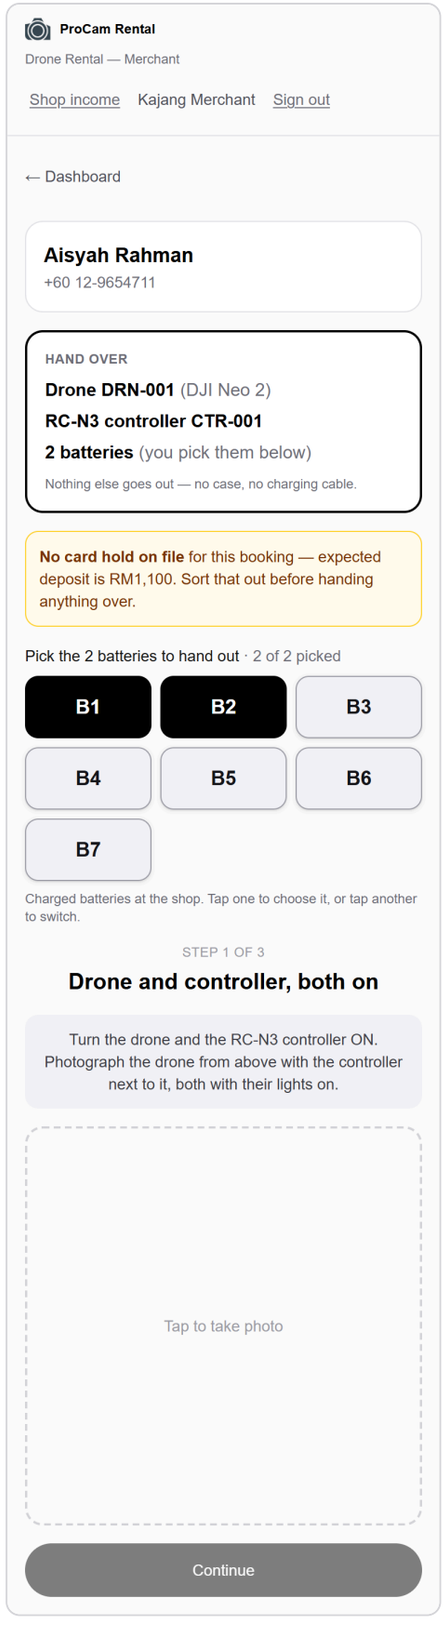

57

MERCHANT: TODAY AND TOMORROW, AND NAMED BATTERIES

Handover: which batteries to give

The batteries are named, with the one that goes in the drone first. If one is taken in the meantime, the handover stops and asks for a refresh.

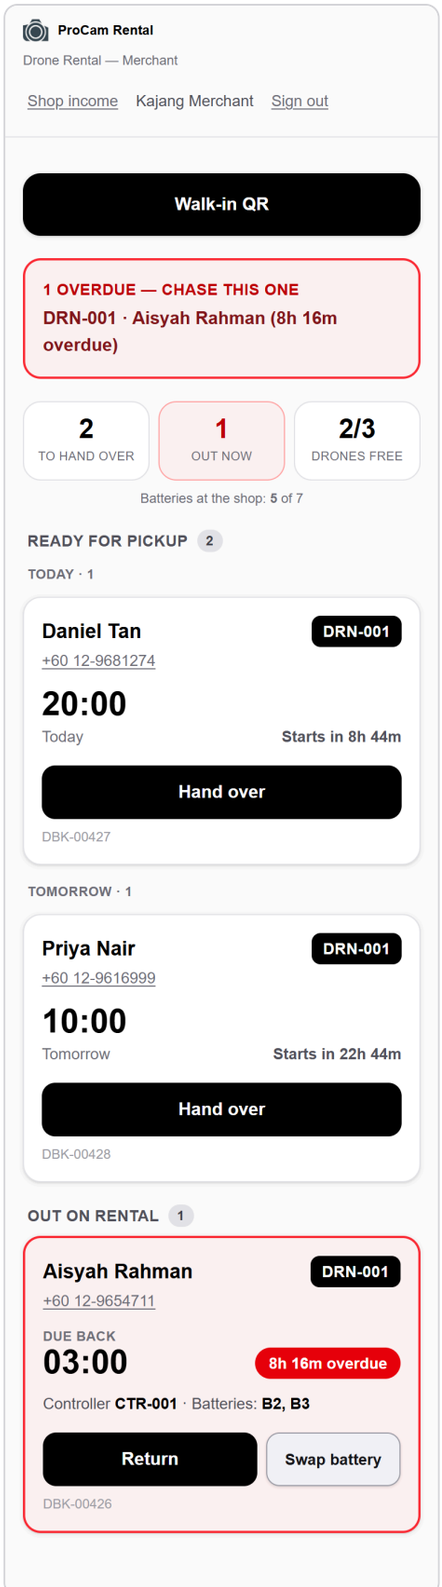

58

MERCHANT: TODAY AND TOMORROW, AND NAMED BATTERIES

Out on rental

Each rental lists the batteries the customer is holding.

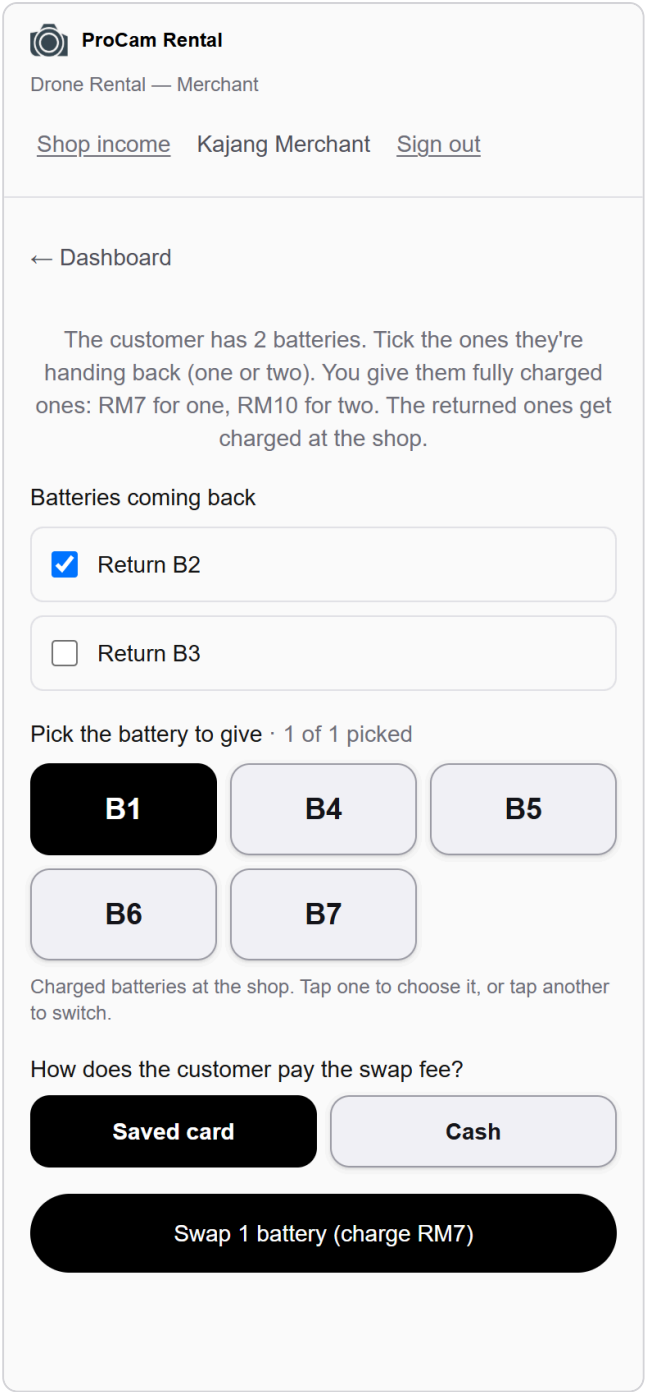

59

MERCHANT: TODAY AND TOMORROW, AND NAMED BATTERIES

Swap: take back and give

Tick what comes back, then tap the charged battery to give. As many are picked as are swapped (one for one, two for two). The first ones are picked to start, tapping another switches, and nothing reloads. Below, the merchant chooses how the customer pays for this swap: saved card or cash.

