ProCam admin guide: setting up and running the business

Everything the admin does: sign in, set up the shops, drones, merchants and opening hours, watch the money, batteries and where customers drop off, and manage what customers see and the messages they get. Screens are from the admin pages on a laptop-sized window, with the customer's view next to the things the admin sets up.

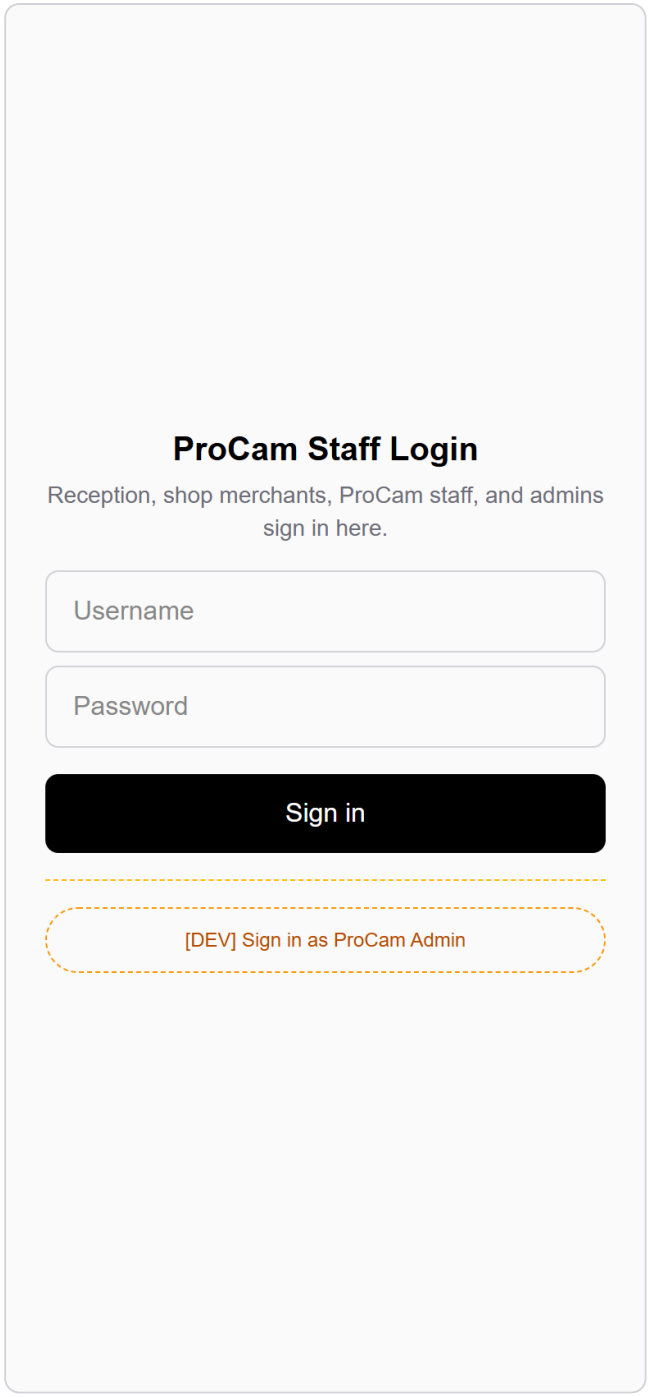

Part 1 · Sign in and find your way	2 screens
Part 2 · Shops, drones, merchants and opening hours	3 screens
Part 3 · Money	5 screens
Part 4 · Batteries and where customers drop off	2 screens
Part 5 · What customers see, and the messages they get	5 screens

1

PART 1 · SIGN IN AND FIND YOUR WAY

Sign in

Sign in with your admin username and password. Merchants and the admin use the same login page and land on their own page.

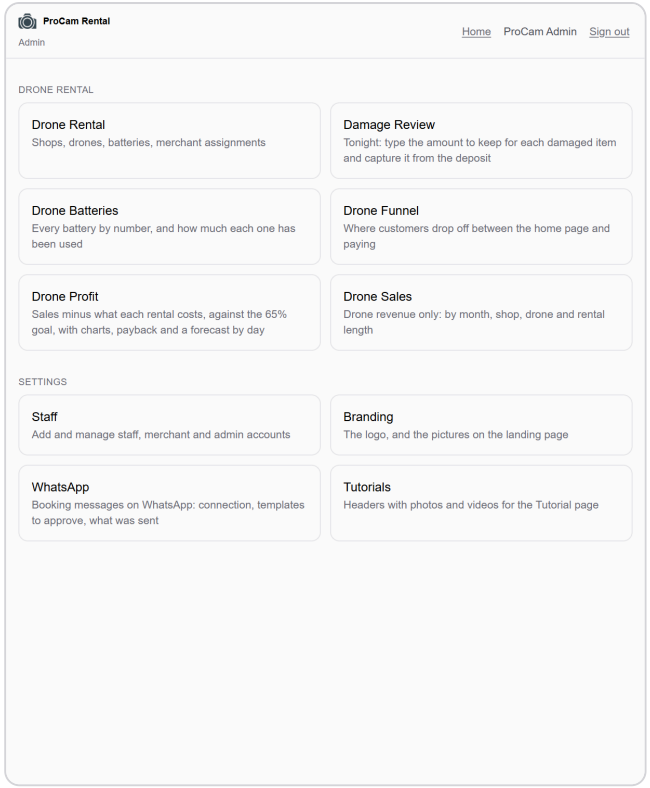

2

PART 1 · SIGN IN AND FIND YOUR WAY

Admin home

Every tool is a tile: Drone Rental, Damage Review, Drone Batteries, Drone Funnel, Drone Profit, Drone Sales, Staff, Branding, WhatsApp and Tutorials. The older hotel locker business is paused, so its tiles and pages are hidden.

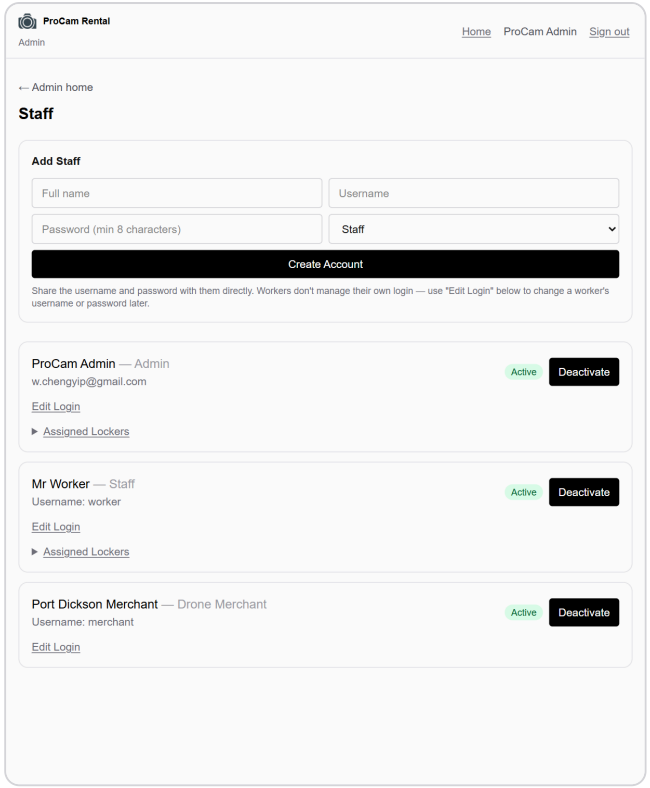

3

PART 2 · SHOPS, DRONES, MERCHANTS AND OPENING HOURS

Staff accounts

Create a login for each merchant and for yourself: a username, a name and a password. There is no self-service password reset: you manage every login here.

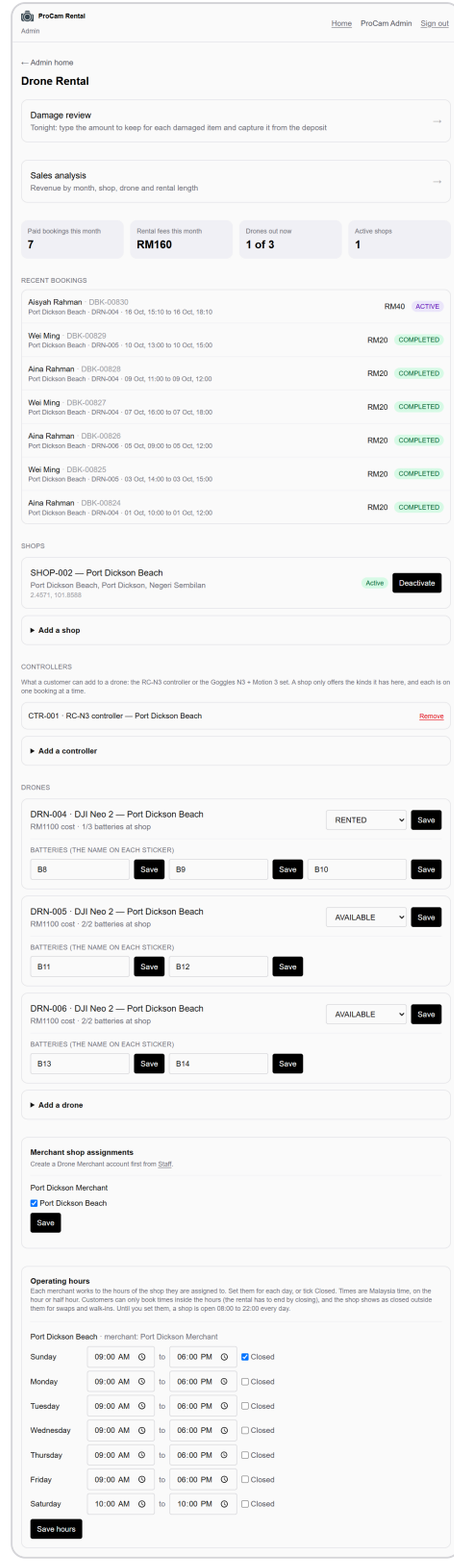

4

PART 2 · SHOPS, DRONES, MERCHANTS AND OPENING HOURS

Drone Rental

The shops, with their drones (add a drone and its three batteries are created for you), the controllers, and each battery's number. Below them: the merchant shop assignments, which shop each merchant looks after, and the opening hours.