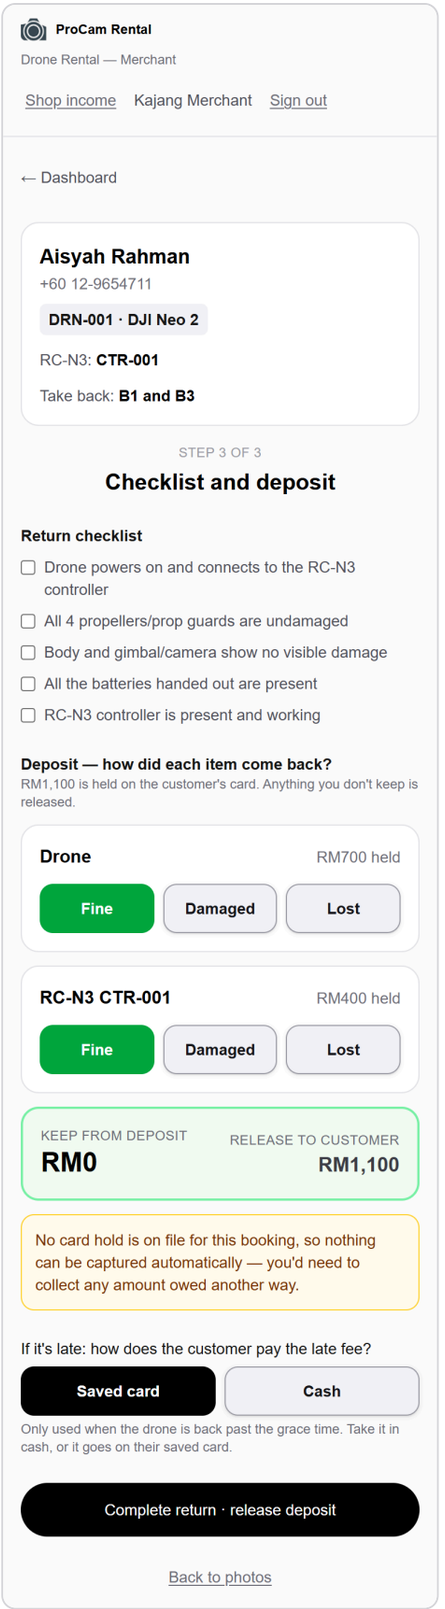

60

MERCHANT: TODAY AND TOMORROW, AND NAMED BATTERIES

Return: which batteries to take back

Named at the top of the return screen. Near the bottom, the merchant also chooses how a late fee would be paid, saved card or cash (only used if the drone is late).

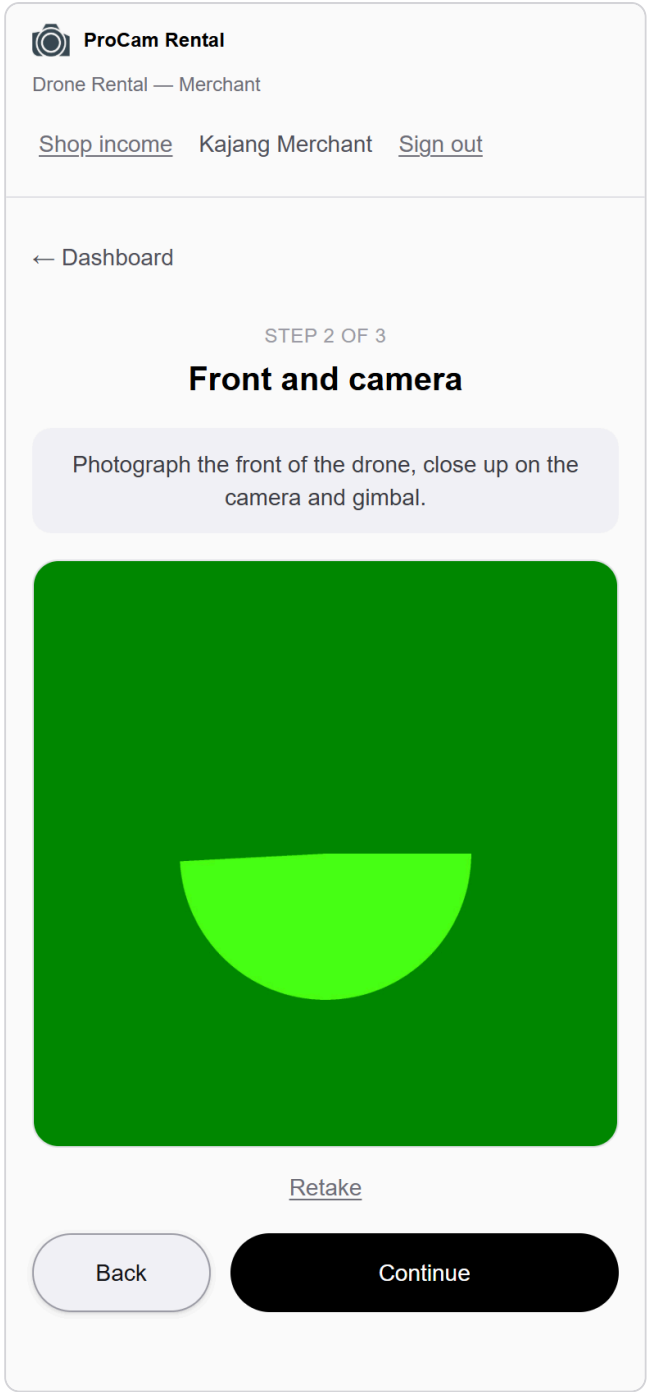

61

MERCHANT: GUIDED PHOTOS, ONE PER PAGE

Photo taken

The photo shows on the page and Continue turns on.

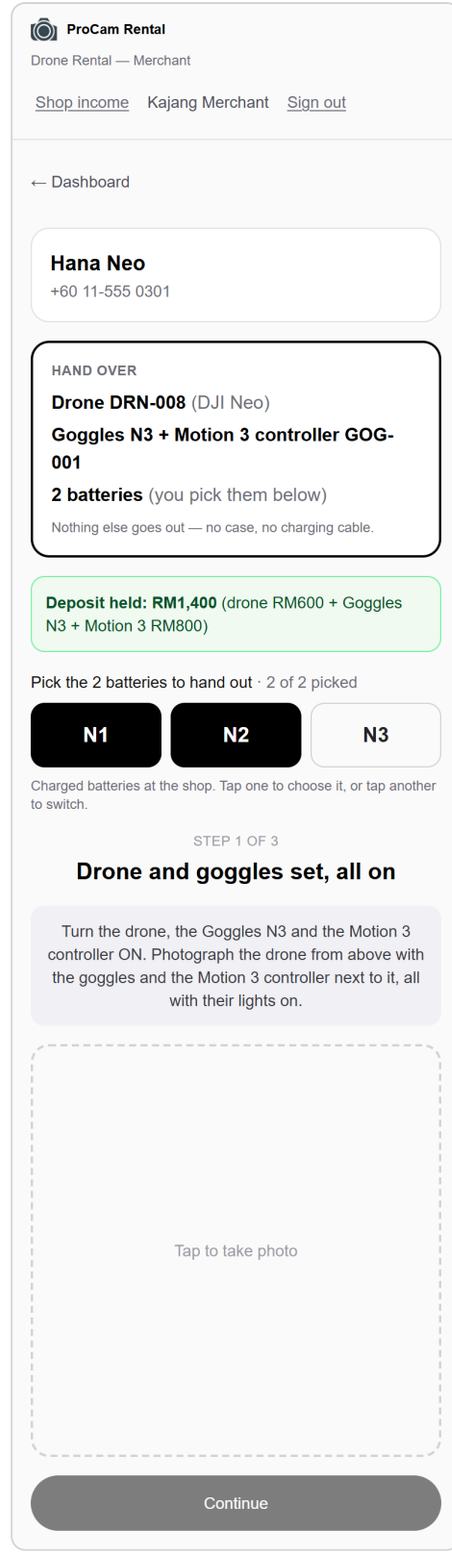

62

MERCHANT: GUIDED PHOTOS, ONE PER PAGE

Goggles handover

A rental with the goggles set shows its number (GOG-001) and the first photo is the drone with the goggles and Motion 3 controller, all on.

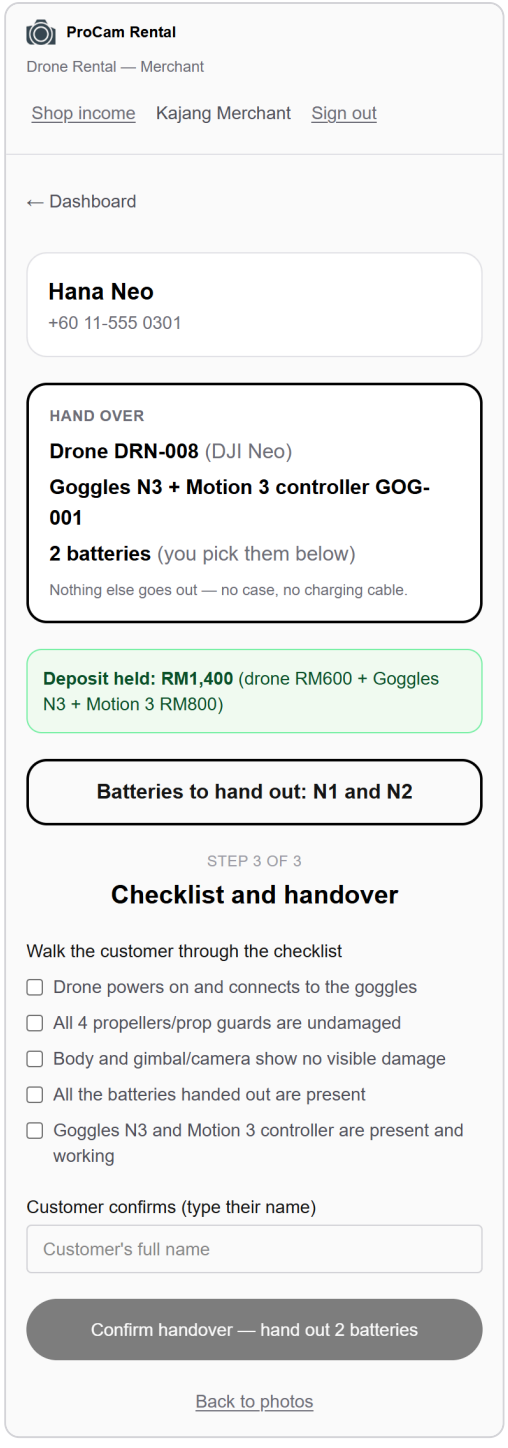

63

MERCHANT: GUIDED PHOTOS, ONE PER PAGE

Goggles checklist

The goggles item replaces the RC-N3 item, and the drone connects to the goggles. A phone-only rental has neither.