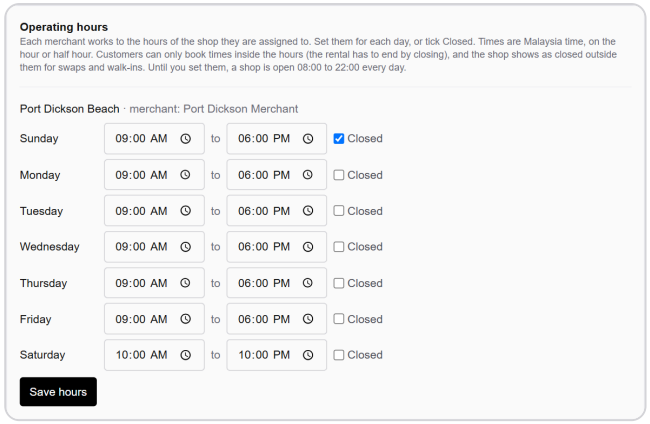

5

PART 2 · SHOPS, DRONES, MERCHANTS AND OPENING HOURS

Operating hours

For each shop, set the opening and closing time for every weekday, or tick Closed, on the hour or half hour in Malaysia time. Each merchant works to the hours of their shop. Customers can only book times inside the hours (the rental has to end by closing), a closed day offers no times, and a closed shop shows as closed for battery swaps and walk-ins. Until you set them, a shop is open 08:00 to 22:00 every day.

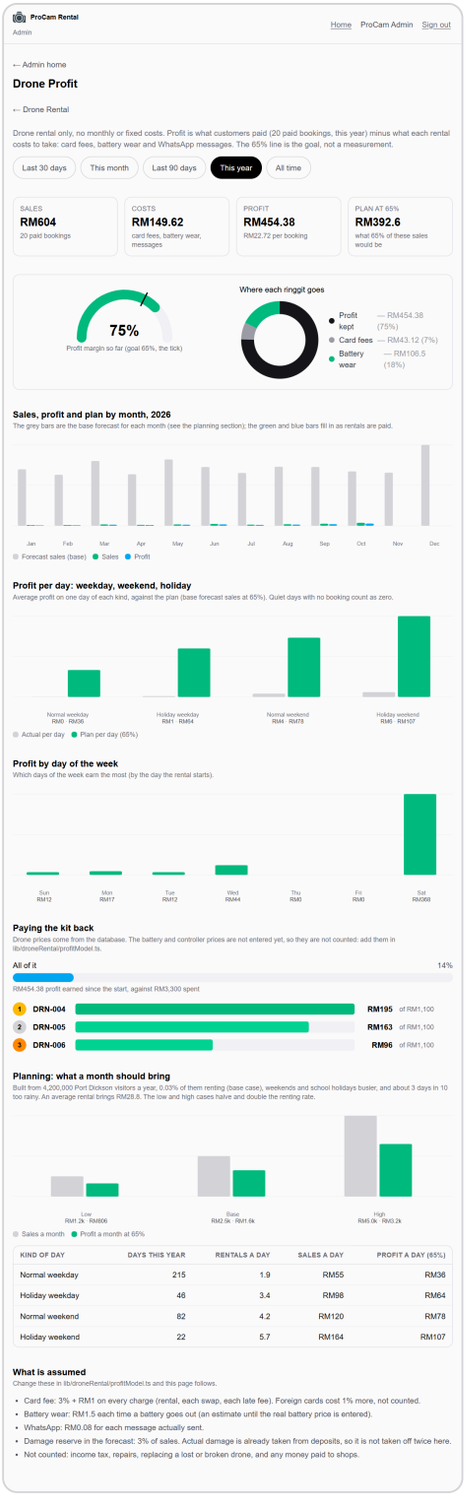

6

PART 3 · MONEY

Drone Profit

What is left after what each rental costs to take, shown as charts: a dial against your 65% profit goal, where each ringgit goes (card fees, battery wear, messages), sales and profit by month against the forecast, profit per day for a normal weekday, holiday weekday, normal weekend and holiday weekend, and how far the drones have paid for themselves. The figures here are made-up examples. There are no monthly or fixed costs in it. Under it is the planning forecast, built from Port Dickson visitor numbers, school holidays and the weather: change its assumptions in the code and the page follows.

7

PART 3 · MONEY

Drone Sales

Revenue by month, shop, drone and rental length, with how much was card and how much cash.

← Admin home

Drone Sales

← Drone Rental

Drone rental only. Counts every booking that reached payment (6 of 7 bookings, all time). Revenue is the rental fee plus battery swaps, late fees and any deposit kept for damage or loss.

Last 30 days | This month | Last 90 days | **All time**

REVENUE	PAID BOOKINGS
RM439	**6** RM73.17 each on average

DRONE UTILISATION	NOT COMPLETED
1% 18 h out of 2941 h open	**14%** 1 cancelled or expired of 7

Where the money comes from

Rental fees include the battery choice. Deposit kept is only what was actually taken for damaged or lost items.

- Rental fees — RM289 (66%)
- Deposit kept (damage or loss) — RM150 (34%)

By month

Which months sell best. Months are counted on Malaysia time, by the day the rental starts.

Month	Revenue	Bookings
Aug 2026	RM100	1
Sep 2026	RM272	3
Oct 2026	RM67	2

By drone model

Neo 2 and GT50 side by side.

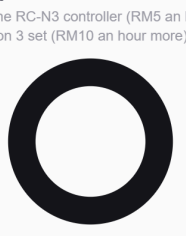

- DJI Neo 2 — RM439 (100%)

Model	Bookings	Revenue	Average booking
DJI Neo 2	6	RM439	RM73.17

How they flew it

Their own phone, the RC-N3 controller (RM5 an hour more) or the Goggles N3 + Motion 3 set (RM10 an hour more).

- Controller (RC-N3) — RM439 (100%)

By shop

Shop	Revenue	Bookings	Average booking
Port Dickson Beach	RM439	6	RM73.17

By drone

Payback is everything the drone has earned since the start, against what it cost to buy.

Drone	Shop	Bookings	Hours out	Revenue
DRN-006 · DJI Neo 2	Port Dickson Beach	2	7	RM275
DRN-004 · DJI Neo 2	Port Dickson Beach	2	6	RM100
DRN-005 · DJI Neo 2	Port Dickson Beach	2	5	RM64

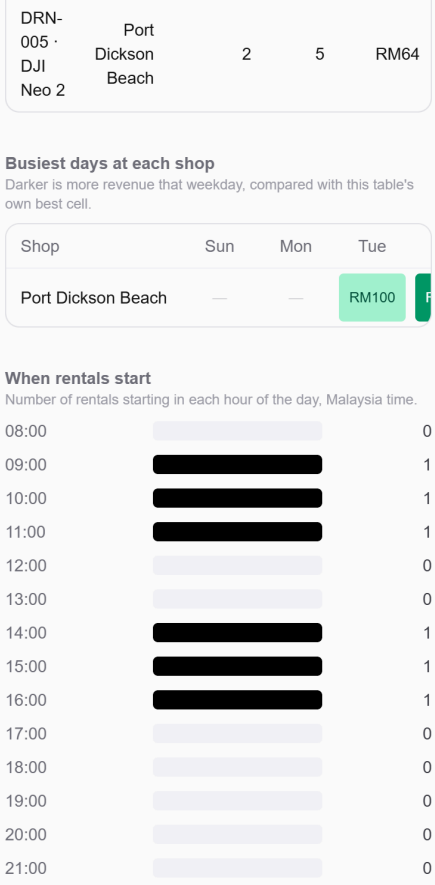

Busiest days at each shop

Darker is more revenue that weekday, compared with this table's own best cell.

Shop	Sun	Mon	Tue	
Port Dickson Beach	—	—	RM100	R

When rentals start

Number of rentals starting in each hour of the day, Malaysia time.

How long people rent for

Length	Bookings	Revenue	% of revenue
1 hour	1	RM175	40%
2 hours	1	RM37	8%
4 hours	1	RM70	16%
6 hours	1	RM100	23%
Other	2	RM57	13%

1 battery or 2

- 2 batteries — RM375 (85%)
- 1 battery — RM64 (15%)

Online or walk-in

- Booked online — RM302 (69%)
- Walk-in at the shop — RM137 (31%)

Returns and deposits

Completed rentals only. Fine means nothing was taken from the deposit.