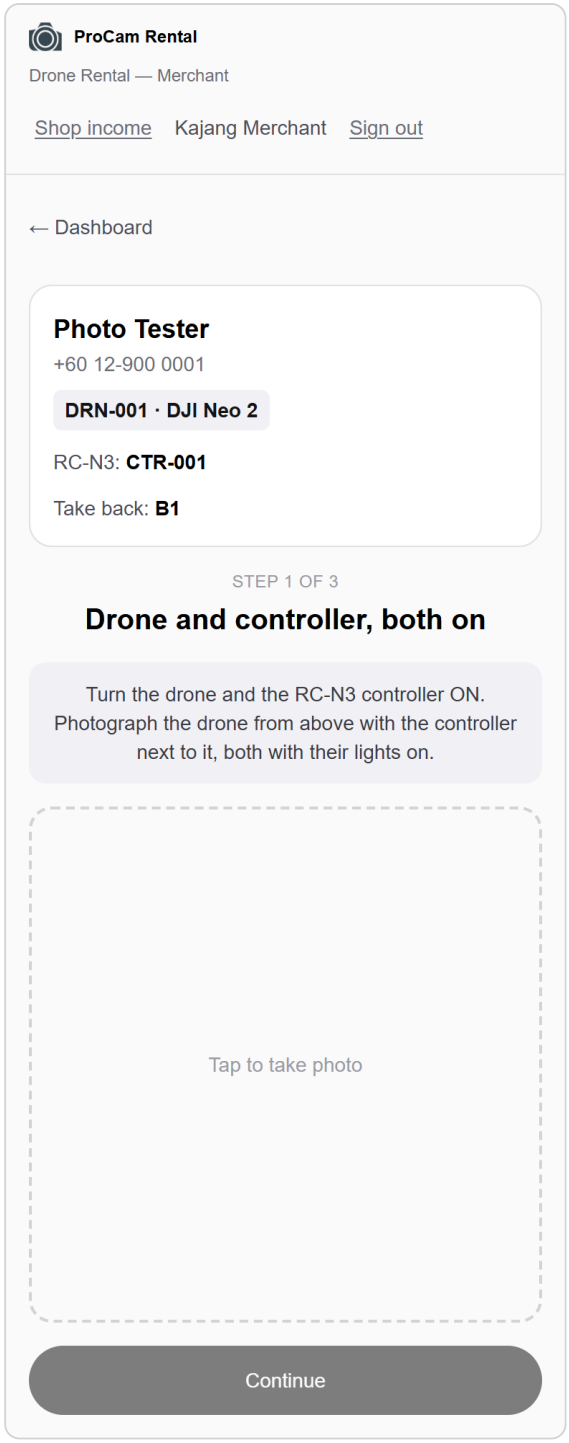

64

MERCHANT: GUIDED PHOTOS, ONE PER PAGE

Return uses the same pages

Same two photos when the drone comes back.

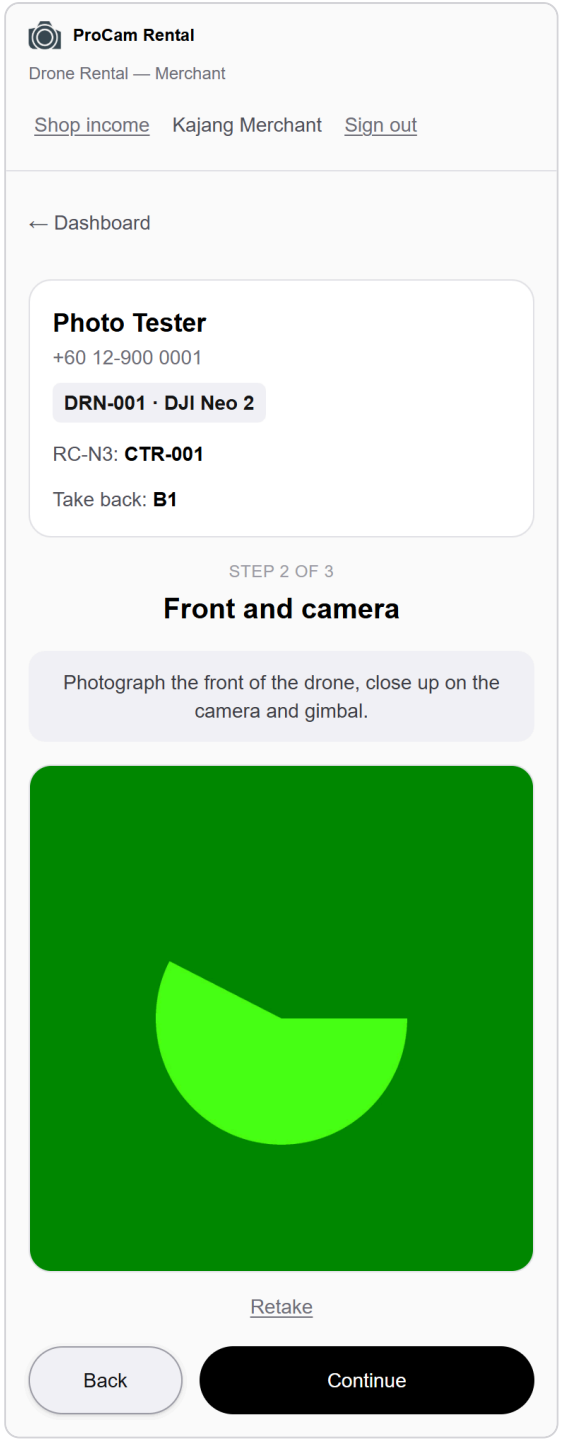

65

MERCHANT: GUIDED PHOTOS, ONE PER PAGE

Return: photo taken

Continue to the next photo.

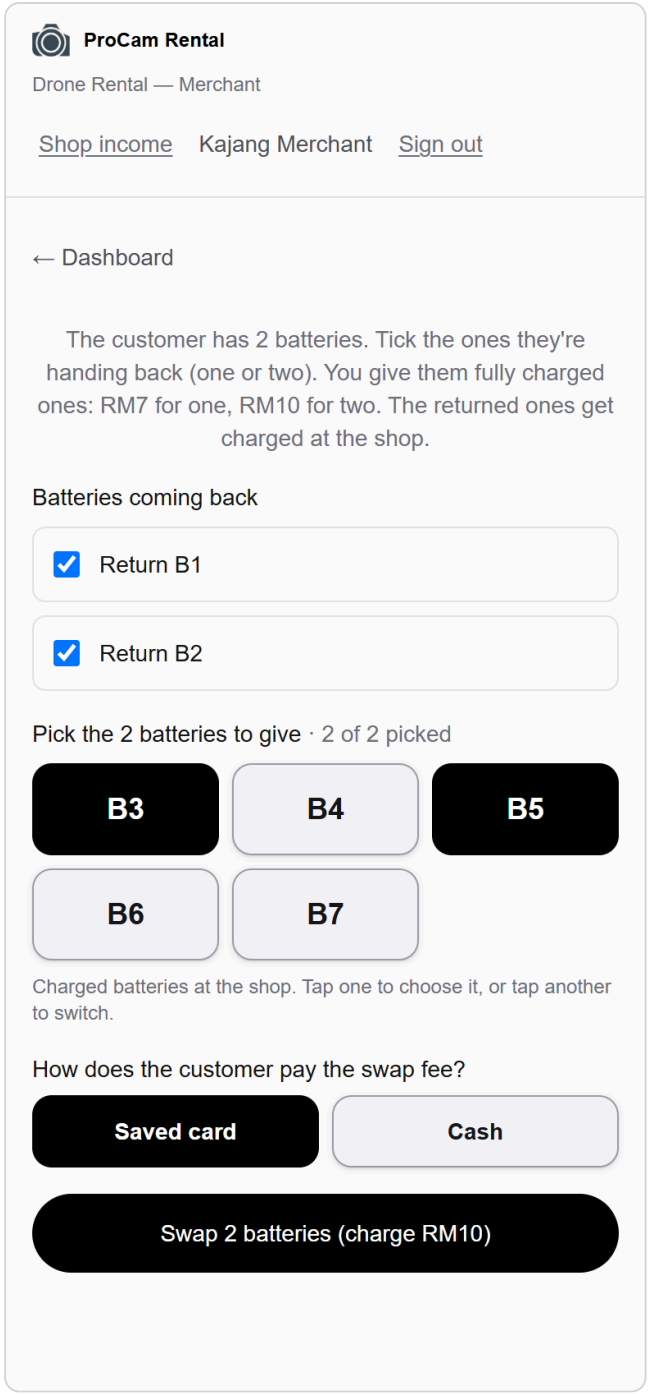

66

MERCHANT: BATTERY SWAP AND RETURN

Battery swap: one or two

Tick the batteries handed back, then tap the two charged batteries to give (tapping a third drops the oldest pick). RM7 for one, RM10 for two, charged once.

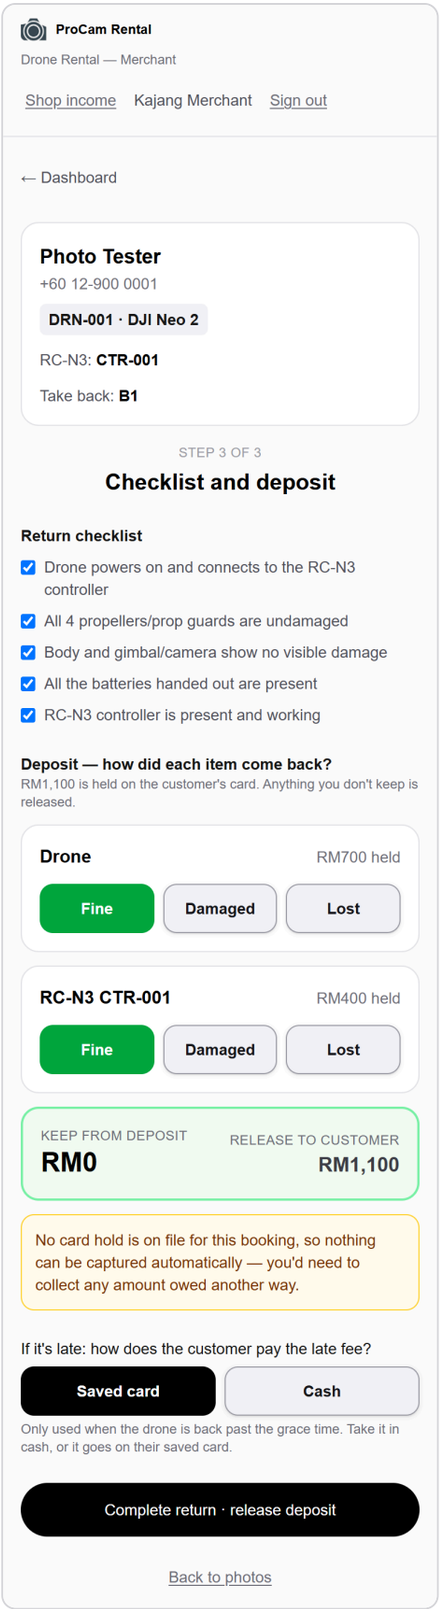

67

MERCHANT: BATTERY SWAP AND RETURN

Return: checklist and deposit

Step 3 of 3 after the two return photos: checklist and the deposit outcome (Fine, Damaged or Lost) for each item. A lost item is kept in full right away.

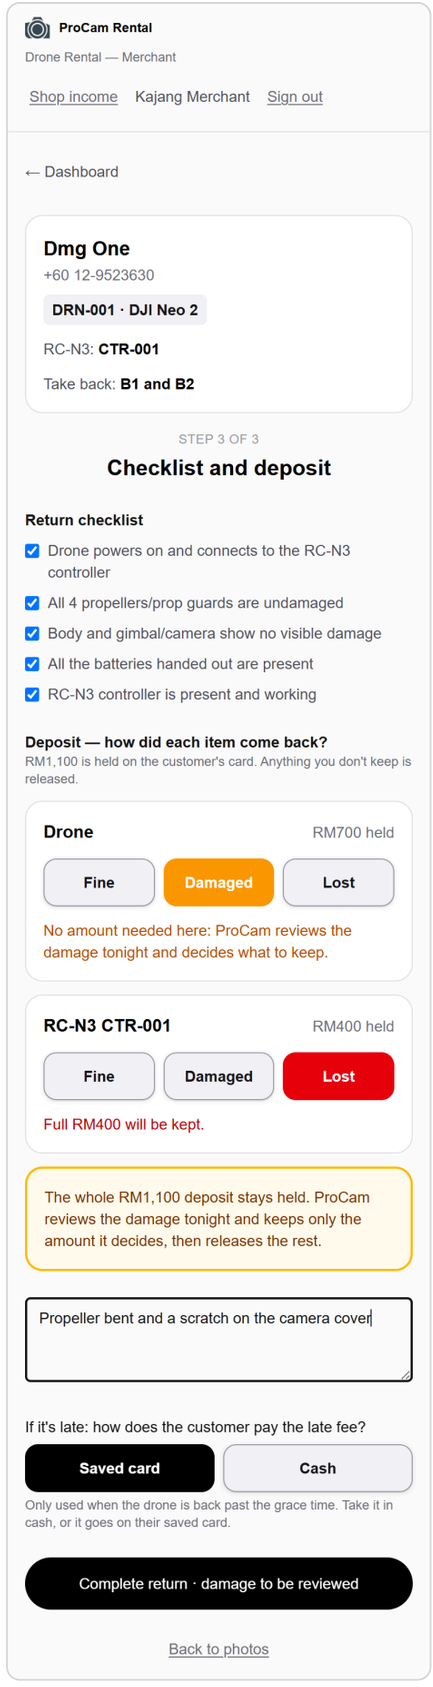

68

MERCHANT: BATTERY SWAP AND RETURN

Return: flag damage

For a damaged item the merchant types no amount, only what is damaged (required). The whole deposit stays held and the return completes; ProCam reviews the damage that night.

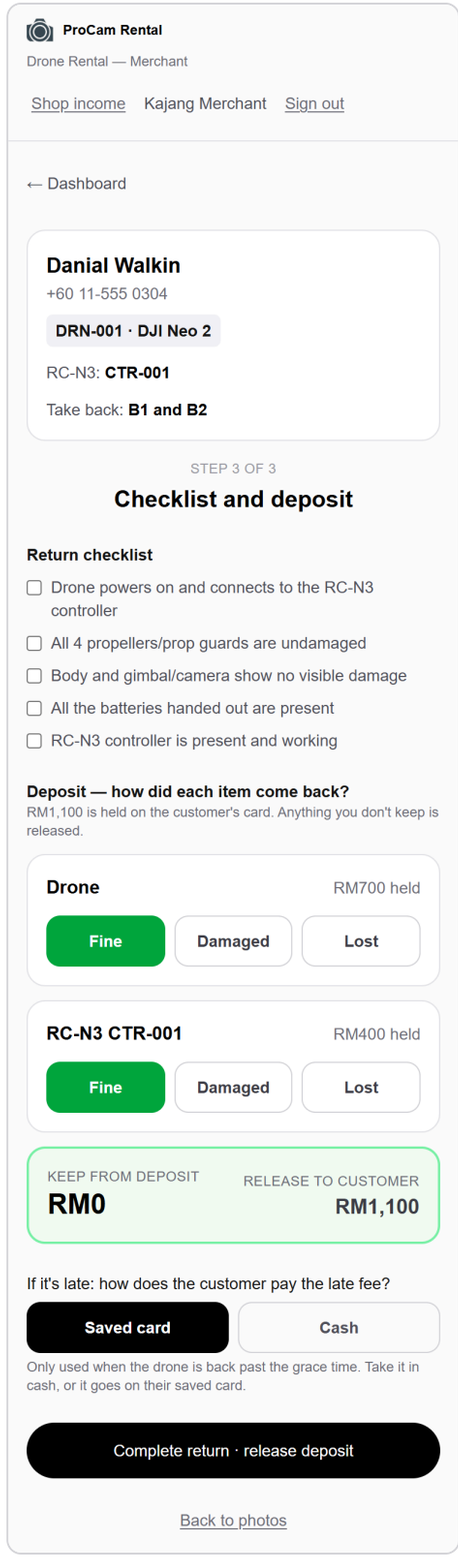

69

MERCHANT: BATTERY SWAP AND RETURN

Return with the RC-N3

The controller to take back is named (CTR-001) and has its own verdict, held at RM400. The goggles set is held at RM800.