Item	Fine	Damaged	Lost
Drone	5	1	0
Controller	6	0	0

Deposit kept in this period: RM150 · Late fees: RM0

Customers

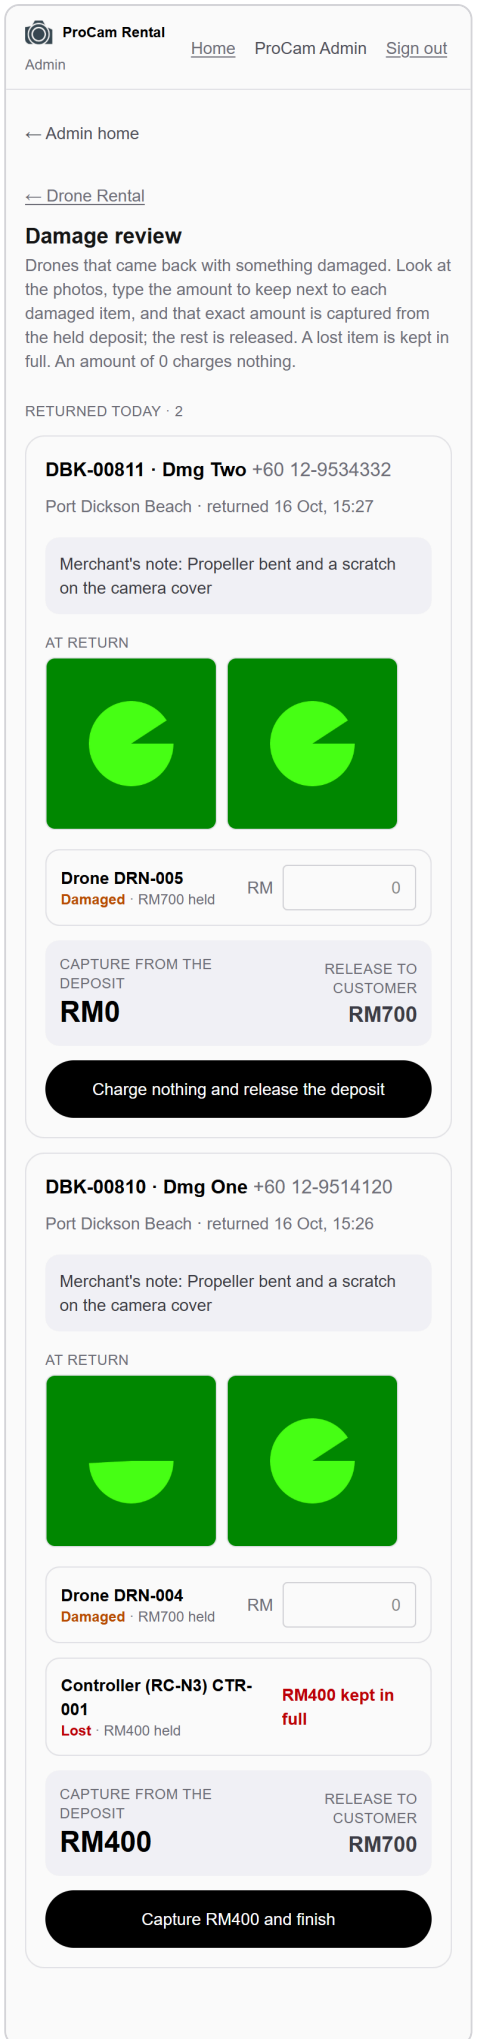

3 customers rented all time; 3 of them came back for more than one rental.

8

PART 3 · MONEY

Damage review, every night

Returns where something was damaged wait here. The merchant only describes the damage at the return; the deposit stays held until you decide.

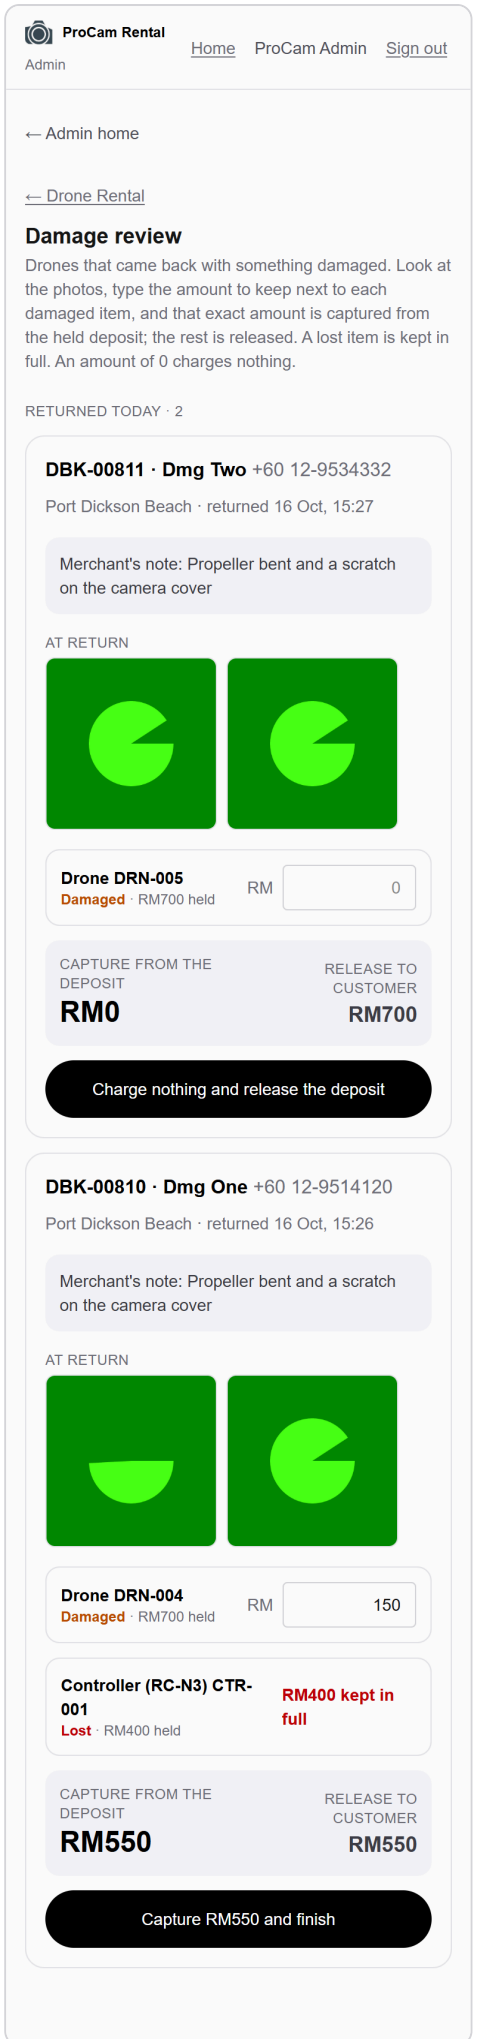

9

PART 3 · MONEY

Type the amount, then capture

Type what to keep for each damaged item. That total is captured from the held deposit and the rest is released. A lost item is kept in full.

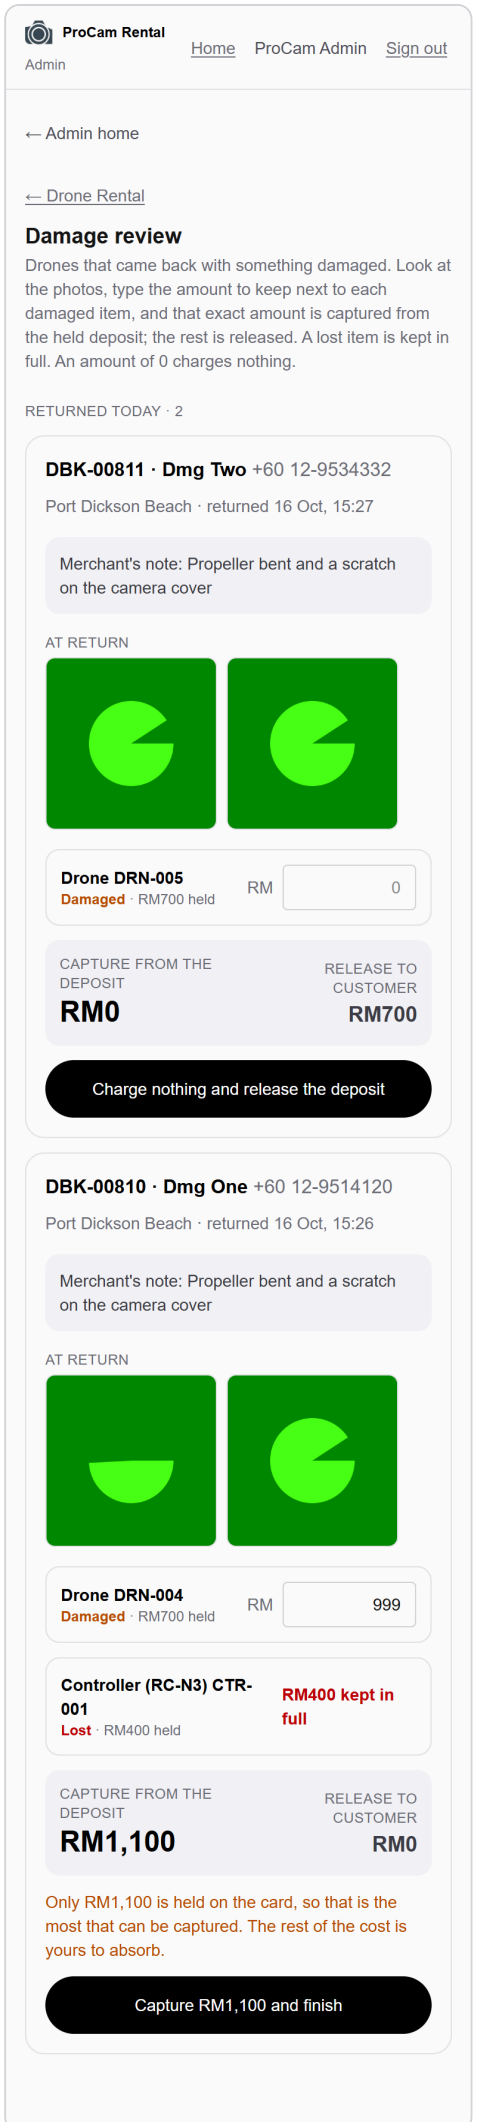

10

PART 3 · MONEY

Damage above the deposit

If the repair costs more than the deposit that is held, only the held amount can be captured, and the screen says so.

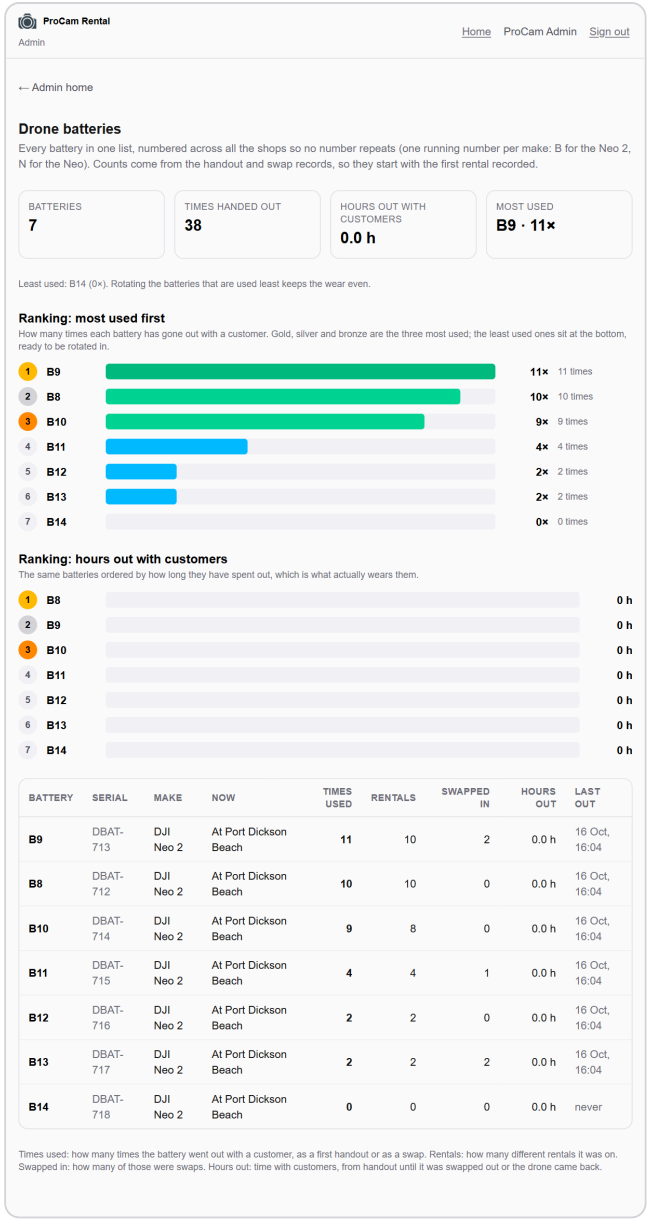

11

PART 4 · BATTERIES AND WHERE CUSTOMERS DROP OFF

Drone Batteries

Two ranking charts come first: the batteries ordered by how many times each went out with a customer, and by the hours each has spent out, with gold, silver and bronze for the three most used. Below them, every battery in one list, numbered with no number repeated (B for the Neo 2, N for the Neo). For each: where it is now, how many times it went out with a customer, the rentals it was on, how many of those were swaps, the hours it has spent out, and when it was last out. Rotate the batteries that are used least to keep the wear even. Change the stickers to match the numbers.