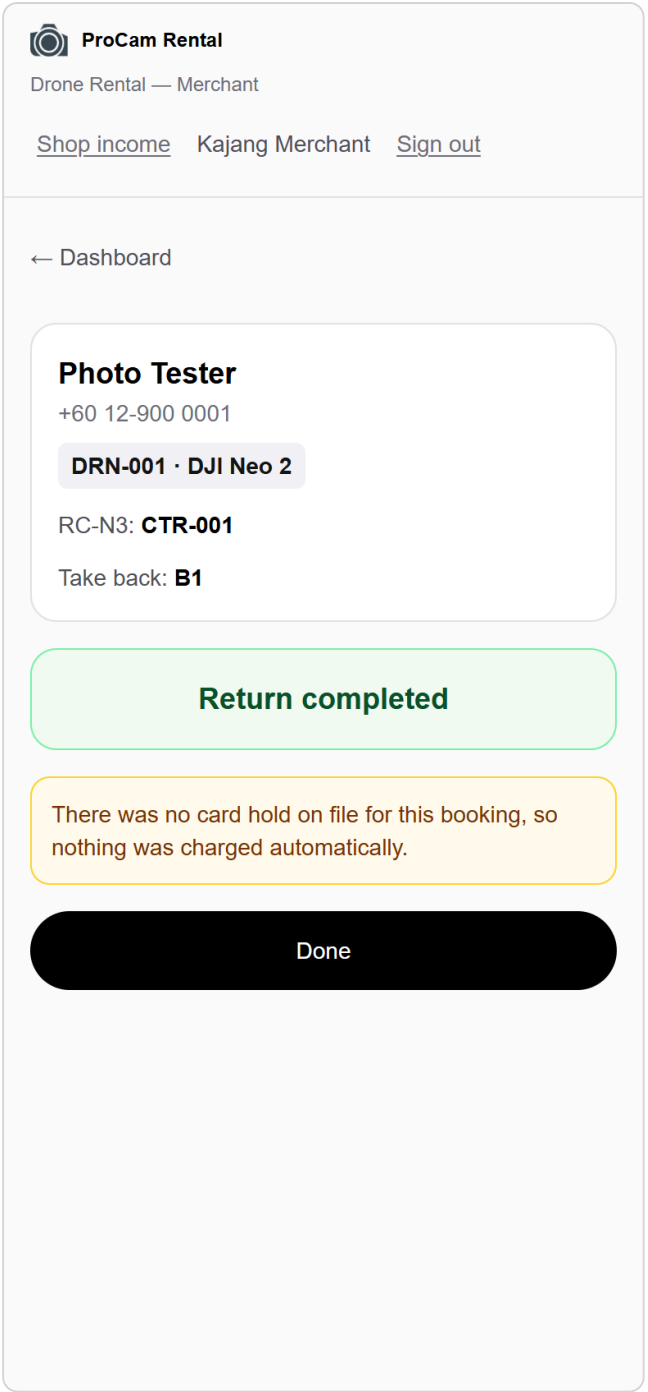

70

MERCHANT: BATTERY SWAP AND RETURN

Return complete

Confirms the outcome.

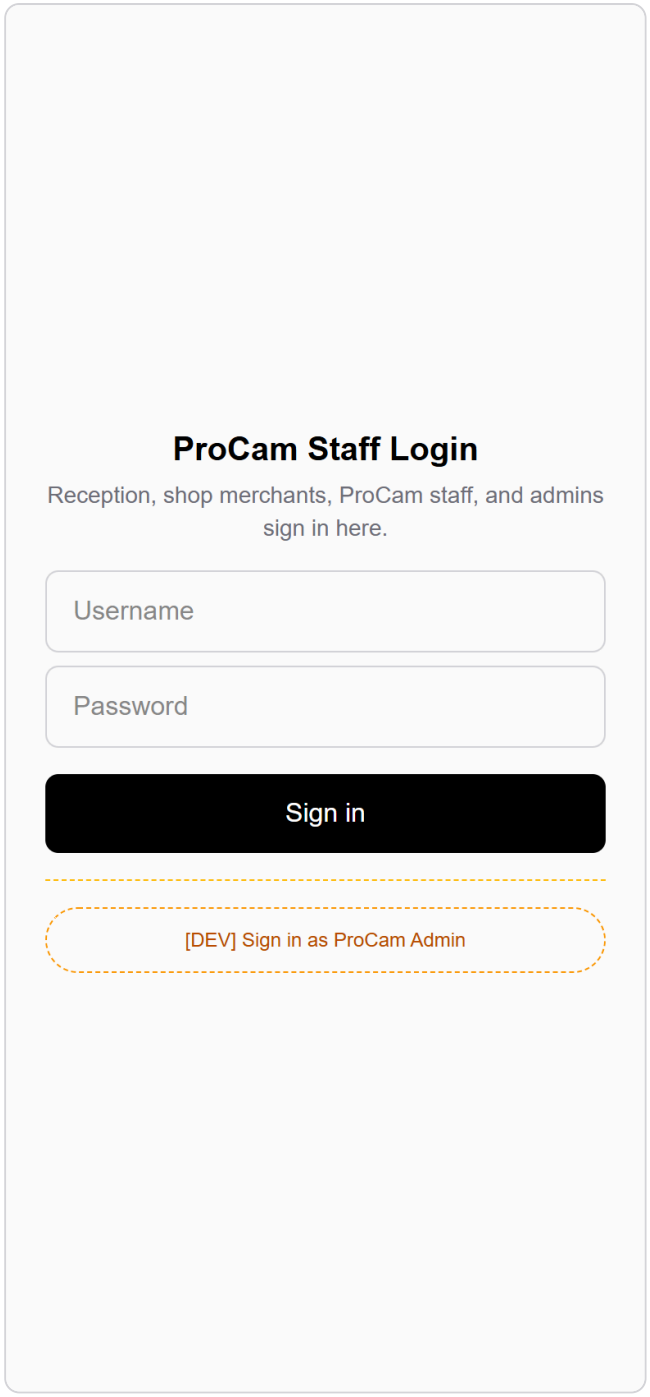

71

ADMIN

Login

Mentions merchants. (The orange dev button is local-only.)

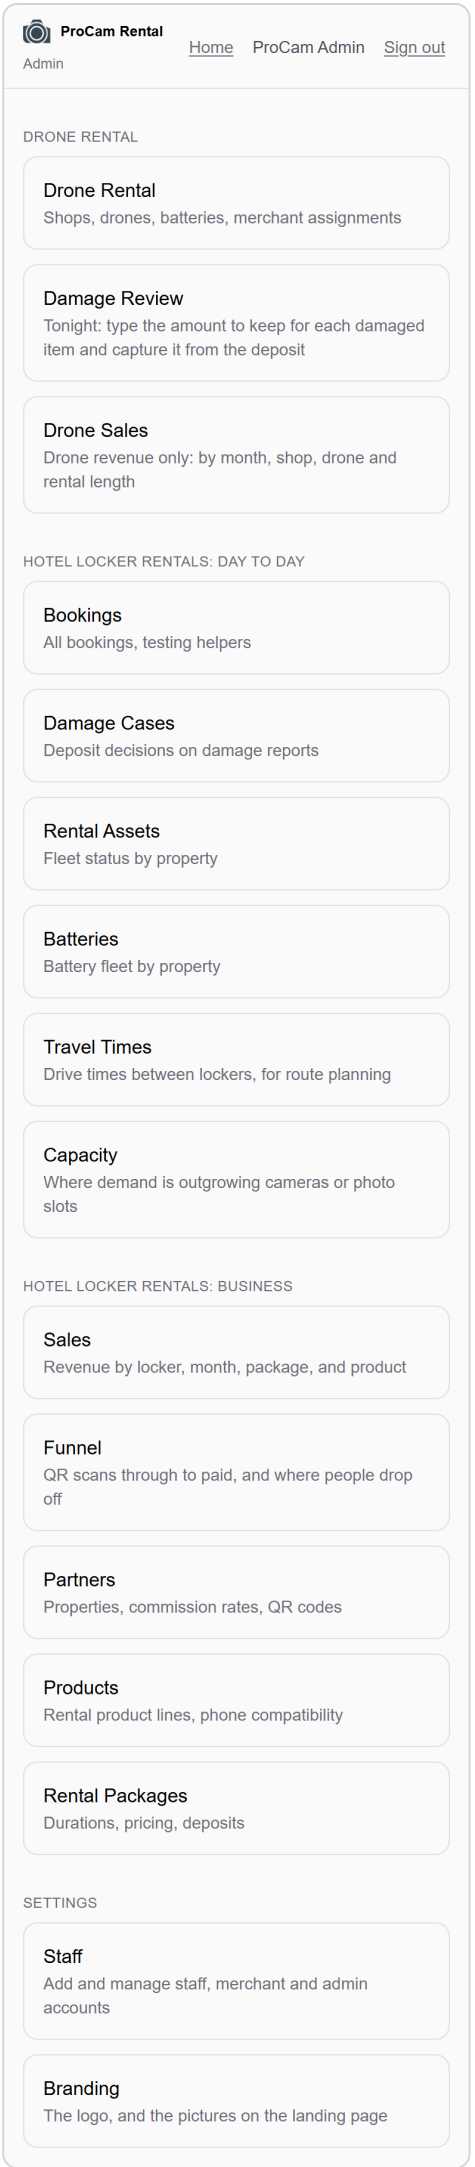

72

ADMIN

Admin home

Grouped, with Drone Rental and Drone Sales first.