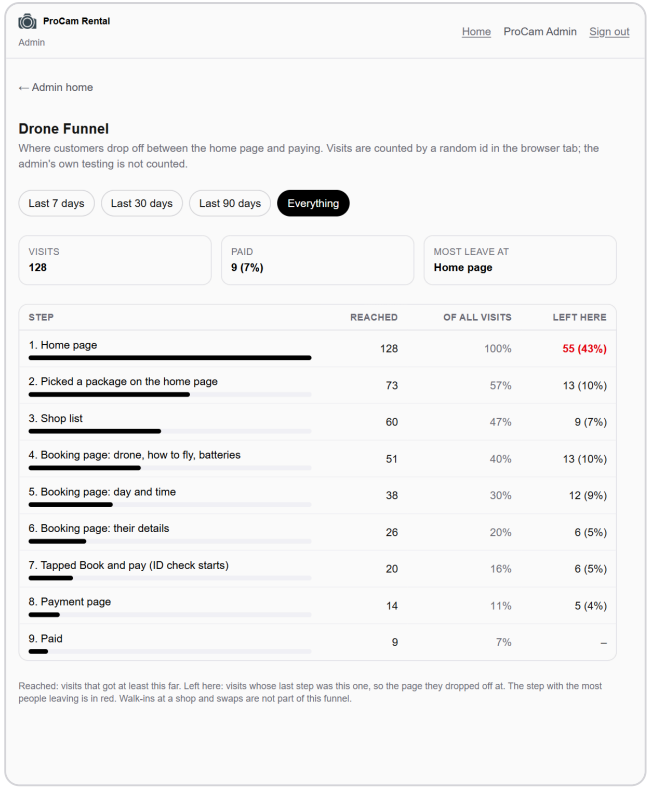

12

PART 4 · BATTERIES AND WHERE CUSTOMERS DROP OFF

Drone Funnel

How many visits reached each step between the home page and paying, the share of all visits, and where visits left. The step where the most people leave is in red: that is the page to improve. It counts with a random code in the browser tab, nothing that identifies a person, and does not count your own testing.

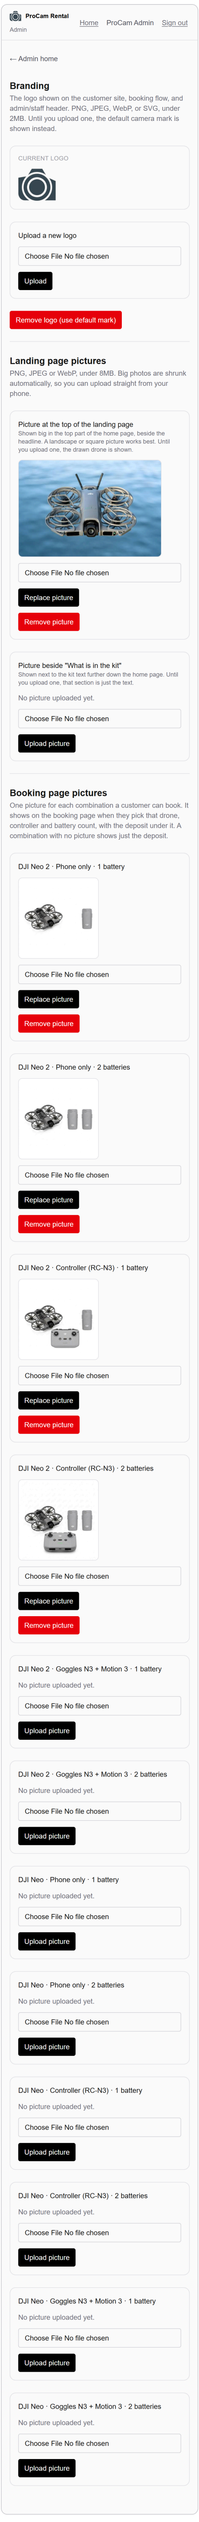

13

PART 5 · WHAT CUSTOMERS SEE, AND THE MESSAGES THEY GET

Branding

The logo, the picture at the top of the home page, and a picture for each of the 12 booking combinations (drone, how to fly, one or two batteries).