72 of 84

73

ADMIN

Drone Rental

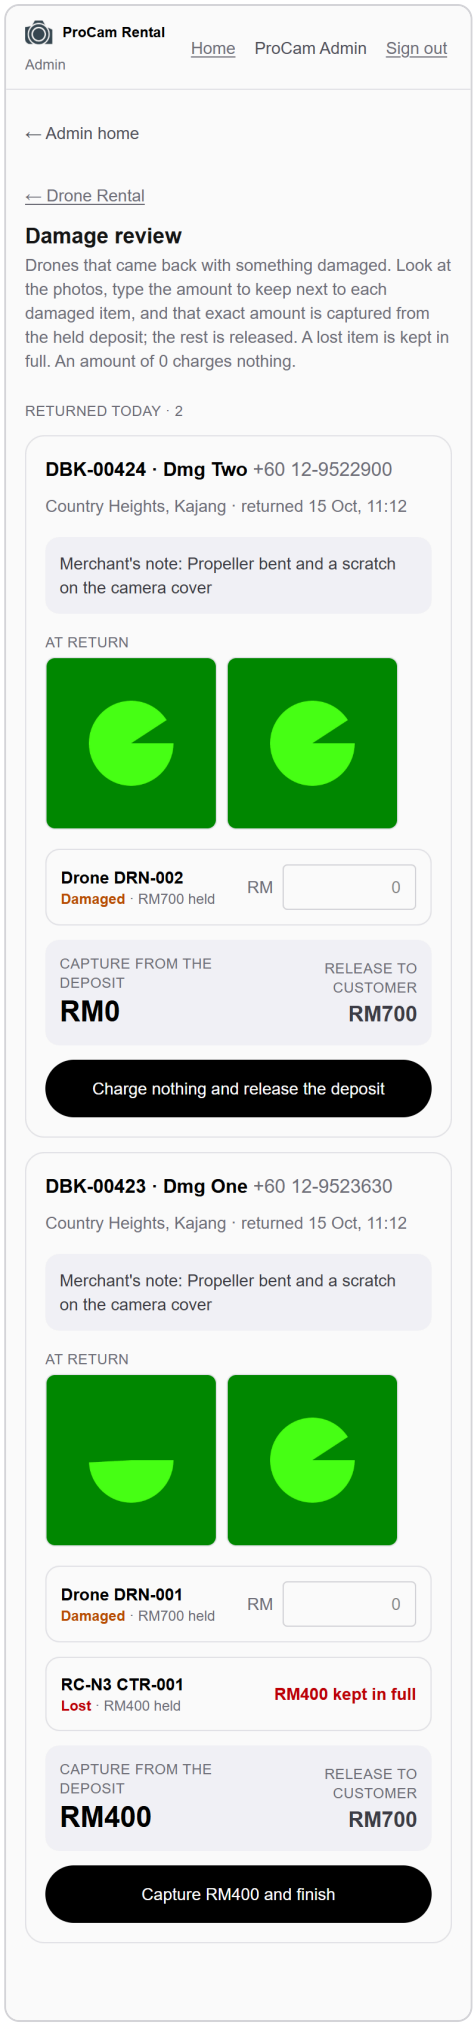

Sales analysis button, summary strip, recent bookings, shops and drones. A Controllers section lists every RC-N3 and goggles set and the shop it is at, with Add a controller and Remove. Each drone shows its number, model and batteries (B1, B2, B3 … for the Neo 2, N1, N2 … for the Neo), with a name field so they can be renamed to match the stickers. Add a drone makes its three batteries too.

74

ADMIN

Damage review (nightly)

Admin > Drone Rental > Damage review lists drones that came back damaged, today's first, with the merchant's note and the handover and return photos side by side.

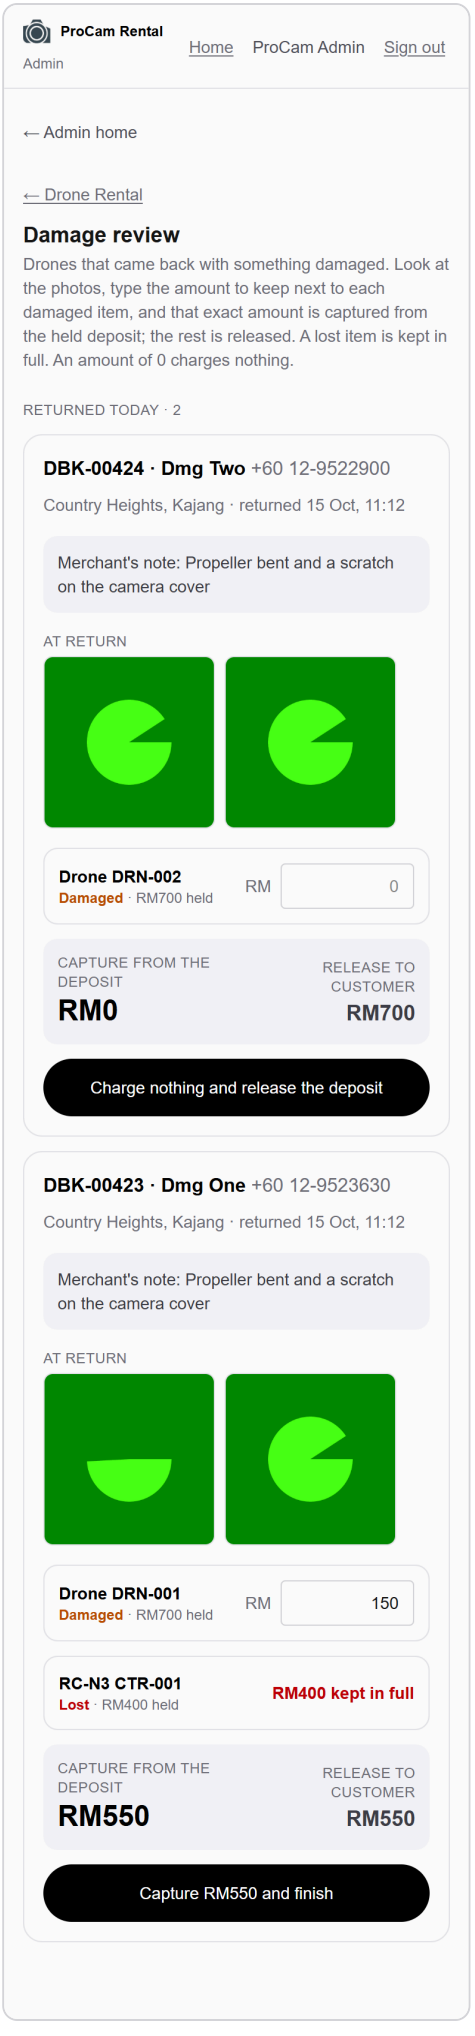

75

ADMIN

Type the amount, then capture

Type the amount to keep next to each damaged item (a lost item is kept in full, 0 charges nothing). The total to capture and the amount released are shown, and that exact amount is captured from the held deposit.

75 of 84

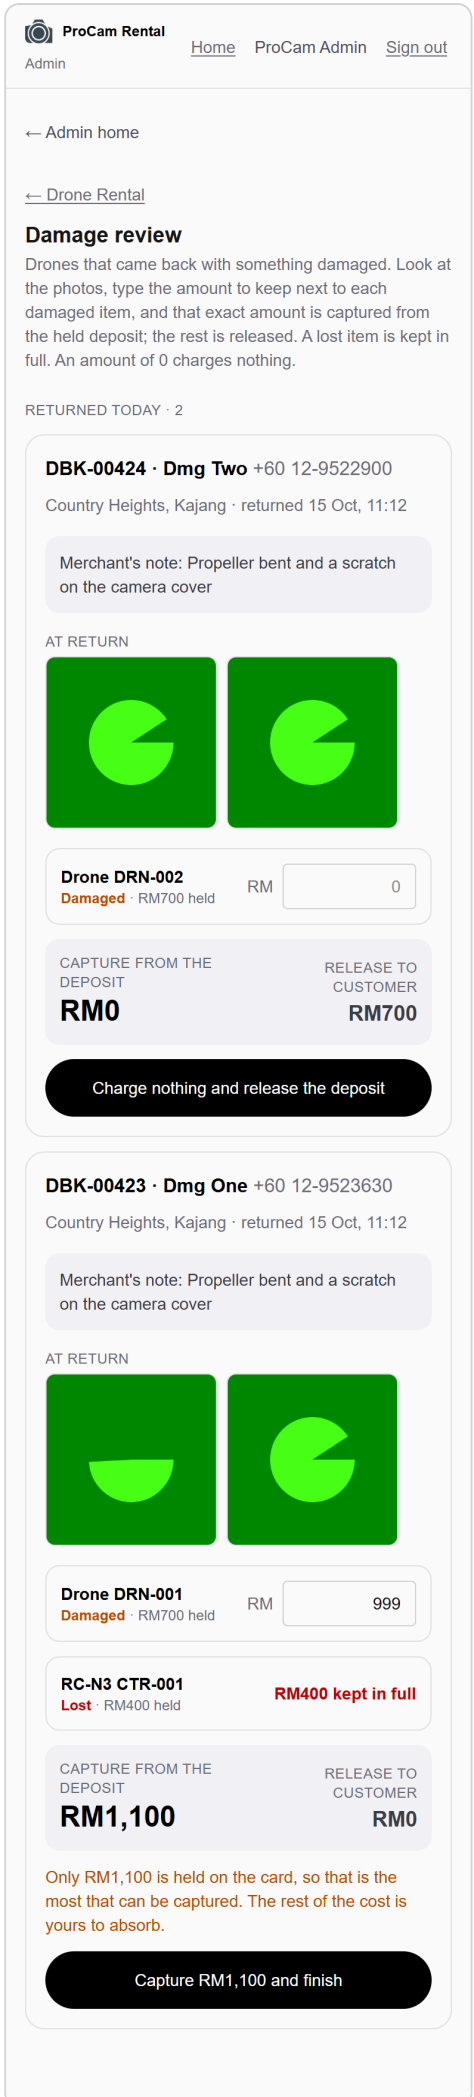

76

ADMIN

Damage above the deposit

If the cost is more than is held on the card, only the whole deposit can be captured. A note says so, and the rest of the cost is absorbed.