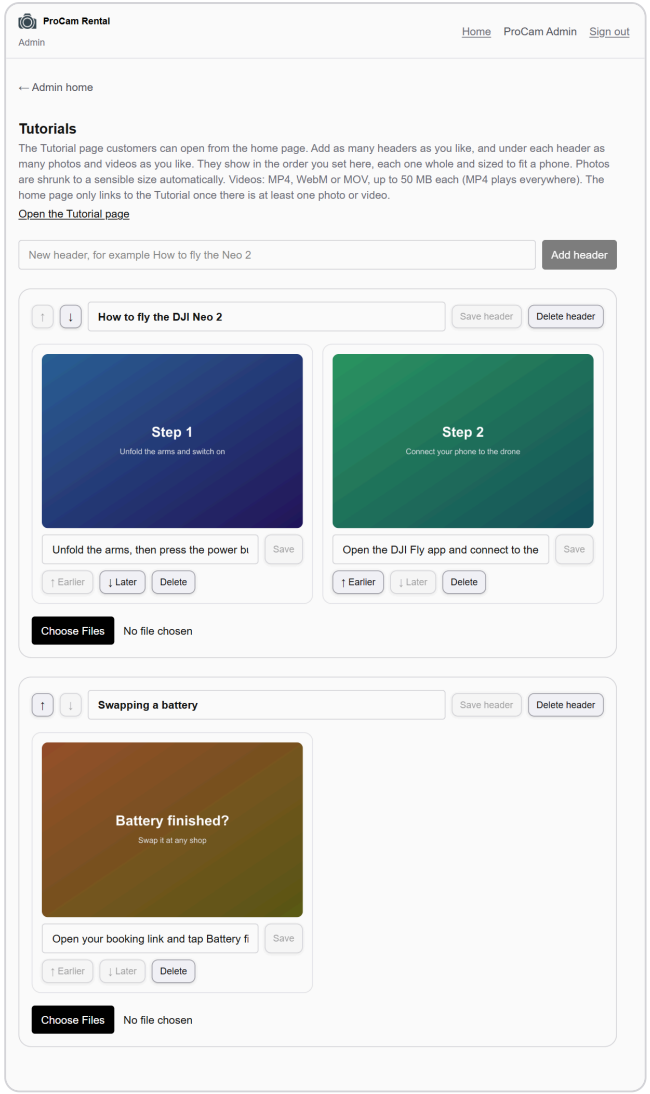

14

PART 5 · WHAT CUSTOMERS SEE, AND THE MESSAGES THEY GET

Tutorials

Add as many headers as you like and, under each, as many photos and videos as you like. Move them earlier or later, add a caption, or delete them. Photos are shrunk automatically; videos can be MP4, WebM or MOV up to 50 MB each.

15

PART 5 · WHAT CUSTOMERS SEE, AND THE MESSAGES THEY GET

How customers see the tutorial

Every photo and video is shown whole, never cropped, at the width of the phone. The home page links to it once there is at least one photo or video.

16

PART 5 · WHAT CUSTOMERS SEE, AND THE MESSAGES THEY GET

WhatsApp

Whether WhatsApp is connected, the exact text of each message to approve in Meta (English, Malay and Chinese), and a log of what was sent and whether it arrived. Customers only get messages if they ticked the box.

WhatsApp

Booking messages on WhatsApp: confirmation, a reminder before pickup, how to swap a battery after handover, a return reminder, a late notice, a deposit nudge, and a refund notice. A customer only gets them if they ticked "WhatsApp me about my booking" when booking, in the language they were using.

Status: Test mode (dry run): nothing is sent, messages are only listed below

- ✓ set `WHATSAPP_PHONE_NUMBER_ID` The id of the WhatsApp number (Meta > WhatsApp > API setup)
- ✓ set `WHATSAPP_ACCESS_TOKEN` A permanent access token from a System User
- ✓ set `WHATSAPP_APP_SECRET` The app secret (Meta app > Settings > Basic), to check the callbacks are really from WhatsApp
- ✓ set `WHATSAPP_VERIFY_TOKEN` Any long random text you make up; Meta asks for it when you set the callback address

Callback address for Meta (WhatsApp > Configuration, subscribe to **messages**): `http://localhost:3000/api/webhooks/whatsapp` . Add the four values in Vercel (Production) and redeploy. The setting `WHATSAPP_DRY_RUN=true` is a test mode: nothing is sent and each message is only listed below.

The templates to approve in Meta

In Meta's WhatsApp Manager > Message templates, create each one as category **Utility**, with exactly this name, and add the three languages (English, Malay, Chinese (CHN)). Paste the text as it is, including {{1}}, {{2}}... and give Meta the sample values. Add one button, type **Visit website** with a dynamic URL, set to `http://localhost:3000/rent/b/{{1}}` (sample: `http://localhost:3000/rent/b/abc123`). Approval usually takes minutes to a day or two.

▼ `procam_booking_confirmed` · Right after the booking is paid.

Variables: {{1}} Customer name · {{2}} Booking number · {{3}} Shop name · {{4}} Pickup date and time. Samples: Aina · DBK-00123 · Country Heights, Kajang · 16 Oct, 10:00.

ENGLISH (LANGUAGE CODE EN) · BUTTON: VIEW BOOKING

```
Hi {{1}}, your ProCam Rental booking {{2}} is confirmed. Collect your drone at {{3}} on {{4}} and show the QR code on your booking page to the staff. New to flying? Watch the tutorial: http://localhost:3000/tutorial
```

Looks like: Hi Aina, your ProCam Rental booking DBK-00123 is confirmed. Collect your drone at Country Heights, Kajang on 16 Oct, 10:00 and show the QR code on your booking page to the staff. New to flying? Watch the tutorial: http://localhost:3000/tutorial

BAHASA MELAYU (LANGUAGE CODE MS) · BUTTON: LIHAT TEMPAHAN

PART 5 · WHAT CUSTOMERS SEE, AND THE MESSAGES THEY GET

The WhatsApp tick box

This is where a customer chooses to get WhatsApp messages: on the details step of the booking, off until they tick it.