77

ADMIN

Branding

The logo, the picture at the top of the landing page, and a picture for each of the 12 booking combinations (Neo or Neo 2, phone only, RC-N3 or goggles, 1 or 2 batteries). Upload straight from a phone; big photos are shrunk.

Drone Sales

← Drone Rental

Drone rental only. Counts every booking that reached payment (6 of 7 bookings, all time). Revenue is the rental fee plus battery swaps, late fees and any deposit kept for damage or loss.

Last 30 days | This month | Last 90 days | **All time**

REVENUE	PAID BOOKINGS
RM439	**6** RM73.17 each on average

DRONE UTILISATION	NOT COMPLETED
0% 18 h out of 5867 h open	**14%** 1 cancelled or expired of 7

Where the money comes from

Rental fees include the battery choice. Deposit kept is only what was actually taken for damaged or lost items.

- Rental fees — RM289 (66%)
- Deposit kept (damage or loss) — RM150 (34%)

By month

Which months sell best. Months are counted on Malaysia time, by the day the rental starts.

Aug 2026		RM100
Sep 2026		RM272
Oct 2026		RM67

Month	Revenue	Bookings
Aug 2026	RM100	1
Sep 2026	RM272	3
Oct 2026	RM67	2

By drone model

Neo 2 and GT50 side by side

- DJI Neo 2 — RM439 (100%)

Model	Bookings	Revenue	Average booking
DJI Neo 2	6	RM439	RM73.17

How they flew it

Their own phone, the RC-N3 controller (RM5 an hour more) or the Goggles N3 + Motion 3 set (RM10 an hour more).

- RC-N3 — RM439 (100%)

By shop

Country Height…		RM439

Shop	Revenue	Bookings	Average booking
Country Heights, Kajang	RM439	6	RM73.17

By drone

Payback is everything the drone has earned since the start, against what it cost to buy.

Drone	Shop	Bookings	Hours out	Revenue
DRN-003 · DJI Neo 2	Country Heights, Kajang	2	7	RM275
DRN-001 · DJI Neo 2	Country Heights, Kajang	2	6	RM100
DRN-002 · DJI Neo 2	Country Heights, Kajang	2	5	RM64

Customers

3 customers rented all time; 3 of them came back for more than one rental.

POLICY PAGES

Terms & Conditions

Who can rent, prices and payment, the deposit, collecting and returning, damage and loss (the deposit is the most taken), flying safely, and our responsibility.

Terms & Conditions

Last updated 13 October 2026.

1. Who we are and what we rent

ProCam Rental (SSM 202603270563 (TR0351009-A)) rents small DJI camera drones in Malaysia: the DJI Neo 2 and the original DJI Neo, with an optional RC-N3 controller or Goggles N3 with Motion 3 controller. You collect and return the drone at one of our partner shops in Kajang or Port Dickson. See our Contact page for the shops.

By making a booking you agree to these terms, our Refund & Cancellation Policy and our Privacy Policy.

2. Who can rent

You must be at least 18 years old and able to make a binding agreement. Before we hold a drone for you, you complete an identity check: a photo of your MyKad or passport and a live selfie, done on your phone through our verification provider. Bring the same photo ID when you collect the drone: the shop staff check it against your booking and can refuse the rental if you cannot show it, if it does not match, or if they have good reason to doubt who you are. In that case the rental fee is refunded in full.

3. Booking, prices and payment

- All prices are in Malaysian Ringgit (MYR). The price you see on the booking page before you pay is the price you pay: the hourly rate for the drone you choose, plus the controller if you add one, plus the battery option.
- An online booking is only confirmed once your card payment has gone through. Until then no drone is held for you.
- If two people pay for the same last drone, the first payment wins. The other person is refunded in full automatically and is asked to choose another time.
- Walk-in rentals at a shop can be paid by card, or the rental fee can be paid in cash at the shop. A card is always needed for the deposit.
- Card payments are processed by Stripe. We never see or store your card number.

4. Security deposit

A refundable deposit is held on your card when your booking is paid: RM700 for the Neo 2 and RM600 for the Neo, plus RM400 if you add the RC-N3 controller or RM800 if you add the Goggles N3 and Motion 3 controller. The exact deposit is shown before you pay.

- The deposit is a hold on your card, not a charge. Nothing is taken from it unless something is damaged, lost or owed.
- The hold is released when the drone and controller come back in good condition. Your bank may take a few days to show it as released. A hold lasts at most about 7 days.
- The deposit is the most we take for damage to or loss of the equipment. If a repair or replacement costs more than the deposit, we cover the difference. The deposit does not cover late fees, extra batteries or anything else you owe, which are charged separately.

5. Collecting and returning the drone

- At pick-up the shop checks the drone, batteries and accessories with you and takes photos. At return they check again and take photos. These photos are our record of the condition.
- You are responsible for the drone, batteries, controller and everything in the kit from the moment you take it until the shop has accepted it back.
- Return everything by the end time you booked. After a 15-minute grace period, a late fee equal to one hour's rate (drone plus controller) is charged for each hour or part of an hour you are late. It is charged to the card you booked with, or paid in cash at the shop if you choose.
- You can swap used batteries for charged ones at the shop during your rental. Each swap is charged at the battery price shown at the shop, to your saved card or in cash.

6. Damage and loss

- If the drone or controller comes back damaged, the shop records what is damaged with photos. Your deposit stays on hold, and we review the damage that evening. We then charge only the cost of the repair, up to the amount held. The rest of the deposit is released.
- If a drone, controller or goggles set is lost (including flown out of reach, into the sea or a river, or not returned), we keep the deposit held for that item in full.
- Normal wear that comes from careful use is not damage.
- If you think a charge is wrong, contact us within 14 days of the return. We will look at the photos with you.

7. Flying safely and legally

You are the pilot and are responsible for how the drone is flown. You must:

- follow Malaysian law and the rules of the Civil Aviation Authority of Malaysia (CAAM), including keeping away from airports, airfields, military and other restricted areas;
- keep the drone within your sight, away from people, crowds, roads and other aircraft, and respect other people's privacy;
- not fly in rain or strong wind. Online booking is blocked when the forecast wind at the shop is stronger than the drone's limit (10.7 m/s for the Neo 2, 8 m/s for the Neo). Even below that limit, do not fly if conditions feel unsafe, especially over water or near a beach;
- not fly under the influence of alcohol or drugs, or use the drone to harm, harass or spy on anyone;
- not lend, sublet or resell the equipment, open it, repair it, or remove any labels.

Breaking these rules can cost you your deposit and may be reported to the authorities. We can refuse a rental, or end it, if we think the equipment or other people are at risk.

8. Cancellations and refunds

If you cancel at least 24 hours before your start time, you get the rental fee back in full. The full details are in our Refund & Cancellation Policy.

9. Our responsibility

We provide the equipment as it is and look after it carefully, but we are not liable for indirect or consequential loss, such as lost footage, missed moments or claims by other people, beyond the rental fee and deposit you paid for that booking. You are responsible for any injury, damage to property or claim caused by your flying. Nothing in these terms limits any right or liability that cannot be limited under Malaysian law.

10. Changes to these terms

We may update these terms. The terms in force when you make a booking apply to that booking.

11. Governing law and contact

These terms are governed by the laws of Malaysia, and disputes are subject to the courts of Malaysia. Questions? See our Contact page.

80

POLICY PAGES

Refund & Cancellation Policy

Free cancellation up to 24 hours before the start, full refunds when the shop cancels, the wind is too strong or the last drone was taken, and how deposit holds are released.

Refund & Cancellation Policy

Last updated 13 October 2026.

1. You cancel

- Cancel at least 24 hours before your start time: you get the whole rental fee back.
- Cancel less than 24 hours before the start, or do not turn up: the rental fee is not refunded. If we can rent the drone to someone else for that time, we will refund you.
- To cancel, contact us (see the Contact page) with your booking number, the name and the phone number you booked with.

2. We cancel, or something goes wrong: full refund

You get the full rental fee back, and your deposit hold is released, when:

- the last drone for your time was taken by someone who paid just before you. This is refunded automatically and you are asked to choose another time;
- the wind forecast is above the drone's limit, or the shop judges the weather or the place unsafe to fly, and you are not able to rebook;
- the shop cannot give you the drone you booked, or the drone, battery or controller is faulty at hand-over;
- the shop cannot confirm who you are, or your ID does not match your booking;
- we cancel for any other reason.

If we can offer you another time or drone instead, you can accept that, or take the refund.

3. Once the drone is out

- The rental fee is not refunded for a rental you cut short or for time you did not use, unless the drone stops working through no fault of yours. In that case we refund the unused hours, or give you a replacement drone.
- Late fees and battery swaps are not refunded unless we charged them by mistake.

4. Your deposit

- The deposit is only ever a hold on your card. If everything comes back in good condition, the whole hold is released. No money was taken, so there is nothing to refund.
- If something is damaged, we charge only the cost of the repair, up to the amount held, and release the rest. If something is lost we keep the deposit held for that item. See the Terms for how this works.
- Your bank decides how fast a released hold disappears from your statement. This usually takes a few working days. A hold that is not captured is released automatically after about 7 days.

5. How refunds are paid

Refunds go back to the card you paid with, in Malaysian Ringgit. We start the refund straight away. Your bank may take 5 to 10 working days to show it. Fees charged by the payment processor are not returned to us, but we never take them out of your refund. If you paid in cash at the shop, the shop returns the cash.

6. A charge you disagree with

If you think a damage charge, late fee or any other charge is wrong, contact us within 14 days. We will go through the hand-over and return photos with you and correct it if we got it wrong. Please contact us first, before asking your bank to reverse the payment, so we can fix it quickly.

7. Contact

Send us your booking number on the Contact page. See also the Terms & Conditions.

Terms Refunds Privacy FAQ Contact

Privacy Policy

Last updated 13 October 2026.

1. Who is responsible

ProCam Rental decides how your personal data is used for your booking. We follow Malaysia's Personal Data Protection Act 2010 (PDPA). Our contact details are on the Contact page.

2. What we collect

- Your name, phone number and email, to make and manage your booking.
- An identity check: a photo of your MyKad or passport and a live selfie, taken in the check run by our verification provider, Didit. We receive the result of the check (passed or not) and the reference needed to match it to your booking. We do not keep our own copy of your ID photo or selfie. The shop staff also look at your photo ID when you collect the drone.
- Payment information. Your card details go straight to our payment processor, Stripe. We never see or store your card number. We keep a Stripe reference to your payment and saved card so we can release your deposit, and charge late fees, battery swaps or damage you agreed to.
- Photos of the drone and its accessories at hand-over and return, and notes about their condition. They show equipment, not you.
- Booking details: what you rented, when, from which shop, what you paid, and any late fee or damage review.
- Basic technical data when you use the site, such as the language you chose (kept in a cookie). We do not run advertising trackers.

3. Why we use it

- To confirm you are eligible, take your payment and hold your deposit.
- To hand over and take back the equipment, and to deal with late returns, damage and loss.
- To contact you about your booking and to give support.
- To keep our records, prevent fraud and meet legal and tax obligations.

We do not sell your personal data, and we do not use it for advertising by other companies.

4. Who else sees it

- The shop that rents you the drone sees your name, phone number and booking so that they can hand over the drone to the right person.
- Stripe (payments), Didit (identity check), Supabase (our database) and Vercel (our website hosting) process data for us under their own security and privacy terms. Some of them store data outside Malaysia.
- A weather service gets only the location of the shop to check the wind, never anything about you.
- The authorities, where the law requires, or to protect our equipment and rights, for example in a dispute or a case of theft.

5. How long we keep it

We keep booking and payment records for as long as we need them for the booking, for disputes and for the time the law requires us to keep accounting records. After that we delete them or remove what identifies you.

6. Your rights

Under the PDPA you can ask to see the personal data we hold about you, ask us to correct it, and ask us to stop using it for something that is not needed for your booking. Contact us through the Contact page. We may need to check who you are first, and we may have to keep some records the law requires. If you cannot agree to us using the data we need for an identity check or a payment, we cannot rent you a drone.

7. Security

Our website uses an encrypted connection. Access to bookings and personal data is limited to the people who need it for the rental. No system is perfectly secure, so please tell us at once if you think your data has been misused.

8. Changes

We may update this policy. The date at the top shows when it last changed.

Terms Refunds Privacy FAQ Contact

Frequently asked questions

Last updated 13 October 2026.

Short answers to what customers ask most. The Terms & Conditions and Refund & Cancellation Policy have the full rules.

Booking and prices

How do I book a drone?

Open the booking page, pick a shop (on the map, or tap Nearest to me), choose your drone, how you want to fly it and the batteries, then a day and a time. Enter your name, phone and email, do a quick ID check, and pay. You then get a booking page with a QR code to show at the shop.

How much does it cost?

- The DJI Neo 2 is RM10 an hour and the DJI Neo is RM9 an hour.
- The RC-N3 controller adds RM5 an hour. The Goggles N3 with Motion 3 controller adds RM10 an hour. Flying with just your own phone adds nothing.
- The battery option you choose is added once.

The total on the booking page before you pay is what you pay. On top of that a refundable deposit is held on your card (see Deposit below).

How long can I rent for?

From 1 to 6 hours. Start times are every 30 minutes, and your rental has to end before the shop closes. The booking page only shows times that are free.

Do I need an account?

No. We only need your name, phone number and email.

How long do I have to pay?

10 minutes. A drone is only held for you once your payment has gone through. If two people pay for the same last drone, the first payment wins and the other person is refunded in full automatically, then asked to pick another time.

Can I walk in without booking?

Yes, if a drone is free. Scan the walk-in QR code at the shop. You can pay the rental fee by card or in cash at the shop. A card is always needed for the deposit.

ID check and who can rent

Why do you ask for an ID check?

So a drone is only rented to a real person who can be held responsible for it. It is a photo of your MyKad or passport and a live selfie, done on your phone through our verification provider. It comes before payment, so you are not charged if it does not pass. If you think it was wrong, contact us.

Do I need to bring my ID?

Yes. Bring the same photo ID to the shop. The staff check it against your booking, and the person collecting must be the person who booked. The drone cannot be lent to someone else. If the ID cannot be shown or does not match, the rental is refunded in full.

How old do I have to be?

At least 18.

Deposit

What is the deposit?

A refundable hold on your card, not a charge: RM700 for the Neo 2 or RM600 for the Neo, plus RM400 if you add the RC-N3 or RM800 if you add the goggles. The exact amount is shown before you pay. Nothing is taken from it unless something is damaged, lost or owed.

When do I get it back?

The hold is released when the drone and controller come back in good condition. Your bank may take a few days to show it as released. A hold that is not used is also released automatically after about 7 days.

My booking asks me to confirm the deposit. What do I do?

Sometimes your bank needs one more approval before it will hold the deposit, for example in your banking app. Your booking page then shows a button to confirm it. The shop cannot hand over the drone until the hold is in place.

What if something is damaged or lost?

- Damage: the shop records it with photos, we review it that evening, and we charge only the repair cost, up to the amount held. The rest is released.
- Lost (flown out of reach, into water, or not returned): we keep the deposit held for that item.
- The deposit is the most we take for damage or loss. Late fees and extra batteries are charged separately.

See the Terms & Conditions for the details.

Flying

Phone only, RC-N3 or goggles: which should I choose?

- Phone only: you fly with your own phone and the DJI Fly app. Cheapest, and fine for casual flying.
- RC-N3: a proper controller that your phone clips into (you still need your phone). Longer control range.
- Goggles N3 with Motion 3: you fly by looking through the goggles and moving the Motion 3 controller. No phone needed.

What about wind and rain?

Online booking is blocked when the forecast wind at the shop is stronger than the drone's limit: 10.7 m/s for the Neo 2 and 8 m/s for the Neo. Do not fly in rain, and do not fly if it feels unsafe, especially over water or near the beach. If we have to cancel because of weather and you cannot rebook, you get a full refund.

Where can I fly?

Follow Malaysian law and the Civil Aviation Authority of Malaysia (CAAM) rules. Stay away from airports and restricted areas, keep the drone in sight, and keep clear of people, crowds and roads. See the Terms & Conditions.

Collecting and returning

Where and how do I collect the drone?

At the shop you chose. Show your booking QR code and your photo ID. The shop checks the drone, batteries and accessories with you and takes photos. They do the same at return, and those photos are the record of the condition.

What if I am late bringing it back?

There is a 15-minute grace period. After that, a late fee of one hour's rate (drone plus controller) is charged for each hour or part of an hour you are late. It goes to the card you booked with, or you can pay it in cash at the shop.

What if the battery runs flat?

Swap used batteries for fully charged ones at the shop during your rental. Each swap is charged at the battery price shown at the shop, to your saved card or in cash.

Cancellations, refunds and payment

Can I cancel?

Yes. Cancel at least 24 hours before your start time and you get the whole rental fee back. Later than that, the fee is not refunded. To cancel, contact us with your booking number and the name and phone you booked with.

When do I get my refund?

We start it straight away, back to the card you paid with. Your bank may take 5 to 10 working days to show it. See the Refund & Cancellation Policy.

Is my card safe?

Card payments are handled by Stripe. We never see or store your card number.

A charge looks wrong. What do I do?

Contact us within 14 days, before asking your bank to reverse it. We will go through the photos from hand-over and return with you and correct it if we got it wrong.

Can I use the site in Malay or Chinese?

Yes. Use the EN, BM and 中 switch at the top of the page.

Did not find your answer? See the Contact page.
